

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852).

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

## Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It will make a minimum of sustainable investments with an environmental objective:\_%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective:\_%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 0.00% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☐ It promotes E/S characteristics, but will not make any sustainable investments

### What environmental and/or social characteristics are promoted by this financial product?

In replicating the performance of the Bloomberg MSCI Global Aggregate 1-3 SRI Carbon ESG-Weighted Index (the “Index”), the Fund promotes the following environmental and/or social characteristics:- Better management of a broad range of environmental and social risks, and where applicable, positioning to meet demand for provision of goods and services that have a positive environmental or social contribution, collectively measured by MSCI ESG ratings. MSCI ESG ratings provide an opinion of companies’ management of financially relevant ESG risks and opportunities. Each company is assessed on relevant environmental, social and governance themes, and where applicable, positioning to meet market demand for the provision of products and services that have a positive environmental or social contribution. The themes determined by MSCI are climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance and corporate behaviour. The Fund will target this by excluding issuers based on sustainability exclusionary criteria and weighting issuers to increase the exposure to those with favourable MSCI ESG ratings; and

- Support the transition to a lower carbon economy by excluding issuers with carbon intensity above limits set by the index provider.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

- **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**  
The below sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the Fund, specifically measuring:  
- MSCI ESG rating of the Fund, relative the Parent Index, whereby the MSCI ESG rating of the Fund is expected to be higher than that of the Parent Index; and  
- Carbon intensity of the Fund, relative to the Parent Index, whereby the carbon intensity of the Fund is expected to be lower than that of the Parent Index

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund are aligned to the environmental and/or social characteristics which it promotes, as set out in this annex.

The Fund replicates the performance of the Index, the focus of which is to achieve a reduction in carbon emissions and an improvement of the MSCI ESG Rating. By replicating the performance of the Index, the investments of the Fund contribute to these sustainable objectives.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Do no significant harm analysis is completed by the Index provider as part of the Index construction.

The Index is re-balanced periodically; prior to the re-balance of the Index the indicators referred to below are incorporated in the assessment of the business activities.

By replicating the performance of the Index, the investments of the Fund do not cause significant harm to the environmental and/or social investment sustainable objective.

Investment restrictions monitoring is an HSBC overlay process that screens for any investments that would cause significant harm to the objectives and which could result in divestment by the Investment Manager ahead of the index re-balancing.

#### **How have the indicators for adverse impacts on sustainability factors been taken into account?**

The mandatory principal adverse impacts (“PAI”) indicators have been used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources have been considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The Bloomberg (BBG) index is constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each securities business involvement is used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlights each securities involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). In addition, a separate controversy screen is applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in Thermal coal mining and generation, Oil & Gas, are also screened at a minimum threshold level and controversial weapons (PAI 14) are removed before the final index is calculated. The methodology uses the aggregate ESG score (as calculated by MSCI ESG Research) which is applied to all eligible securities (minimum BB rating). These scores are used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

No optional indicators are taken into account.

Furthermore active ownership, through engagement and global proxy voting, is a key pillar of our approach to responsible investments. Our stewardship activity is focused on protecting and enhancing our clients' investments with us. We engage with companies on a range of ESG issues and we have the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues range from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We have a dedicated stewardship team with engagement specialists. Engagement is also integral to the fundamental research process. Our analysts and portfolio managers engage with issuers as part of the investment process and cover relevant ESG issues in their research and discussions.

We are fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

### **How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

The Bloomberg (BBG) index is constructed using a combination of BBG and MSCI data. One of the MSCI models the Index methodology incorporates is the MSCI ESG Controversies. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles. Specifically, the MSCI ESG Controversies approach covers the following pillars: Environment, Human Rights & Community, Labor rights & Supply chain, Customers and Governance. These pillars include indicators such as Human rights concerns, Collective bargaining & unions, Child labor and Anticompetitive practices, which are also issues that the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights cover. Further information on MSCI ESG Controversies is available on the Index provider's website.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### **Does this financial product consider principal adverse impacts on sustainability factors?**

☒ Yes.

The Bloomberg (BBG) index is constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each securities business involvement is used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlights each securities involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). In addition, a separate controversy screen is applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in GHG Emissions and Intensity, Fossil fuels, Carbon and Energy, (PAI 1, 2, 3, 4) are also screened at a minimum threshold level and controversial weapons (PAI 14) are removed before the final index is calculated. The methodology uses the aggregate ESG score (as calculated by MSCI ESG Research) which is applied to all eligible securities (minimum BB rating). These scores are used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics.

Furthermore, active ownership, through engagement and global proxy voting, is a key pillar of our approach to responsible investments. Our stewardship activity is focused on protecting and enhancing our clients’ investments with us. We engage with companies on a range of ESG issues and we have the following clear set of engagement objectives:

- Improve our understanding of company business and strategy
- Monitor company performance
- Signal support or raise concerns about company management, performance or direction
- Promote good practice

Engagement issues range from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low-carbon energy transition, to social issues including human capital management, inequality and data privacy.

We have a dedicated stewardship team with engagement specialists. Engagement is also integral to the fundamental research process. Our analysts and portfolio managers engage with issuers as part of the investment process and cover relevant ESG issues in their research and discussions.

We are fully transparent in our reporting of our engagement and voting activity, publishing our voting on a quarterly basis and summary information about our engagement activity annually.

How PAI indicators were considered will be included in the Fund's year-end report and accounts.

Further information is available on request.

☐ No

### **What investment strategy does this financial product follow?**

The Fund is passively managed and will aim to replicate the net total return performance of the Index. The Fund will use optimisation techniques which take account of tracking error and trading costs when constructing a portfolio.

The Index seeks to achieve a carbon emissions reduction and an improvement of the MSCI ESG rating.

The Index achieves this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The binding elements of the investment strategy are as follows:

The following types of issuers are removed from the Index on an ongoing basis due to the sustainability exclusionary criteria and some criteria may apply thresholds:

#### **MSCI ESG Rating**

- a. issuers with an MSCI ESG Rating of lower than BB;
- b. issuers with an ESG Pillar Score of less than 2;
- c. unrated issuers from sectors with ratings;

#### **Business Involvement Screens**

-issuers involved in the following business activities: (i) adult entertainment; (ii) alcohol; (iii) gambling; (iv) tobacco; (v) conventional weapons; (vi) civilian firearms; (vii) nuclear weapons; (viii) controversial weapons; (ix) nuclear power; (x) fossil fuels; (xi) thermal coal extraction and generation; (xii) non-compliance with UN Global Compact Principles; (xiii) genetically modified organisms; and (xiv) MSCI Controversies.

The above exclusions are aligned with the exclusions for EU Paris-aligned Benchmarks as detailed in Article 12(1)(a) – (g) of Commission Delegated Regulation (EU) 2020/1818.

#### **Carbon Intensity Screen**

-A carbon intensity screen is then applied, and issuers with Scope 1 and 2 sales-based carbon intensity of 750mn metric tons or higher are excluded.

#### **Tilt Factors**

-The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the index methodology, which is determined by its MSCI ESG Rating.

Further information on the Index methodology is available from the Index Provider's website detailed in the "Where can the methodology used for the calculation of the

designated index be found?” section of this document

#### **Good governance**

practices include sound management structures, employee relations, remuneration of staff and tax compliance

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Fund does not have an committed minimum rate to reduce the scope of investments.

- **What is the policy to assess good governance practices of the investee companies?**

The Bloomberg (BBG) index is constructed using a combination of BBG and MSCI data. The index methodology incorporates both MSCI ESG Controversies and MSCI ESG Ratings models. MSCI captures good governance practices through these two models. Specifically, MSCI ESG Controversies covers “Labor Rights & supply chain” and “Governance”, among others, and MSCI ESG Ratings incorporates Corporate Governance, Corporate Behavior and Human Capital.

Further information on MSCI ESG Controversies and MSCI ESG Ratings is available on the Index provider's website.

Governance is assessed against criteria specified in the investment process which includes, among other things, business ethics, culture and values, corporate governance and bribery and corruption. Controversies and reputational risks are assessed through enhanced due diligence as well as screening which are used to identify issuers that are considered to have low governance scores. Those issuers will then be subjected to further review, action and/or engagement.

Good corporate governance has long been incorporated in HSBC's proprietary fundamental company research. HSBC's Stewardship team meets with companies regularly to improve our understanding of their business and strategy, signal support or concerns the Investment Manager has with management actions and promote best practice. HSBC believes that good corporate governance ensures that companies are managed in line with the long-term interests of their investors.

Further information is available on request.

#### **Asset allocation**

describes the share of investments in specific assets.

#### **What is the asset allocation planned for this financial product?**

In seeking to achieve its investment objective, the Fund will aim to invest in the constituents of the Index in generally the same proportions in which they are included in the Index. As such, it is expected that at least 80% of the Fund's assets will be invested in either securities within the Index or in securities that meet the ESG criteria of the Index (“#1 Aligned with E/S characteristics”). The Fund may invest up to 20% of its assets in other investments (“#2 Other”)

At each index rebalance, the portfolio of the Fund will be rebalanced in line with the Index so that at least 80% of the Fund's assets will be aligned with the ESG criteria of the Index (this includes 0% of the Fund's assets that are qualified as #1A sustainable investments).

Taxonomy-aligned activities are expressed as a share of:

- **turnover**

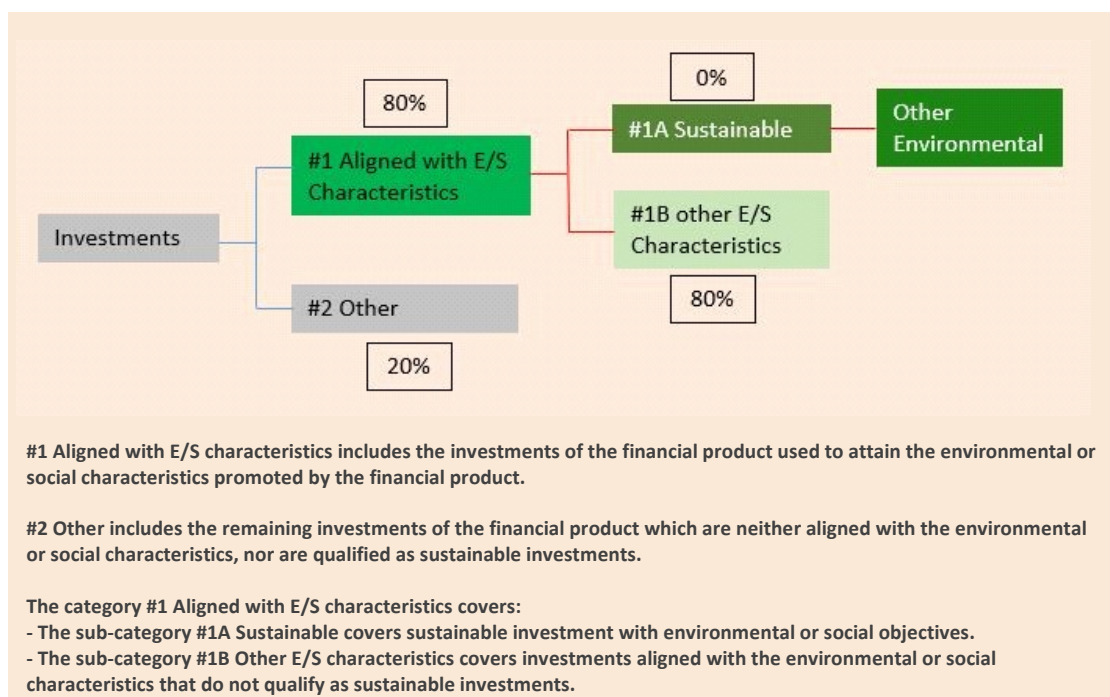

reflecting the share of revenue from green activities of investee companies

- **capital expenditure**

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure**

(OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The sub-fund will not use derivatives to attain the environmental or social characteristics of the sub-fund.

**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A. The Fund does not intend to commit to a minimum share of sustainable investments with an environmental objective that are aligned with the EU Taxonomy.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ?<sup>1</sup>**

☐ yes

☐ in fossil gas

☐ In nuclear energy

☒ No

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective –see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### ● What is the minimum share of investments in transitional and enabling activities?

N/A. The Fund does not have a specific minimum share of transitioning and enabling activities.

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

N/A. The Fund does not intend to commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

### What is the minimum share of socially sustainable investments?

N/A. The Fund does not intend to commit to a minimum share of socially sustainable investments.

### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Cash and other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may be used for hedging and efficient portfolio management, and securitized assets, such as Mortgage-Backed Securities, Asset-Backed Securities and Commercial Mortgage-Backed Securities may be held, in respect of which there are no minimum environmental and/or social safeguards.

**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

Yes. The investment objective of the Fund is to replicate the performance of the Bloomberg MSCI Global Aggregate 1-3 SRI Carbon ESG-Weighted Index.

**Reference benchmarks**

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote

- **How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?**

The following types of issuers are removed from the Index on an ongoing basis due to the sustainability exclusionary criteria and some criteria may apply thresholds:

Issuers with MSCI ESG Ratings lower than BB, issuers with an ESG Pillar score of less than 2, unrated issuers from sectors with ratings. The index also negatively screens issuers that are involved in business activities that are restricted because they are inconsistent with certain values-based business involvement criteria, including activities with high carbon intensity or related to controversial weapons, and those issuers with a “red” MSCI ESG Controversy Score.

The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

On a monthly basis the weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

The Index will be rebalanced on a monthly basis in order to account for the eligibility criteria.

- **How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?**

The investment objective of the Fund is to replicate the performance of the Bloomberg MSCI Global Aggregate 1-3 SRI Carbon ESG-Weighted Index, while minimising as far as possible the tracking error between the Fund’s performance and that of the Index.

The Index will be rebalanced on a monthly basis in order to account for the eligibility criteria.

- **How does the designated index differ from a relevant broad market index?**

The Index seeks to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Bloomberg Global Aggregate 1-3 Year Index.

The Index achieves this by removing, on a monthly basis, securities based on sustainability exclusionary criteria. The following types of issuers are removed from the Index on an ongoing basis due to the sustainability exclusionary criteria and some criteria may apply thresholds:

MSCI ESG Rating

Business Involvement Screens

Issuers with a “red” MSCI ESG Controversy score (i.e. less than 1).

Carbon emissions intensity

The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating. Each constituent is capped at 2% by market value.

- **Where can the methodology used for the calculation of the designated index be found?**

[www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices/#/ucits](http://www.bloomberg.com/professional/product/indices/bloomberg-barclays-indices/#/ucits).

The Index methodology may be amended from time to time by the Index provider. Information on the Index methodology is available on the website above.

**Where can I find more product specific information online?**

More product specific information on this and all other HSBC funds can be found on the website. Go to: [www.assetmanagement.hsbc.com](http://www.assetmanagement.hsbc.com) and select your type of investor and country/location. Please select 'Funds' from the main navigation page, where you can use the search or filter functions to find your particular fund.
