Directors' Report

Directors' Comments

The Board of Directors presents the Audited Annual Report and Accounts for HSBC Global Investment Funds (the "Company") for the year ending 31 March 2024.

The Company

The Company is a variable capital investment company, incorporated under the laws of the Grand Duchy of Luxembourg and is organized as an "umbrella" with a number of sub-funds, each of which has their own investment policies and restrictions. At present, the Company has issued shares in 76 sub-funds. During the year, the total net assets of the Company increased from USD 30.66 billion to USD 33.25 billion at year end.

The Company qualifies as an Undertaking for Collective Investment in Transferable Securities under the amended Directive 2009/65/EC of 13 July 2009 and may therefore be offered for sale in European Union Member States, subject to registration in countries other than the Grand Duchy of Luxembourg. In addition, applications to register the Company and its sub-funds may be made in other non-European countries. The Company and its sub-funds are currently registered for offer and distribution in the Grand Duchy of Luxembourg and in the following jurisdictions: Austria, Bahrain, Belgium, Brunei, Chile, Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, Jersey, Korea, Lebanon, Macau, Malaysia, Malta, Netherlands, Norway, Oman, Poland, Portugal, Qatar, Saudi Arabia, Singapore, Spain, Sweden, Switzerland, Taiwan, United Arab Emirates and United Kingdom.

Responsibility of the Directors

The responsibility of the directors of the Company (the "Directors") is governed exclusively by Luxembourg law. With respect to these financial statements, the duties of the Directors are governed by general corporate law and the law of 19 December 2002 on, inter alia, the accounting and annual accounts of undertakings, as amended, and by the law of 17 December 2010 relating to undertakings for collective investment, as amended (the "2010 Law"). Since 1 July 2011, the Company is governed by Part I of the 2010 Law implementing the Directive 2009/65/EC into Luxembourg Law.

Remuneration Policy

HSBC Investment Funds (Luxembourg) S.A. ("HIFL") has implemented a remuneration policy pursuant to Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards to depositary functions, remuneration policies and sanctions (the "UCITS V Directive"), which was transposed into Luxembourg law on 1 June 2016 by way of the Luxembourg law of 10 May 2016.

The remuneration policy, which has been approved by HIFL's board of directors, includes measures to avoid conflicts of interest and seeks to promote sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile and articles of incorporation of the Company nor impair compliance with HIFL's duty to act in the best interest of the Company.

The remuneration policy, which describes how remuneration and benefits are determined, is available at www.global.assetmanagement.hsbc.com/about-us/governance-structure, or on request from HIFL.

Total amount of remuneration paid by HIFL to all staff and paid by the investment advisers to their identified staff * during the 12 months period ending 31 March 2024 is as follows:

Fixed remuneration	USD 2,995,988
Variable remuneration	USD 774,528
Number of beneficiaries	30

of which, the disclosure of the fixed and variable remuneration of senior management within HIFL and of identified staff * of the investment advisers is:

Fixed remuneration	USD 1,560,459
Variable remuneration	USD 590,447
Number of beneficiaries	15

* identified staff are defined as members of staff whose actions have a material impact on the risk profile of the Company.

Directors' Report (continued)

Remuneration Policy (continued)

The annual review of the remuneration policy, including a review of the existing remuneration structure as well as implementation of the regulatory requirements and compliance with them, was completed during the year and no irregularities were identified. Furthermore, there were no material changes made to the remuneration policy in the past financial year.

Sustainable Finance Disclosure Regulation ("SFDR")

The following sub-funds are categorised under Article 6 of SFDR as at 31 March 2024.

- Asia Bond
- Asia High Yield Bond
- Asian Currencies Bond
- Brazil Bond
- Euro Bond Total Return
- GEM Debt Total Return
- Global Emerging Markets Bond
- Global Emerging Markets Local Debt
- Global High Yield Bond
- US Short Duration High Yield Bond*
- India Fixed Income
- RMB Fixed Income
- Singapore Dollar Income Bond
- US High Yield Bond
- BRIC Equity
- BRIC Markets Equity
- Frontier Markets
- Global Equity Volatility Focused
- Brazil Equity
- Economic Scale US Equity
- Indian Equity
- Mexico Equity (closed as at 28 July 2023)
- Russia Equity**
- Turkey Equity
- Global Credit Floating Rate Fixed Term Bond 2023 – 1 (closed as at 5 July 2023)
- Global Credit Floating Rate Fixed Term Bond 2023 – 2 (closed as at 29 December 2023)
- Global Emerging Markets Multi-Asset Income
- Managed Solutions - Asia Focused Conservative
- Managed Solutions - Asia Focused Growth
- Managed Solutions - Asia Focused Income
- Multi-Asset Style Factors
- Multi-Strategy Target Return
- US Income Focused

* Until 2 July 2023, the sub-fund was named Global Short Duration High Yield Bond.

**Investment in the Russia Equity sub fund is currently suspended.

Directors' Report (continued)

Sustainable Finance Disclosure Regulation ("SFDR") (continued)

The following sub-funds are categorised under Article 8 of SFDR as at 31 March 2024.

- Asia ESG Bond
- Euro Bond
- Euro Credit Bond
- Euro High Yield Bond
- ESG Short Duration Credit Bond
- Global Bond
- Global Bond Total Return
- Global Corporate Bond
- Global Emerging Markets ESG Bond

- Global Lower Carbon Equity
- Global Real Estate Equity
- Global Sustainable Equity Income
- Global Sustainable Long Term Dividend
- Hong Kong Equity

*Until 31 July 2023, the sub-fund was named Thai Equity.

The following sub-funds are categorised under Article 9 of SFDR as at 31 March 2024.

- Global Emerging Markets Corporate Sustainable Bond
- Global Equity Circular Economy
- Global Sustainable Long Term Equity

Withdrawal of the UK from the EU

Following the end of the transition period all cross-border passporting rights to the UK for EU funds have ceased however, the UK's introduction of a Temporary Marketing Permissions Regime enables all funds that have registered into the regime to continue to be distributed in the UK and purchased by UK domiciled investors. The UK Government has brought forward domestic legislation to streamline the process to allow overseas (including EU) investment funds to be sold in the UK post-Brexit.

It is becoming increasingly clear that there will be more divergence between UK and EU regulations which may limit the cross-border activities that can take place. As at the date of the Financial Statements, the sub-funds continue to be recognised by the FCA and can be marketed to UK investors. The UK is continuing to consider regulatory changes post-Brexit. The nature and extent of such changes still remains uncertain, but may be significant.

Directors' Report (continued)

Impact of Pandemics

Pandemics can impact global markets in several ways, including: (i) adding ongoing uncertainty to global markets as there is no clarity as to how long a pandemic will continue (ii) impeding regular business operations across many different businesses, including manufacturers and service providers; and (iii) slowing down or stopping international, national, and local travel. By way of an example, all of these factors and more have been seen in recent years with the global outbreak of COVID-19. Notwithstanding that COVID-19 cases are again on the rise coupled with a risk of new variants, the initial impact on global markets on certain industries has started to lessen however, the financial impact of the outbreak to date, and whether or not any new variant will give rise to further challenges, cannot be estimated reliably. The Board continues to monitor the situation and receives regular updates from the Management Company. As at 31 March 2024, to our knowledge, the impact of COVID-19 has not affected the Investment Managers' ability to execute the investment strategy of the sub-funds, nor has there been interruption to key service providers engaged by the Company.

Russia's invasion of Ukraine

Russia's invasion of Ukraine has had, and could continue to have, severe adverse effects on regional and global economic markets for securities and commodities. Following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia including, among other actions:

- a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs;
- the removal by certain countries and the European Union of selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and
- restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions.

The current events, including sanctions and the potential for future sanctions, which include (but not limited to) those impacting Russia's energy sector, and other actions, and Russia's retaliatory responses to those sanctions and actions, could continue to have, an adverse effect on global markets performance and liquidity, thereby negatively affecting the value of the sub-funds' investments beyond any direct exposure to Russian issuers. They also give rise to material uncertainty and risk with respect to markets globally and the performance of the sub-funds and their investments or operations could be negatively impacted. Investors should be aware that the duration of the ongoing hostilities and the vast array of sanctions and related events cannot be predicted.

Impact of Ukraine/Russia crisis

The Board of Directors decided to suspend the HGIF Russia Equity sub-fund on 1 March 2022 until further notice. The situation continue to be monitored by the Board. Any subsequent decision that changes this status will be communicated to the investors as and when required.

The Board of Directors in conjunction with the Management Company continue to monitor the situation. Since 2 March 2022, all RUB denominated Russian Government Bonds and any associated coupons held in HGIF Global Emerging Markets Local Debt, HGIF Global Emerging Markets ESG Local Debt and HGIF Global Emerging Market Multi-Asset Income have been written down to 0.

Since 3 March 2022, all Russian equities held in HGIF Global Emerging Markets Multi Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity have been marked down by 90%. For ADR/GDR, if the market price dropped by more than 90%, the stock was valued using the latest market price. Since 10 March 2022, all RUB denominated Russian equities held in HGIF Global Emerging Markets Multi Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity, have been written down to 0.

The security Yandex denominated in USD and listed on the US stock exchange has been priced at 0 since 11 March 2022. This security is held by HGIF BRIC Markets Equity and HGIF BRIC Equity. The securities of Sberbank PJSC ADR, Rosneft IIGDR, and Severstal PJSC GDR have been priced at 0 since 2 June 2022. These securities are held by HGIF Russia Equity and HGIF BRIC Markets Equity.

The securities of Gazprom PJSC ADR, Lukoil PJSC, and Novatek PJSC GDR have been priced at 0 since 1 July 2022. These securities are held by HGIF Russia Equity.

Directors' Report (continued)

Corporate Governance Statement

The Board of Directors confirms its adoption of the ALFI (Association of the Luxembourg Fund Industry) Code of Conduct for Luxembourg Investment Funds (the "Code") and confirms its adherence to the principles of the Code at all times during the period.

Annual General Meeting

The next Annual General Meeting of the Company will be held on Thursday 26 September 2024.

The information stated in the report is historical and is not representative of future results.

Investment Advisers' Report

Market overview: 1 April 2023 to 31 March 2024

Global equities

Global equities produced strong returns over the period, driven primarily by falling inflation and the growing conviction in the market that interest rates would fall in 2024. Markets were also driven by a gently improving economic outlook and strong corporate earnings. Many markets – including the MSCI World Index, the S&P 500, the Stoxx Euro 600 and the Nikkei 225 – set new all-time highs.

Markets began the period unsettled by growing fears of a potential US government debt default and unsure about the repercussions from March 2023's US mini-banking crisis that saw some large regional banks fail. However, the US debt ceiling was ultimately extended, bringing relief to markets, which climbed through the early summer. Markets peaked in early August and fell through September and October as investors became resigned to the fact that interest rates would likely stay at relatively high levels and as the oil price rallied. However, they rallied strongly in the final two months of 2023 on renewed rate-cut hopes, and this upward trend continued through the first quarter of 2024. This was despite some disappointment over central banks seeming to push prospective rate cuts back into the second half of 2024, as well as rising concerns about events in the Middle East and increasing tensions, especially in Gaza.

Developed world markets substantially outperformed emerging markets. Within developed markets, the US led the way, outperforming the MSCI and FTSE World indices. Japan was also strong, especially in yen terms. Continental Europe underperformed the global average return, despite notable strength in some markets, such as Italy and Denmark. The UK was a notable underperformer. In Asian and emerging markets, China performed poorly, while India and Taiwan were strong. Latin American markets also did well, with Argentina the star performer.

Much focus was on central banks' monetary policy and the prospect of interest-rate cuts. Headline inflation rates in most countries continued to drop over the period, although core inflation (excluding more volatile energy and food prices) remained more persistent. The US Federal Reserve (Fed), the Bank of England (BoE) and the European Central Bank (ECB) all left interest rates unchanged in the final quarter of 2023 and the first quarter of 2024.

Economic growth was mixed. The US economy continued to be resilient, confounding those who expected a recession, or at least a marked slowdown. The UK and eurozone economies were more sluggish, with the former falling into a technical recession in the final quarter of 2023. The eurozone just avoided a recession, with growth flat in the final quarter of the year. Growth in Japan was sluggish, while Mainland China managed to grow by just over 5% in 2024, ahead of target.

US equities

US equities were strong over the period and outperformed other global equity markets in aggregate. Performance was driven by the belief that the Fed had completed its monetary tightening and would begin to cut interest rates in 2024, as well as largely better-than-expected corporate results.

The period started with concerns about the nation's regional banks that had seen some high-profile failures. The market was dogged by concerns in May that there would be no agreement in Congress about extending the government's permitted debt ceiling – something that was repeated in September. However, these fears were allayed when a deal was hatched between the Republicans and Democrats. This caused the market to rally into mid-summer before it drifted off, largely on concerns that interest rates would need to stay higher for longer. However, the market rallied strongly again in November and December as investors discounted falling interest rates in 2024. Equities continued to surge in 2024, and the major local equity indices – the S&P 500, the Dow Jones and the Nasdaq Composite – hit new all-time highs during the first quarter. Technology stocks soared through the whole period on strong earnings and interest in artificial intelligence. They were led by the so-called "Magnificent Seven" – large-cap stocks such as Microsoft, Nvidia and Apple. In January, Microsoft overtook Apple as the largest stock (by market capitalisation) in the world, as well as becoming the first stock with a market capitalisation of over \$3 trillion.

Headline inflation continued to decline gently, falling from 4.9% in April 2023 to 3.1% in January 2024. Core inflation also edged lower, falling from 5.5% in April to 3.8% in February. The central bank kept its Fed funds rate unchanged at 5.5%, a 23-year high, from July. By the turn of the year, Fed policymakers began to talk openly about rate cuts in 2024. While hopes of a first-quarter rate cut were ultimately dashed, investors still expected the Fed to reduce rates from the middle of the year.

Investment Advisers' Report (continued)

US equities (continued)

US economic growth remained relatively robust. Annualised GDP expanded 4.9% in the third quarter of 2023 and by 3.4% in the final quarter of the year. For 2023 as a whole, the economy expanded by 2.5% – a pick-up from 2022's economic expansion of 1.9%. Despite a mild rise in the number of those unemployed, the rate of unemployment remained below 4% of the workforce. Job creation – notably the non-farm payrolls – generally exceeded forecasts, while initial jobless claims fell to their lowest levels for a year in early January. However, job openings gradually declined over the period.

Worries about growing tensions in the Middle East and Ukraine, as well as relations with Mainland China, did not ultimately unsettle the positive sentiment that prevailed in US equities.

Europe ex-UK equities

Continental European equities produced positive returns but underperformed other global markets in aggregate. While Europe benefited from positive trends in inflation and the growing expectation of falling interest rates, economic stagnation and the real prospects of a recession held European equities back in relative terms.

The period began in the aftermath of a mini-banking crisis, which, although largely concentrated in the US, featured Credit Suisse effectively going bankrupt and having to be bailed out by UBS. Equities weakened again alongside other global markets in May as worries grew about whether the US would extend its debt ceiling in time to avoid a technical default – something it did finally manage. They peaked in late July and fell in the late summer and early autumn months owing to rising oil and natural gas prices, growing geopolitical concerns, weak economic data and largely hawkish signals from the ECB. However, markets enjoyed a substantial rally in the final two months of 2023 on growing indications that interest rates would fall in 2024. This positive momentum continued into 2024, despite some disappointment that rate cuts looked likely to be pushed out into the second half of the year. However, positive corporate earnings growth boosted sentiment, and both Germany's Dax and the Europe-wide Stoxx Europe 600 indices hit new all-time highs in the first quarter of 2024.

Eurozone headline inflation continued to ease. It fell from 7.0% in April 2023 to 2.4% in November – the lowest level for over two years – before ending the period at 2.6% in February. Core inflation remained higher, at 3.1% in February, and still some way above the ECB's mid-term target of 2%.

The central bank raised its key benchmark interest rate four times through the middle part of 2023, taking it from 3.5% to 4.5% – the highest level for 22 years. For much of the year, ECB President Christine Lagarde warned that the fight against inflation would continue, although she suggested in September that it was possible that rate hikes were at an end, and no further rate hikes occurred thereafter. By the end of the year, there was widespread speculation that rates would be cut in 2024.

Economic growth remained sluggish. It barely grew in 2023 and a recession remained a threat. In the third quarter, GDP fell 0.1%, but a recession was avoided when GDP came in flat during the final quarter of 2023. Household spending across the eurozone was subdued as consumers remained concerned about inflation and the current weak economic prospects. Purchasing managers' indices also worsened over the period, with the composite figure of both manufacturing and services falling into contractionary territory (below 50.0) from June and staying there until February, although there were signs of improving trends in early 2024. However, the labour market remained relatively robust, with the eurozone unemployment rate at an all-time low of 6.5% in February.

UK equities

UK equities rose mildly over the period but were a clear laggard against other developed markets as worries about the economic outlook and political uncertainties kept investor sentiment subdued.

Share prices rallied in early April as investors were relieved that the mini-banking crisis (which saw three US regional banks and Credit Suisse fail) had not turned into a more significant financial crisis. The market rallied on occasion, thereafter, on hopes that interest rates were close to peak levels and that the UK economy could still avoid a recession. It fell in the early autumn as the situation in the Middle East deteriorated and rising oil prices reawakened fears of inflation staying at relatively high levels. However, the market rallied in the final months of 2023 and early months of 2024 as investors grew optimistic about rate cuts in 2024, although it continued to underperform other global markets in aggregate. The make-up of the UK index did not help, given its small technology sector and relatively high exposure to commodity-related stocks, which did not perform well in aggregate in the first quarter of 2024.

Investment Advisers' Report (continued)

UK equities (continued)

While headline inflation fell in the UK, it initially remained higher than many other industrialised countries for the first half of the period. However, the decline in inflation gradually quickened as food and energy prices and wage inflation peaked. From 8.7% in April, it fell to 3.4% in February. Core inflation remained higher; having peaked at a new 31-year high of 7.1% in May, it eased to 4.5% in February.

The BoE raised interest rates from 4.25% at the start of the period to a 15-year high of 5.25% in early August. However, after 14 consecutive rate hikes dating back to late 2021, the BoE kept rates unchanged at its September meeting and for all the remaining policy committee meetings of the period. However, BoE Governor Andrew Bailey remained cautious about cutting rates too soon, though this did not stop speculation that the BoE would need to cut rates in 2024, as the outlook for the economy remained weak.

The economy tipped into a recession in the final quarter of 2023; GDP fell by 0.3% on a quarterly basis, following on from a 0.1% drop in the third quarter. The cost-of-living crisis and increased tax burden – with UK taxes at their highest for 70 years – undermined consumer spending, the bedrock of the UK economy, driving the fall in economic growth. There was some optimism, however, that the recession would prove to be short-lived, especially as monthly GDP data for January and February showed growth recovering. The labour market stayed relatively robust, with the number of people in work at high levels, while the unemployment rate remained relatively low at 4.0% in the three months to January.

Japan equities

Japanese equities performed strongly and outperformed other global markets in aggregate over the period. They produced stellar returns in yen terms, although returns in US dollars and sterling were lower owing to the weakness of the yen. The bellwether Nikkei 225 index hit a new all-time high in February for the first time in over 34 years, ultimately rising above 40,000 in March. This was largely driven by growing optimism that the Japanese economy was close to escaping its decades-long period of deflation, as well as impressive earnings growth – not least among Japan's large exporting sector, which has benefited from the weaker yen. The market also rallied, along with other world markets, on expectations that global interest rates would begin to fall, leading to a revival in the global economy. On the negative side, the deteriorating situation in the Middle East, rising oil prices and some lacklustre economic data negatively affected investor sentiment at times during the year.

Investors' attention became increasingly focused on Bank of Japan (BoJ)'s intentions regarding its monetary policy, notably a potential shift in its longstanding ultra-loose monetary policy. The central bank mildly loosened its yield-curve control policy during 2023 and allowed 10-year government bond yields to drift higher. While the BoJ appeared initially determined to resist a change to its overall loose policy approach, BoJ Governor Kazuo Ueda did concede in the autumn that growing wage pressures in the economy, if persistent, could force the central bank to alter its stance. Finally, in March 2024, the BoJ raised interest rates for the first time in 17 years, increasing its short-term rate from -0.1% to a range of 0.0%-0.1%.

Annual consumer inflation declined over the period, falling from 3.5% in April 2023 to 2.2% in January, although it had picked up to 2.8% by February. The BoJ remained concerned that inflation would not sustainably fall to its 2% target level, particularly amid growing wage pressures that featured the largest wage settlements in decades across the economy.

The Japanese economy remained fragile despite some intermittent signs of recovery. Preliminary GDP figures for the fourth quarter appeared to show that Japan had fallen back into recession, as a quarter-on-quarter fall of 0.8% in the third quarter of 2023 was followed by a 0.1% drop in the fourth. However, the fourth-quarter figure was subsequently revised to a rise of 0.1% in early March.

The yen weakened substantially against the US dollar, depreciating from approximately 132 to approximately 151 over the period – its lowest level since the early 1990s. This was despite the threat of intervention from the Japanese authorities. Although the yen briefly jumped after the BoJ raised rates, the weakness in the currency resumed later in March.

Asia ex-Japan equities

Asia ex-Japan equities produced mildly positive returns, though they were significantly inferior to the global equity aggregate return. Although inflation rates fell throughout the region, investors were concerned about the impact of higher interest rates on economic demand, as well as the strengthening US dollar, rising oil prices and geopolitical tensions – especially relations between the US and Mainland China.

Investment Advisers' Report (continued)

Asia ex-Japan equities (continued)

The latter's economic growth disappointed investors as it appeared to wane following an initial boost after the lifting of its Covid-19-related restrictions in late 2022. Asian markets rallied a little during the summer months as hopes rose that the Fed was close to ending its monetary tightening cycle. However, more hawkish commentary from the Fed and other major central banks about the likelihood of rates staying higher for longer drove markets lower in the autumn, before they rallied along with other global markets in the final two months of the year and the first quarter of 2024.

Mainland China was one of the weakest major markets in the region, especially in local currency terms. Hong Kong also declined as its economy struggled, while Thailand was weaker on worries about political uncertainty in the country, the fall in the baht and disappointing corporate earnings. In contrast, India was strong on resilient economic growth, with the local Sensex index hitting a new all-time high. South Korea, and especially Taiwan, also produced strong returns as they benefited from a positive technology cycle and product demand.

Central banks across the region eased back on tightening monetary policy. Central banks in India and South Korea kept rates unchanged, while the People's Bank of China cut rates mildly and kept liquidity abundant in the money markets in an effort to boost economic growth. Headline inflation generally fell and, in Mainland China, the annual consumer inflation rate dropped to -0.8% in January – the lowest level for nearly 15 years – before recovering into positive territory in February. In India, rampant food inflation drove headline inflation to 7.4% in July before it eased back to 5.1% in February.

Mainland China grew by just over 5% in the final two quarters of 2023, achieving its 2023 target of growing by at least 5% for the whole of 2023. India's economy was relatively strong, growing by over 8% in the second, third and fourth quarters of the year as consumer spending picked up and the services side of the economy was strong. However, overall economic growth in the Asia ex Japan region remained relatively subdued in aggregate.

Emerging market equities

Emerging markets produced positive returns over the period, with nearly all of the positive performance coming in the second half of the year. However, they materially underperformed developed world markets. Although inflation rates generally fell throughout the region, investors were concerned about the impact of higher interest rates on economic demand, as well as the strengthening US dollar, rising oil prices and geopolitical tensions – especially relations between the US and Mainland China. The latter's economic growth disappointed investors as it appeared to wane following an initial boost after the ending of its Covid-19-related restrictions in late 2022.

Emerging markets rallied during the summer months as hopes rose that the Fed was close to ending its monetary tightening cycle. However, more hawkish commentary from the Fed and other major central banks about the likelihood of rates staying higher for longer drove markets in the autumn before the year-end rally kicked in, driven by hopes of falling interest rates. This rally continued into the first quarter of 2024.

While Asian emerging markets were a drag, Latin American equities were strong outperformers. Despite rampant, triple-digit inflation and sky-high interest rates, Argentina was the best-performing market. This was partly driven by hopes of radical reform centered on new President Javier Milei, who was elected late in the year. Brazil produced positive returns, too, as the central bank began to cut interest rates from the late summer of 2023, reducing them on six occasions from 13.75% to 10.75%, and the economy picked up. European emerging markets also rallied strongly, with both Hungary and Poland performing notably well. Inflation across emerging markets generally slowed, allowing some central banks – notably those in Brazil, Chile and Peru – to cut interest rates. Mainland China also cut interest rates mildly in an effort to support its economy and failing property sector.

Investment Advisers' Report (continued)

Emerging market equities (continued)

In terms of economic growth, Mainland China grew by just over 5% in the final two quarters of 2023, achieving its 2023 target of growing by at least 5% for the whole of 2023. India's economy was relatively strong, growing by over 8% in the second, third and fourth quarters of the year as consumer spending picked up and the services side of the economy was strong. However, overall economic growth in the Asia ex Japan region remained relatively subdued in aggregate. Brazil's economic growth was more subdued; GDP rose by 2.0% and 2.1% in annual terms in the third and fourth quarters of 2023, respectively, with the agricultural side of the economy recovering well. Mexico's economy slowed a little towards the end of 2023, achieving annual growth of 3.5% in the third quarter and 2.5% in the fourth. However, this ensured that the economy had achieved 11 consecutive quarters of annual growth.

UK bonds

The UK government bond market fell marginally over the period. In contrast, non-gilts or corporate bonds eked out a positive return as investors showed increasing risk appetite, especially in the second half of the period.

Bond yields rose through the spring and early summer months. From the late summer, however, yields fell as the BoE stopped raising rates and headline inflation fell more steeply. The best performance came in the final two months of the year – one of the best short-term periods for gilts in decades – as bonds rallied strongly on the growing conviction that interest rates would fall in 2024. The 10-year yield dropped by approximately 100 basis points (bps) in November and December. However, yields rose again in the first quarter of 2024 as the BoE – and indeed other major central banks such as the Fed and the ECB – cautioned that inflation was still not sufficiently tamed and that rates would likely need to stay higher for longer.

Over the period, the 10-year benchmark bond yield rose from approximately 3.5% to about 4.0%, having hit a peak of 4.8% in the late summer. Short-dated bond yields rose further. The two-year Gilt yield increased by approximately 70bps, rising from 3.5% to 4.2%.

While headline inflation fell in the UK, it initially remained higher than many other industrialised countries for the first half of the period. However, the decline in inflation gradually quickened as food and energy prices and wage inflation peaked. From 8.7% in April, it fell to 3.4% in February. Core inflation remained higher; having peaked at a new 31-year high of 7.1% in May, it eased to 4.5% in February.

The BoE raised interest rates from 4.25% at the start of the period to a 15-year high of 5.25% in early August. However, after 14 consecutive rate hikes dating back to late 2021, the BoE kept rates unchanged at its September meeting and for the remaining policy committee meetings of the period. However, BoE Governor Andrew Bailey remained cautious about cutting rates too soon, though this did not stop speculation that the BoE would need to cut rates in 2024, as the outlook for the economy remained weak.

The economy tipped into a recession in the final quarter of 2023; GDP fell by 0.3% on a quarterly basis, following on from a 0.1% drop in the third quarter. The cost-of-living crisis and increased tax burden – with UK taxes at their highest for 70 years – undermined consumer spending, the bedrock of the UK economy, driving the fall in economic growth. There was some optimism, however, that the recession would prove to be short-lived, especially as monthly GDP data for January and February showed growth recovering. The labour market stayed relatively robust, with the number of people in work at high levels, while the unemployment rate remained relatively low at 4.0% in the three months to January.

Global bonds

While corporate bonds produced positive returns (particularly high-yield and emerging-market bonds as spreads over government bonds contracted), government bonds fell over the period in sterling terms. Much of the weakness came in Japanese government bonds. US Treasuries were also weaker, while German and UK bonds were only mildly negative. The superior performance from global corporate bond markets reflected the higher relative yields on offer and greater risk appetite from investors.

Investment Advisers' Report (continued)

Global bonds (continued)

The backdrop to the market was one of steadily falling inflation, a slowing in the pace of rate hikes early in the period and, ultimately, a halt to interest-rate hikes by major central banks in the final quarter of the year. The final two months of 2023 marked one of the best short-term periods for government bonds in decades as bonds rallied strongly on the growing conviction that interest rates would fall in 2024. Bond yields headed higher again in the first quarter of 2024 as it became clear that the Fed, ECB and BoE were in no hurry to cut rates and would bide their time until inflation fell sufficiently towards target levels. By the end of March, investors and traders were discounting a cut in rates sometime in the second half of 2024.

Headline inflation rates continued to drop in most countries. In the US, it fell from 4.9% in April 2023 to 3.1% in January, while in the eurozone, it fell from 7.0% in April 2023 to 2.4% in November – the lowest level for over two years, before ending the period at 2.6% in February. In the UK, the decline in inflation gradually quickened in the summer months as food and energy prices and wage inflation peaked. From 8.7% in April, it fell to 3.4% in February.

During the first few months of the period, the major central banks continued to raise rates, but slowed the pace of their hikes. However, in the final quarter of 2023, they left rates unchanged, and by the end of 2023, most investors were speculating that central banks would soon be able to begin to cut rates in 2024.

Economic growth was mixed. The US economy continued to be resilient, confounding those who expected a recession, or at least a marked slowdown. US employment trends remained favourable, although job creation showed signs of a slowdown. The UK and eurozone economies were more sluggish, with the former falling into a technical recession in the final quarter of 2023 following two consecutive quarterly falls in GDP. The eurozone just avoided a recession, with growth flat in the final quarter of the year, while Japan was sluggish. Mainland China managed to eke out growth of 5.2% in 2024, just ahead of target, but remained beset by significant challenges in its property sector and local government, where material debt issues persisted.

Audit report

To the Shareholders of
HSBC Global Investment Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of HSBC Global Investment Funds (the “Fund”) and of each of its sub-funds as at 31 March 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 March 2024;
- the combined statement of operations and changes in net assets for the Fund and the statement of operations and changes in net assets for each of the sub-funds for the year then ended;
- the portfolio of investments and other net assets as at 31 March 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu*

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors;

- conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Brazil Bond where a decision to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

** Dealing and Official Net Asset Value calculation of Russia Equity sub-fund have been suspended since 25 February 2022 following the closure of Moscow Stock Exchange. An indicative Net Asset Value as at 31 March 2024 has been calculated for presentation purposes in the financial statements only. The Pricing Committee and Management Company have agreed and instructed to write down to zero all the local RUB-denominated Russian equities held in the Portfolio of Investments.

All Net Asset Values per share are disclosed in sub-fund currency.

Statement of Derivatives

as at 31 March 2024 (continued)

Futures

During the course of the financial year ended 31 March 2024, the Company has entered into financial futures contracts. Upon entering into a contract the Company deposits and maintains cash as collateral. The cash margin calls needed to cover the required contract margins are adjusted daily in the Company cash accounts, and results on open positions are considered as realised at that point in time. The margin is calculated as the difference between the value of the contract at previous valuation day and the financial future value at the valuation day. The cash held in margin accounts is included in Cash at Bank in the statement of net assets.

As at 31 March 2024, the Company has the following open futures positions:

Underlying	Number of contracts purchase / (sale)	Currency	Commitment in sub-fund currency	Maturity date	Unrealised gain / (loss) in sub-fund currency

Notes to the Financial Statements

for the year ended 31 March 2024

1. Basis of presentation

HSBC Global Investment Funds (the “Company”) is incorporated under the laws of the Grand Duchy of Luxembourg as an investment company with variable capital (Société d’Investissement à Capital Variable or “SICAV”). The capital comprises various separate portfolios (a “sub-fund”) consisting of securities, cash and other sundry assets and liabilities and each sub-fund may comprise various classes of shares being distinct from the other due to their fee structure, distribution policy and target investors.

The accompanying financial statements present the assets and liabilities and the statement of operations and changes in net assets of the individual sub-funds and of the Company taken as a whole. The financial statements of each individual sub-fund are expressed in the currency designated in the Prospectus for that particular sub-fund and the combined financial statements of the Company are expressed in United States Dollars (USD). The combined statement of net assets and the combined statement of operations and changes in net assets are the sum of the statements of each sub-fund.

The financial statements have been prepared in accordance with the format prescribed by the Luxembourg authorities for Luxembourg investment companies under the going concern basis of accounting except for the sub-funds Global Credit Floating Rate Fixed Term Bond 2023 -1, Mexico Equity, Global Credit Floating Rate Fixed Term Bond 2023 – 2 and Brazil Bond. The four sub-funds were put into liquidation respectively on 5 July 2023, 28 July 2023, 29 December 2023 and 15 May 2024, and as such, the financial statements for these sub-funds have been prepared on a non-going concern basis.

For the sub-funds for which the financial statements have been prepared on a non-going concern basis, the following accounting policies differ from those described in the following notes:

- Expected liquidation expenses (if any) will be covered as part of the Operating, Administrative and Servicing Fees;
- Any remaining formation expenses have been fully expensed;
- The valuation of the sub-funds’ investments are based on their net realizable value.

The application of the non-going concern basis of accounting has not led to adjustments to the sub-funds’ published net asset value.

The Company is an officially registered investment fund under part I of the amended 2010 Law and qualifies as a UCITS fund under the European Directive 2009/65/EC.

Certain sub-funds of the Company are authorised by the Hong Kong Securities and Futures Commission under Section 104 of the “Securities and Futures Ordinance”.

In the Prospectus and in the various reports, the short names of the sub-funds are used. The complete name of each sub-fund consists of “HSBC Global Investment Funds” plus the short name of the sub-fund.

From 1 April 2023 to 31 March 2024:

a) The following sub-funds have been closed:

- ▶ Global Credit Floating Rate Fixed Term Bond 2023 - 1 on 5 July 2023
- ▶ Mexico Equity on 28 July 2023
- ▶ Global Credit Floating Rate Fixed Term Bond 2023 - 2 on 29 December 2023

b) The following sub-fund has been launched:

- ▶ Corporate Euro Bond Fixed Term 2027 on 30 June 2023

c) The following sub-funds have changed their names:

- ▶ Global Short Duration High Yield Bond has changed into US Short Duration High Yield Bond as at 3 July 2023
- ▶ Thai Equity has changed into ASEAN Equity as at 1 August 2023

2. Accounting policies

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the Company’s financial statements.

a) Accounting convention

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

2. Accounting policies (continued)

b) Assets and portfolio securities valuation

Portfolio securities and/or financial derivative instruments which are listed on an official stock exchange are valued at the last available price on the principal market on which such securities are traded. Securities traded on other organised markets are valued at the last available price or yield equivalents obtained from one or more dealers in such organised markets at the time of valuation.

If such prices are not representative of their fair value, all such securities and all other permitted assets shall be valued at their fair value at which it is expected they may be resold as determined in good faith by or under the direction of the Board of Directors.

The assets of the sub-funds are valued using prices available at different times during the day of 31 March 2024, being the last business day of the reporting period.

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are valued in accordance with market practice as follows:

Options

Outstanding options traded on a regulated market are valued based on the intraday price or the last available market price of the instruments.

OTC options are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

The market value of options is included in the statement of net assets under the headings "Unrealised Gain/(Loss) on Options".

The realised gains/(losses) and change in unrealised appreciation/(depreciation) on options are disclosed in the statement of operations and changes in net assets respectively under the headings "Realised Profit/(Loss) on Derivatives" and "Change in Unrealised Appreciation/(Depreciation) on Derivatives".

Futures Contracts

Upon entering into a futures contract, the Company is required to deposit with the broker, cash or securities in an amount equal to a certain percentage of the contract amount which is referred to as the initial margin account. Subsequent payments, referred to as variation margin, are made or received by each sub-fund periodically and are based on changes in the market value of open futures contracts.

The unrealised appreciation/(depreciation) on futures contracts is disclosed in the statement of net assets under "Unrealised Gain on Futures" and "Unrealised Loss on Futures". Changes in the market value of open futures contracts are recorded as unrealised appreciation/(depreciation) in the statement of operations and changes in net assets under "Change in Unrealised Appreciation/(Depreciation) on Derivatives". Realised gains or losses, representing the difference between the value of the contract at the time it was opened and the value at the time it was closed, are reported at the closing or expiration of futures contracts in the statement of operations and changes in net assets under "Realised Profit/(Loss) on Derivatives". Securities deposited as initial margin account are designated in the Portfolio of investments and other Net Assets and cash deposited is recorded in the statement of net assets in "Cash at bank". A receivable and/or a payable to brokers for the daily variation margin is also recorded in the statement of net assets under caption Cash at Bank or Bank Overdraft.

Forward Foreign Exchange Contracts

The values of the Forward Foreign Exchange Contracts are adjusted daily based on the applicable forward exchange rate of the underlying currency for the remaining period, until maturity. Changes in the value of these contracts are recorded as unrealised appreciation or depreciation until the contract settlement date. When the forward contract is closed, the sub-fund records a realised gain or loss equal to the difference between the value at the time the contract was opened and the value at the time it was closed.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

2. Accounting policies (continued)

b) Assets and portfolio securities valuation (continued)

Forward Foreign Exchange Contracts (continued)

The unrealised appreciation/(depreciation) on Forward Foreign Exchange Contracts is disclosed in the statement of net assets under “Unrealised Gain on Forward Foreign Exchange Contracts” and “Unrealised Loss on Forward Foreign Exchange Contracts”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under “Realised Profit/(Loss) on Derivatives” and “Change in Unrealised Appreciation/(Depreciation) on Derivatives”.

Interest Rate Swaps

Interest rate swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under “Unrealised Gain on Swaps” and “Unrealised Loss on Swaps”. Realised gains/(losses) and changes in unrealised appreciation/(depreciation) as a result thereof are included in the statement of operations and changes in net assets respectively under “Realised Profit/(Loss) on Derivatives” and “Change in Unrealised Appreciation/(Depreciation) on Derivatives”.

Credit Default Swaps

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation.

If a credit event occurs, the protection seller would be obliged to make a payment, which may be either: (i) a net cash settlement equal to the notional amount of the swap less the auction value of the reference obligation or (ii) the notional amount of the swap in exchange for the delivery of the reference obligation. Selling protection effectively adds leverage to a Company’s portfolio up to the notional amount of swap agreements.

Credit default swaps are marked to market at each NAV calculation date. The market value is based on the valuation elements laid down in the contracts, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under “Unrealised Gain on Swaps” and “Unrealised Loss on Swaps”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading “Realised Profit/(Loss) on Derivatives” and “Change in Unrealised Appreciation/(Depreciation) on Derivatives.”

Total Return Swaps

A total return swap is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument represented by a security, commodity, basket or index thereof for a fixed or variable rate. One party pays out the total return of a specific reference asset, and in return, receives a regular stream of payments. The total performance will include gains and losses on the underlying, as well as any interest or dividends during the contract period according to the type of underlying. The cash flows to be exchanged are calculated by reference to an agreed upon notional amount or quantity. To the extent the total return of the reference asset underlying the transaction exceeds or falls short of the offsetting payment, the Company will receive a payment from or make a payment to the counterparty.

Total return swaps are marked to market at each NAV calculation date. The estimated market value is based on the valuation elements laid down in the contract, and is obtained from third party pricing agents, market makers or internal models.

The unrealised appreciation/(depreciation) is disclosed in the statement of net assets under “Unrealised Gain on Swaps” and “Unrealised Loss on Swaps”. Realised gains/(losses) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of operations and changes in net assets respectively under the heading “Realised Profit/(Loss) on Derivatives” and “Change in Unrealised Appreciation/(Depreciation) on Derivatives”.

Collective Investment Schemes

Shares or units in underlying open-ended investment sub-funds are valued at their last available Net Asset Value reduced by any applicable charges.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

2. Accounting policies (continued)

b) Assets and portfolio securities valuation (continued)

Money Market Investments

The Company uses the amortized cost method of valuation in valuing its portfolio of financial instruments in the form of short term debt (such as commercial paper, certificate of deposit, treasury bills). In addition, in the rare circumstances where a fixed income instrument with a time to maturity exceeding 90 days becomes stale, the Company will effectively value it at amortised cost until such date when it is either sold or its market becomes active again.

Mortgage related securities - To Be Announced securities (TBAs)

TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of the purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of the purchase, the principal value has not been finalised. TBA positions are disclosed in the portfolio of investments and other net assets. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Payable on Investment Purchase" in the statement of net assets. Negative positions in the portfolio of investments and other net assets reflect the Fund's sale commitments of TBAs. The amount corresponding to the receivable due when the transaction is settled, is disclosed under "Receivable on Investment Sold" in the statement of net assets. The realised gains/(losses) on TBAs and changes in unrealised appreciation/(depreciation) are disclosed in the statement of operations and changes in net assets respectively under the headings "Realised Profit/(Loss) on Investments" and "Change in Unrealised Appreciation/(Depreciation) on Investments".

c) Income and expenses

Dividends are accounted for on an ex-dividend basis. Dividends are reflected in the Statement of Operations and Changes in Net Assets, net of withholding taxes, under the caption "Investment Income, net".

Interest income on debt securities is accrued on a day-to-day basis. In the case of debt securities issued at discount or premium to maturity value, the total income arising on such securities, taking into account the amortisation of such discount or premium on an effective interest rate basis, is spread over the life of the security. Interest income on bonds are accounted for using the effective interest rate ("EIR") method. Interest income on debt securities are reflected in the statement of operations and changes in net assets under the caption "Investment Income, net".

The interest income / expense on interest rate swap contracts (IRS) are accrued on a day-to-day basis. The net interest income / expense on interest rate swap contracts (IRS) are reflected in the Statement of Operations and Changes in Net Assets under the caption "Investment Income, net".

d) Foreign exchange

The cost of investments, income and expenses in currencies other than the sub-funds' relevant reporting currency have been recorded at the rate of exchange ruling at the time of the transaction. The market value of investments and other assets and liabilities in currencies other than the relevant reporting currency have been converted at the rates of exchange ruling at 31 March 2024.

e) Realised Profit/(Loss) on Investments

Realised profit/(loss) on sale of investments is the difference between the historical average cost of the investment and the sale proceeds (excluding any transaction expenses as further explained in Note 5).

The realised loss on investment amounting to USD 5,404,501 recorded in the Statement of Operations and Changes in Net Assets of Russia Equity Sub-Fund (suspended since 25 February 2022) is mainly due to the proceeds on 346,508 shares of security POLYMETAL INTERNATIONAL sold on 12 July 2023 at the price of GBP 2.05.

The security is not in the list of sanctioned assets issued by the U.S. Treasury Department's Office of Foreign Assets Control (OFAC), the transaction sale was placed in the best interest of the investors of the Fund.

f) Foreign currency translation

The reference currency of the Fund is USD and the combined statements are expressed in that currency.

The books and records of each sub-fund are denominated in the reference currency of the corresponding sub-fund.

Income and expenses, assets and liabilities expressed in currencies other than the reference currency of the Fund are converted at exchange rate prevailing at year-end.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

2. Accounting policies (continued)

f) Foreign currency translation (continued)

Here are the main exchange rates applied at year-end.

1 USD = EUR 0.925926

SGD 1.3496

g) Segregated liability

The Company has segregated liability between its sub-funds; meaning, the assets of a sub-fund are exclusively available to satisfy the rights of shareholders in relation to that sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation and liquidation of that sub-fund.

h) Securities lending

The Company may enter into Securities Lending transactions by which a counterparty transfers securities subject to a commitment that the borrower will return equivalent securities at a future date or when requested to do so by the transferor, that transaction being considered as securities lending for the counterparty transferring the securities and being considered as securities borrowing for the counterparty to which they are transferred.

The Company will ensure that it is able at any time to recall any securities that has been lent out or terminate any Securities Lending agreement into which it has entered

All revenues (less transaction costs) from Securities Lending transactions are accrued to the relevant sub-fund based on information confirmed by the Lending Agent.

Detail on Security Lending transaction is disclosed in Note 11 of the current report.

To guarantee this transaction, the relevant sub-fund receives collateral. Securities on loan are delivered to a third party broker, the assets lent continue to be valued as part of the portfolio of the relevant sub-fund. Upon termination of a loan, the relevant sub-fund is required to return to the borrower the posted collateral. This remuneration is accounted for in the Statement of Operations and Changes in Net Assets under "Investment income, net".

i) Spot foreign currency transactions

Unsettled spot foreign currency transactions as at 31 March 2024 are recorded under "Receivable on Unsettled Spot Foreign Currency Transactions" and "Payable on Unsettled Spot Foreign Currency Transactions" in the Statement of Net Assets.

j) Trailer fees and rebates

The Company pays management fees to the Management Company. Trailer fees are either taken out of the management fees or the Management Company may instruct the Company to pay a portion of the management fees directly out of the assets of a sub-fund to a recognised intermediary. In both cases, the management fees due are reduced accordingly.

3. Share capital

The Company has issued either A, B, E, F, I, J, K, L, M, N, P, R, S, SP, T, U, W, X, Y, YP, Z and ZP Shares to investors in one or several sub-funds as detailed below.

Within each Share Class of a sub-fund, the Company shall be entitled to create different sub-classes, distinguished by their distribution policy (Capital Accumulation (C) and Distribution (D) Shares), their reference currency, their hedging activity (H) and/or by any other criteria stipulated by the Board of Directors.

All share classes are available as both "Capital Accumulation" and "Distribution" shares.

Class	Description		Minimum Initial Investment Minimum Holding (in US Dollar or equivalent amount in a major currency)
Class A	A Shares are available to all investors.	USD	5,000 Unless otherwise provided in the sub-fund characteristics of the Prospectus

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

3. Share capital (continued)

Class	Description		Minimum Initial Investment Minimum Holding (in US Dollar or equivalent amount in a major currency)

USD	1,000,000
Class ZP*	ZP Shares are available to investors who have entered into a discretionary management agreement with an HSBC Group entity and to investors subscribing via Distributors selected by the Global Distributor provided that such investors qualify as institutional investors within the meaning of article 174 of the 2010 Law.	USD	1,000,000

* Successive J, L, M, R, YP and ZP Share Classes in a given sub-fund may be numbered 1, 2, 3.... and would be referred to as J1, J2, J3 (...), L1, L2, L3 (...), M1, M2, M3 (...), N1, N2, N3 (...), R1, R2, R3 (...), YP1, YP2, YP3 (...) and ZP1, ZP2, ZP3 (...).

** Successive S Share Classes will be issued in one or different sub-funds, numbered 1, 2, 3 etc. and named S1, S2, S3 etc. for the first, second and third S Class launched respectively.

The Board of Directors of the Company is authorised to issue different Classes of Shares in one or more sub-funds. Details of the characteristics of such Share Classes offered shall be determined at the sole discretion of the Board of Directors. In case of the creation of any additional Classes of Shares, the Prospectus shall be updated.

The subscription proceeds of all Shares in a sub-fund are invested in one common underlying portfolio of investments. All Shares of the same Class have equal rights and privileges. Each Share is, upon issue, entitled to participate equally in assets of the relevant class of the sub-fund to which it relates on liquidation and in dividends and other distributions as declared for such sub-fund. The Shares shall carry no preferential or pre-emptive rights and each whole Share shall be entitled to one vote at all meetings of shareholders.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

3. Share capital (continued)

The Board of Directors may suspend the right to vote of any shareholder who does not comply with his/her/its obligations set out in the Articles of Incorporation and/or any document (including any application form) stating his/her/its obligations towards the Company and/or the other shareholders. In case the voting rights of one or more shareholders are suspended in accordance with the above paragraph, such shareholders shall be sent the convening notice for any general meeting and may attend the general meeting but their Shares shall not be taken into account for determining whether the quorum and majority requirements are satisfied. Any shareholder may undertake (personally) not to exercise his/her/its voting rights in respect of all or part of his/her/its Shares, temporarily or indefinitely.

The minimum initial investment amount may be waived or reduced at the discretion of the Board of Directors of the Company.

Share Class Denominations and Successive Classes:

The Share Classes issued in the different sub-funds are designated by their class name, followed by their distribution characteristics and, if applicable, their specific hedging policy and the currency into which the Base Currency is hedged. This means that for example Shares issued in Class A which are distributing income and applying a hedging policy to Euro, as defined above, would be identified as ADHEUR whereas Class I Shares accumulating income would be identified as IC.

Distribution Shares are identifiable by a "D" following the sub-fund and Class names (e.g.: Class AD), with the exception of Monthly Distribution Shares which are identifiable by a "M" following the sub-fund and Class names (e.g.: Class AM), Bi-Monthly Distribution Shares which are identifiable by a "B" following the sub-fund and Class names (e.g.: Class AB), Quarterly Distribution Shares which are identified by a "Q" following the sub-fund and Class names (e.g: Class AQ) and Semi-Annual Distribution Shares which are identified by a "S" following the sub-fund and Class names (e.g: Class AS).

Within each Share Class of a sub-fund, separate currency hedged classes may be issued (suffixed by "H" or "O" and the currency into which the Base Currency is hedged or the currency into which the sub-fund total assets are primarily invested in, is hedged. These currency hedged share classes shall be named: "ACHEUR" or "ACOEUR" for a Capital-Accumulation Share Class hedged into Euro). Any fees of the Administrator or other appointed parties relating to the execution of the currency hedging policy shall be borne by the relevant currency hedged class. These fees are in addition to the operating, administrative and servicing expenses detailed below. Any gains or losses shall also accrue to the relevant currency hedged class.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

4. Charges and expenses

a) Explanation of the charging structure

Investment in the Company is generally offered via charging structures, as represented by the A, B, E, F, I, J, K, L, M, N, P, R, S, SP, T, U, W, X, Y, YP, Z and ZP Classes of Shares.

HSBC Investment Funds (Luxembourg) S.A. (the "Management Company") is entitled, in respect of each Class of Shares, to a management fee to cover all investment management, investment advisory and distribution services provided in relation to the relevant class (see paragraph (b) headed "Management Fee" below).

In addition, the Company pays to the Management Company a fee to cover operating, administrative and servicing expenses. To safeguard shareholders from fluctuations in a sub-fund's operating, administrative and servicing expenses, the Company has agreed with the Management Company that the fee charged to cover such operating, administrative and servicing expenses is fixed at an annual rate.

The potential excess of such expenses above such annual rate shall be borne directly by the Management Company (see paragraph (e) headed "Operating, Administrative and Servicing Expenses/Operating Currency Hedged Share Class Fees" below).

b) Management fee

The Company pays to the Management Company an annual management fee calculated as a percentage of the Net Asset Value of each sub-fund or share class ("Management Fee"). The Management Fee is accrued daily and payable monthly in arrears at the rates specified in the following table.

	Class A	Class B	Class E	Class F	Class I	Class J	Class K	Class L	Class M	Class N	Class P	Class R	Class S	Class SP	Class T	Class U	Class W	Class X	Class Y	Class Z	Class ZP

+1.190% for share class S49

The maximum rate for Class E, I, J, L, M and N Shares is 3.500%.

The maximum rate for Class A, B, K, P, R, S, X, Y, YP, Z and ZP Shares is as stated in the Prospectus.

No Management Fee is currently charged for Class W Shares.

The Management Fee covers investment management, investment advisory and distribution services provided in relation to the relevant sub-fund of the Company by the Management Company, the Investment Advisers and the Distributors. The Management Company is responsible for paying, out of such fee, the fees of the Investment Advisers and the Distributors and may pay part of such fee to recognised intermediaries or such other person as the Management Company may determine, at its discretion.

The Management Company may instruct the Company to pay a portion of the Management Fee directly out of the assets of the Company to any of such service providers or identified persons. In such case, the Management Fee due to the Management Company is reduced accordingly. If the Company invests in shares or units of UCITS (including other sub-funds of the Company) and other eligible UCIs that are managed directly or indirectly by the Management Company itself or a company with which it is linked by way of common management or control or by way of a direct or indirect stake of more than 10% of the capital or votes, then there will be no duplication of management, subscription or repurchase fees between the Company and the UCIs into which the Company invests.

c) Directors' fees, expenses and interests

A Director may be a party to, or otherwise interested in, any transaction or arrangement with the Company or in which the Company is interested, provided that he has disclosed to the other Directors, prior to the conclusion of any such transaction or arrangement, the nature and extent of any interest of his therein. Subject to approval of the Board, a Director may vote in respect of any contract or arrangement or any proposal whatsoever in which he has an interest, having first disclosed such interest. He shall not be disqualified by his office from contracting with the Company. If a Director declares his interest in any contract which the Company is considering entering into, he may be counted in the quorum of any meeting to consider the contract and may vote on any resolution to enter into such contract, provided that the decision to be taken by the Board of Directors relates to the current operations entered into under normal conditions.

The Company pays an annual fee to each of the Independent and non executive Directors amounting to EUR 55,000. This amount is paid by the Management Company through the operating, administrative and servicing expenses paid by the Company. The amount of Operating, Administrative and Servicing Expenses is accrued with every net asset value calculation and paid quarterly in arrears. For the year-end as at 31 March 2024, a total of EUR 165,000 has been charged as Independent and non executive Directors' fees.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

4. Charges and expenses (continued)

d) Operating, Administrative and Servicing Expenses / Operating Currency Hedged Share Class Fees

The Company pays to the Management Company fees to cover certain Operating, Administrative and Servicing expenses and the execution of the currency hedging policy. The Management Company is responsible for discharging out of this fee, the expenses described below, inter alia, payable to the Depository Bank, the Administration Agent and the Registrar and Transfer Agent or any other appointed entity. If the total actual expenses described below exceeds the total of Operating, Administrative and Services Expenses and the Operating Currency Hedged Share Class Fee set for each sub-fund and Share class, the excess of such expenses above such annual percentage will be borne directly by the Management Company or its affiliates, and equally the Management Company or its affiliates may retain any surplus.

- (i) Operating, Administrative and Servicing Expenses cover the ongoing custody/depository fees and safekeeping charges payable to the Depository Bank and its correspondent banks, fees for Fund accounting and administration services (including domiciliary services) payable to the Administration Agent and transfer agency fees for registrar and transfer agency services payable to the Registrar and Transfer Agent.

Operating, Administrative and Servicing Expenses also cover expenses relating to the creation of new sub-funds; the costs of the Subsidiaries (see paragraph (6) below); the Luxembourg asset-based tax d'abonnement, at the rate referred to under Section "Taxation" of the Company's Prospectus; fees and reasonable out-of-pocket expenses incurred by the Board of Directors; legal and auditing fees and expenses; ongoing registration and listing fees, including translation expenses; the costs and expenses of preparing, printing, and distributing the Company's Prospectus, Key Investor Information Documents, financial reports, statements and other documents made available directly or through intermediaries to its shareholders.

This fee is set, for each sub-fund and/or Class, at a fixed percentage of the Net Asset Value of the relevant sub-fund or Class specified in the Company's Prospectus dated January 2024 (as specified in the table on page 72 and following). Such fee is accrued daily and payable monthly in arrears.

No Operating, Administrative and Servicing Expenses shall be charged to Class W Shares. All the fees and charges allocated to such Class of Shares shall be paid directly by a member or an affiliated entity of HSBC Group.

- (ii) Operating Currency Hedging Fees cover the fees of the Administration Agent or other appointed parties relating to the execution of the currency Hedged Share Class policy for the Currency Hedged Share Classes as described in "Profile of the Typical Investor Categories".

The maximum rate for (i) and (ii) together for Class A, B, E, I, J, L, M, N, P, R, S, X, Y, YP, Z and ZP Shares is 1.0%. However, the Board of Directors reserves the right to amend the levels of the above fees applicable to each Class of Shares. In the event of an increase of such expenses, the concerned shareholders will be given at least one-month prior notice, of such increase. During this notice period, such shareholders may request the redemption of their Shares, free of charge.

The Management Company may instruct the Company to pay a portion of the aforesaid fees directly out of the assets of the Company to any of the aforementioned service providers. In such case the fee due to the Management Company is reduced accordingly.

Any actual Operating, Administrative and Servicing Expenses incurred by a share class exceeding this cap will be borne by the Management Company

5. Transaction expenses and extraordinary expenses

Transaction expenses linked to security dealing are included with the cost of investments purchased and deducted from the proceeds received on sales of investments and are included in the statement of operations and changes in net assets under the heading "Transaction Fees".

Each sub-fund bears the costs and expenses of buying and selling portfolio securities and financial instruments, brokerage fees and commissions, interest or taxes payable, and other transaction related expenses. These transaction fees are accounted for on a cash basis and are paid when incurred or invoiced from the net assets of the sub-fund to which they are attributable. Transaction fees are allocated across each sub-fund's Share Classes.

The Company bears any extraordinary expenses including, without limitation, litigation expenses and the full amount of any tax, levy, duty or similar charge and any unforeseen charges imposed on the Company or its assets.

For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

6. Taxation of the Company

The following is based on the Company's understanding of the law and practice currently in force in the Grand Duchy of Luxembourg and is subject to changes therein.

The Company is not liable to any Luxembourg tax on profits or income. The Company is however liable in Luxembourg to a tax of 0.05% per annum of its Net Asset Value, such tax being payable quarterly on the basis of the value of the net assets of the Company at the end of the relevant calendar quarter. The tax rate is reduced to 0.01% per annum for Classes SP, ZP, J, L, S, W, X and Z Shares in the relevant sub-funds. No stamp duty or other tax is payable in Luxembourg on the issue of shares.

The classes/sub-funds may be exempted from this 0.01% tax if they comply with the requirements of the articles 174 and 175 of the 2010 Law which include: (i) the shares of the class/sub-fund must be reserved to institutional investors; (ii) the exclusive object of the class/sub-fund's portfolio must be the investment in money market instruments and/or deposits with credit institutions; (iii) the remaining average maturity of the class/sub-fund's portfolio must be less than 90 days; and (iv) the class/sub-fund must benefit from the highest possible rating of a recognized rating agency.

Following are also exempt from this tax:

- a) Any sub-funds only held by pension funds and assimilated vehicles;
- b) sub-funds whose main objective is the investment in microfinance institutions;
- c) sub-funds/Classes of Shares (i) whose Shares are listed or traded on at least one stock exchange or another regulated market operating regularly, recognised and open to the public and (ii) whose exclusive object is to replicate the performance of one or more indices. If several Share Classes are in issue in the relevant sub-fund meeting (ii) above, only those Share Classes meeting (i) above will benefit from this exemption;
- d) The portion of any sub-fund's assets (prorata) invested in a Luxembourg investment fund or any of its sub-funds to the extent it is subject to the subscription tax;

Also exempt from the tax are the value of assets represented by units/shares held in other eligible UCIs provided that such units/shares have already been subject of this tax provided for by Article 174 of the 2010 Law as amended or by Article 68 of the law of 13 February 2007 as amended.

No Luxembourg tax is payable on the realised or unrealised capital appreciation of the assets of the Company.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

6. Taxation of the Company (continued)

Other Taxes

Under applicable foreign tax laws, withholding taxes may be deducted from interest and dividends and capital gains taxes may be payable at various rates. For the summary of foreign tax laws and practices, refer to Appendix I.

General

In many markets the Company, as a foreign investment fund, may be subject to non-recoverable tax on income and gains (either by withholding or direct assessment) in relation to the investment returns it realizes from its holdings of shares and securities in those markets. Where practicable the Company shall make claims under the relevant double tax treaties and domestic law of the countries concerned in order to minimize the impact of local taxation on the investment return and to obtain the best return for its shareholders. Those claims shall be made on the basis of the Company's understanding of the validity of such claims given the information available from the Company's depositaries, external advisers and other sources as to the interpretation and application of the relevant legal provisions by the tax authorities in the country concerned.

The Company shall seek to provide for tax on capital gains where it considers that it is more likely than not that the tax shall be payable, given the advice and information available to the Company at the date concerned. However, any provision held may be insufficient to cover, or be in excess of, any final liability.

The Company shall seek to claim concessionary tax treatment and account for tax on a best efforts basis, given the tax law and practice at that date. Any change in tax law or practice in any country where the Company is registered, marketed or invested could affect the value of the Company's investments in the affected country. In particular, where retrospective changes to tax law or practice are applied by the legislature or tax authorities in a particular country these may result in a loss for current Shareholders in the affected sub-fund. The Company does not offer any warranty as to the tax position of returns from investments held in a particular market nor of the risk of a retrospective assessment to tax in a particular market or country.

7. Net asset value disclosures

a) Closing prices

The assets of the sub-funds are valued using prices available at different times during the day of 31 March 2024, being the last business day of the reporting period.

The following sub-funds are valued using prices available at different dates, prior to 31 March 2024.

Sub-fund	Valuation date
Global High Yield Securitised Credit Bond	25 March 2024
Global Securitised Credit Bond	25 March 2024
ASEAN Equity*	27 March 2024
Asian Currencies Bond	27 March 2024

* Until 31 July 2023, the sub-fund was named Thai Equity

If the Company had calculated the Net Asset Values solely with a view to publication, the market prices used to value the net assets would have been the closing prices on 31 March 2024. However, these Net Asset Values would not have been significantly different from those shown in these financial statements.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

7. Net asset value disclosures (continued)

b) Cross sub-fund investments

As at 31 March 2024, the total cross sub-fund investments amounts to USD 399,298,082 and therefore the total combined net assets at the year end without cross sub-fund investments would amount to USD 32,854,217,949.

The following table shows the amounts of cross sub-fund investments made by each sub-fund:

Sub-fund	Investment value USD
Global Bond	2,090,017
Global Bond Total Return	3,841,401
Global Corporate Bond	63,932,488
Global Government Bond	159,450,620
Global High Yield Bond	27,275,002
Global High Yield ESG Bond	922,548

9. Dividends

Most distributing fund share classes in issue as at 31 March 2024 have had UK Reporting Fund status, either from 1 April 2010 or from the launch of the fund share class concerned. All Distributing and Accumulating Share Classes have UK Reporting Fund status from 1 April 2013. As and when new fund share classes are launched, UK Reporting Fund applications shall be made to HM Revenue & Customs accordingly. Details of the share classes that have UK Reporting Fund status can be found on the HM Revenue & Customs' website (www.hmrc.gov.uk).

At the date of this report, the status can be found at <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>

The Company publishes annual reportable income information that shareholders require for their UK tax returns at www.kpmgreportingfunds.co.uk. If investors do not have access to the internet they can apply in writing at the registered office of the Company.

The Company paid the following per share dividends (ex-date) during the year ended 31 March 2024:

*The dividend rates disclosed in the note are reported in sub-fund currency by using the exchange rate as at record dates of the distributions.

**Until 2 July 2023, the sub-fund was named Global Short Duration High Yield Bond.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

10. Other Income

Other income mainly consists of dilution levy (refer to Note 14).

11. Security Lending

Each sub-fund may for the purpose of generating additional capital or income (either through the fee paid by the borrowers or the reinvestment of the cash collateral) or for reducing costs participate in Securities Lending subject to complying with the provisions set forth in Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse ("SFTR"), ESMA's Guidelines of 1 August 2014 on ETFs and other UCITS issues (ESMA/2014/937EN) (the "ESMA Guidelines on ETFs and other UCITS issues"), CSSF Circular 08/356 relating to the rules applicable to undertakings for collective investment when they use certain techniques and instruments relating to transferable securities and money market instruments and CSSF Circular 14/592 relating to the ESMA Guidelines on ETFs and other UCITS issues (the "CSSF Circular 14/592") and any other applicable laws, regulations, circulars or CSSF positions as may be amended or replaced.

The Board of Directors has delegated the implementation, management and day to day oversight of a Securities Lending Programme to the Management Company. The Management Company may decide which sub-fund should participate in a Securities Lending programme in which securities are transferred temporarily to approved borrowers by the Management Company in exchange for collateral. Any of the transferable securities or money market instruments belonging to a sub-fund may be subject to Securities Lending. The Management Company report regularly to the board on the Securities Lending activity and remain subject to the ongoing supervision and control of the board in relation to the Securities Lending Programme.

The aim is to use Securities Lending on a continuous basis. The proportion of a sub-fund's net assets subject to Securities Lending transactions is intended to be around 25%.

The Lending Agent, shall receive a fee of 15% of the gross revenue for its services related to Securities Lending and the Management Company a fee of 10% of the gross revenue for the oversight work undertaken in relation to Securities Lending. The remainder (75%) of the gross revenue is received by the relevant sub-funds taking part in the Securities Lending program. The detail of return and cost for each sub-fund are disclosed on Appendix VII (Unaudited Additional Disclosures) – Securities Financing Transactions Regulation ("SFTR") from page 545 to page 573.

The approval and selection process for counterparties to Securities Lending is a dynamic assessment of counterparties based on various criteria. Criteria used for approval of counterparties may include, but are not limited to, a counterparty's minimum credit rating, country or origin, accessibility, execution of specialized trade and regulatory risk profile.

** Until 2 July 2023, the sub-fund was named Global Short Duration High Yield Bond.

*All revenues (less transaction costs) from securities lending transactions are accrued to the relevant sub-fund and are included in the caption "Investment Income, net" in the Statement of Operations and Changes in Net Assets. The total gross income amounts by sub-fund are disclosed in Appendix VII (Unaudited Additional Disclosures) – Securities Financing Transactions Regulation ("SFTR") in Return and Cost section of the current report.

The security lending agent is The Hong Kong and Shanghai Banking Corporation Limited which is an affiliated entity of the management company.

The collateral type received on security lending are corresponding to bonds and shares.

The names of each counterparty by sub-fund are disclosed in Appendix VII (Unaudited Additional Disclosures) – Securities Financing Transactions Regulation ("SFTR") in Concentration data section from page 547 to page 556 of the current report.

There was no collateral reused on securities lending during the year ended 31 March 2024.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

12. Transactions with connected persons and brokerage commission paid per sub-fund

All transactions with connected parties were carried out on an arm's length basis.

(a) Bank accounts and deposits with related parties

Bank accounts are maintained and deposits are made mainly with HSBC Continental Europe, a member of HSBC Group.

(b) Investment transactions with related parties

In their purchases and sales of investments, the sub-funds utilise the services of members of HSBC Group. Details of such transactions executed during the year ended 31 March 2024 are shown below.

* Until 2 July 2023, the sub-fund was named Global Short Duration High Yield Bond.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

12. Transactions with connected persons and brokerage commission paid per sub-fund (continued)

(b) Investment transactions with related parties (continued)

No soft commission arrangements are in place, except commission sharing arrangements as specifically detailed below.

In some locations, the investment adviser and its connected persons have entered into commission sharing arrangements (related solely to research services, defined as soft commissions by the Hong Kong Securities and Futures Commission, that are utilized by the Fund) with certain brokers, for which goods and services used to support the investment decision making process were received by it or its connected persons.

The investment adviser or its connected persons do not make direct payment for these services, but transact and agree an amount of business with brokers on behalf of the sub-funds concerned. All transactions were entered into in the ordinary course of business and on normal commercial terms.

Commissions were paid by the Company on these transactions. The goods and services utilized for the Company include the following: research and advisory services, economic and political analysis, portfolio analysis, market analysis and investment related publications.

(c) Director holdings in the Company

Timothy Palmer acquired, prior to his appointment as a Director of the Company, and holds shares in HGIF Turkey Equity

13. List of movements in the investment portfolio

The detailed list of movements in the investment portfolio can be obtained free of charge upon request at the registered office of the Company.

14. Anti-Dilution Mechanisms

There are two Anti-Dilution Mechanisms available to each Sub-Fund, a Pricing Adjustment and an Anti-Dilution Levy, both mechanisms aim to protect shareholders in a Sub-Fund. There are 2 different Pricing Adjustment mechanisms: a Partial Swing Pricing Adjustment and a Full Swing Pricing Adjustment (which operates only for Sub-Fund Corporate Euro Bond Fixed Term 2027).

When investors buy or sell Shares in a Sub-Fund, the Investment Adviser may need to buy or sell the underlying investments within the Sub-Fund. Without an Anti-Dilution Mechanism to take account of these transactions, all Shareholders in the Sub-Fund would pay the associated costs of buying and selling these underlying investments. These transaction costs can include, but are not limited to, bid-offer spreads, brokerage and taxes on transactions.

Anti-Dilution Levy

Until Anti-Dilution Mechanism's threshold rate is triggered, no Anti-Dilution Levy or Pricing Adjustment is applied and the transaction costs will be borne by the Sub-Fund. This will result in a dilution (reduction in the Net Asset Value per Share) to existing Shareholders. Investors should note that sub-distributors may levy the sales charge (if any) on an investor's full subscription and may not take into account the application of an Anti-Dilution Levy. For the avoidance of doubt, it is clarified that fees other than the sales charge will continue to be calculated on the basis of the unadjusted Net Asset Value for Pricing Adjustment.

There is an adjustment of the Net Asset Value per Share only when a Pricing Adjustment is applied. When Anti-Dilution Levy is applied, in the case of net capital inflows, the Anti-Dilution Levy will be deducted from each subscription amount and accordingly reduce the number of Shares received by an investor or, in the case of net capital outflows, will be deducted from each redemption amount and accordingly reduce the redemption proceeds received by an investor. The amount of the Anti-Dilution Levy be up to a maximum of 2% and may be reduced or waived at the discretion of the Board of Directors. In the case of Pricing Adjustment, the adjustment will not exceed 2%. However, it may be significantly higher during exceptional market conditions such as periods of high volatility, reduced asset liquidity and market stress.

Detail of each Mechanism are specified in the latest Company's offering document from page 46 to page 48.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

14. Anti-Dilution Mechanisms (continued)

Pricing Adjustment

Partial Swing Pricing Adjustment has been applied by the Company during the year.

No Full Swing Pricing Adjustment has been applied during the year on eligible Sub-Fund Corporate Euro Bond Fixed Term 2027.

Details of which Anti-Dilution Mechanism is applicable on a particular Sub-Fund can be obtained from the Management Company. Should the Company decide to change the Anti-Dilution Mechanism in operation for a particular sub-fund (i.e. from a Pricing Adjustment to Anti-Dilution Levy or vice versa), prior approval will be sought from relevant regulators (where required) and affected investors will receive at least one month's prior written notification.

The table below discloses the Net Asset Value per Share in each Sub-Fund's reference currency before Pricing Adjustment (the "Unswung NAV per share") and the Net Asset Value per Share in each Sub-Fund's reference currency Pricing Adjustment (the "Swung NAV per share") for Sub-Funds which have been impacted by Pricing Adjustment on 30 June 2023.

A list of the sub-funds that have applied the mechanism of pricing adjustment (whether the NAV has swung or not) during the financial year is available at <https://www.assetmanagement.hsbc.co.uk/en/intermediary/fund-centre>.

The table below discloses the Net Asset Value per Share in each sub-fund's reference currency before pricing adjustment (the "Unswung NAV per share") and the Net Asset Value per Share in each sub-fund's reference currency pricing adjustment (the "Swung NAV per share") for sub-funds which have been impacted by pricing adjustment on 31 March 2024.

15. Total expense ratio

The Total Expense Ratio ("TER") has been computed by the Administrator as required per the AMAS (Asset Management Association Switzerland) guidelines on the calculation and disclosure of the TER of collective investment schemes. The actual expenses incurred during the period are annualised and calculated as a percentage of the average Assets Under Management of the share class for the period. The TER also includes the percentage corresponding to passive hedging fees.

Synthetic TER is applicable for each sub-fund that invests at least 10% of its net assets as a fund of funds in other collective investment schemes (target funds) which publish a TER within the meaning of the present guidelines. A composite (synthetic) TER of the fund of funds is to be calculated by the administrator, as of the closing date of the financial period or the end of the financial period.

16. Liquidation of sub-funds

The following sub-funds have been closed during the period or during previous periods. As at 31 March 2024, the following cash positions are still held by the "Depository Bank" of the following liquidated sub-funds:

	China Consumer Opportunities (closed as at 25 May 2021) USD	China Multi-Asset Income (closed as at 26 October 2020) USD	Economic Scale GEM Equity (closed as at 22 October 2020) USD	Economic Scale Global Equity (closed as at 15 April 2021) USD

***Closed as at 29 December 2023. This asset has been instructed to be fully redeemed, however, interest linked were not yet redeemed by the counterparty as at 31 March 2024 but only in May 2024. The remaining quantity is amounting to 0.54 shares.

****Closed as at 25 March 2019. This asset has not been sold due to constrain and restriction on the market not allowing the transaction. The sub-fund referred to is distinct from the existing sub-fund named "ASEAN Equity" as presented in the Statement of Net Assets.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

17. Significant Events

Russia's invasion of Ukraine

Russia's invasion of Ukraine has had, and could continue to have, severe adverse effects on regional and global economic markets for securities and commodities. Following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia including, among other actions:

- a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs;
- the removal by certain countries and the European Union of selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and.
- restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions.

The current events, including sanctions and the potential for future sanctions, which include (but not limited to) those impacting Russia's energy sector, and other actions, and Russia's retaliatory responses to those sanctions and actions, could continue to have, an adverse effect on global markets performance and liquidity, thereby negatively affecting the value of the sub-funds' investments beyond any direct exposure to Russian issuers. They also give rise to material uncertainty and risk with respect to markets globally and the performance of the sub-funds and their investments or operations could be negatively impacted. Investors should be aware that the duration of the ongoing hostilities and the vast array of sanctions and related events cannot be predicted.

Impact of Ukraine/Russia crisis

The Board of Directors decided to suspend the HGIF Russia Equity sub-fund on 1 March 2022 until further notice. The situation continues to be monitored by the Board of Directors in conjunction with the Management Company. Any subsequent decision that changes this status will be communicated to the investors as and when required.

Since 2 March 2022, all RUB denominated Russian Government Bonds and any associated coupons held in HGIF Global Emerging Markets Local Debt, HGIF Global Emerging Markets ESG Local Debt and HGIF Global Emerging Market Multi-Asset Income have been written down to 0.

From 3 March 2022, all Russian equities held in HGIF Global Emerging Markets Multi-Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity have been marked down by 90%. For ADR/GDR, if the market price dropped by more than 90%, the stock was valued using the latest market price. From 10 March 2022, all RUB denominated Russian equities held in HGIF Global Emerging Markets Multi-Asset Income, HGIF Global Equity Volatility Focused, HGIF BRIC Markets Equity and HGIF BRIC Equity, have been written down to 0.

The security Yandex denominated in USD and listed on the US stock exchange has been priced at 0 since 11 March 2022. This security is held in HGIF BRIC Markets Equity and HGIF BRIC Equity. The securities of Sberbank PJSC ADR, Rosneft IIGDR, and Severstal PJSC GDR have been priced at 0 since 2 June 2022. These securities are held in HSBC GIF Russia Equity and HSBC GIF BRIC Markets Equity.

The securities of Gazprom PJSC ADR, Lukoil PJSC, and Novatek PJSC GDR have been priced at 0 since 1 July 2022. These securities are held in HSBC GIF Russia Equity.

Due to further sanctions, Magnit PJSC GDR was also written down to 0 since 7 December, 2022. This security is held in HGIF Global Equity Volatility Focused

Last, due to further sanctions, the following securities held in HGIF Russia Equity were fair valued to 0: MMC Norilsk Nickel PJSC ADR(V0.1 Ord), Novolipetsk Steel PJSC GDR(V10 Ord) Reg S, TCS Group Holding PLC USD0.01 GDR (V1 Ord), Tatneft Sponsored ADR(V6 Ord) and X5 Retail Group NV GDR V.25

Changes in the Board of Directors

Mr. John Li resigned from the Board of Directors effective 30 September 2023 and Mr. Timothy Palmer was appointed (by co-optation of the Board) with effect 2 October 2023.

Mr. Jean de Courrèges resigned from the Board of Directors effective 31 March 2024.

Notes to the Financial Statements

for the year ended 31 March 2024 (continued)

18. Subsequent Events

Mrs. Carine Feipel has been appointed on 2 April 2024 as Independent Director by co-optation of the board.

Brazil Bond has been closed as at 15 May 2024.

Appendix I (Unaudited Additional Disclosures) – Taxation of the Company (foreign countries)

The following summary is based on the Company's understanding of the law and practice currently in force in the other jurisdictions and is subject to changes therein.

Belgium

The Belgian government has enacted a law which charges an annual Net Asset Value tax on foreign investment funds registered with the FSMA (Financial Services and Markets Authority). An annual tax of 0.0925% is charged on the net outstanding amounts of sub-funds placed in Belgium through Belgian financial intermediaries on 31 December of the preceding year.

To date as the amounts are small, the Management Company has paid this tax cost on behalf of the Company out of the Operating, Administrative and Servicing Expenses it receives. However, should the cost become substantial or long term, the Management Company may require the sub-funds concerned to bear that tax charge for future periods.

China

Where the Company invests in shares and securities issued by companies tax resident (or with their primary activity) in the People's Republic of China ("PRC"), securities issued by government agencies in the PRC or other permissible PRC investments, the Company may be subject to Corporate Income Tax ("CIT") withholding and other taxes imposed in the PRC. Pursuant to circular Caishui [2014] No.79, capital gain realized after 17 November 2014 by QFII/RQFII from transfer of equity investment assets is temporarily exempt from PRC Corporate Income Tax ("CIT"). Pursuant to Guoshuifa [2009] 47, dividends, coupon or interest received by QFII is subject to 10% CIT withholding. The same practice applied to RQFII then. On 30 August 2018, MOF and SAT jointly issued Caishui [2018] 108 which provided temporary 3 year CIT exemption on coupon income received by Overseas Institutional Investors in China bond market from 7 November 2018 to 6 November 2021. Pursuant to circular Caishui [2014] No.81 and Caishui [2016] No.127, Hong Kong investors realized capital gain through the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect from A shares trading is temporarily exempt from CIT withholding. Dividends income received by Hong Kong investors currently is subject to 10% CIT withholding by the issuer. However the treaty relief may be applied if applicable. The seller of A shares and transferor of A shares by way of succession or gift should pay Stamp Duty at 0.1% of the consideration/value. The Stamp Duty is deducted by the Stock Exchange from the Settlement Amount. Hong Kong market investors are temporarily exempt from stamp duty on stock borrowing and returning from covered short selling of stocks through Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect.

On 23 March 2016, the Ministry of Finance and SAT jointly issued a notice Caishui [2016] No.36 which provides the detail implementation guidance on the further rollout of the Value-Added Tax ("VAT") reform. From 1 May 2016 VAT has replaced PRC Business Tax ("BT") to cover all sectors that used to fall under the PRC BT. Under Notice No.36, capital gain realized by QFII from securities trading through entrusted onshore company within China and capital gain realized by Hong Kong investors through the Shanghai-Hong Kong Stock Connect from A shares trading are exempt from PRC VAT. Circular Caishui [2016] No. 127 provides VAT exemption on capital gain realized by Hong Kong investors through the Shenzhen-Hong Kong Stock connect from A shares trading.

On 30 June 2016, the Ministry of Finance and State Administration for Taxation ("SAT") jointly issued a supplementary circular Caishui [2016] No.70, which provides Value-Added Tax ("VAT") exemption for capital gain realized by RQFII from securities trading through entrusted onshore company in China and capital gain realized by overseas institutions approved by the People's Bank of China to make investment into the interbank local currency market.

On 30 August 2018, MOF and SAT jointly issued Caishui [2018] 108 which provided temporary 3 year VAT exemption on coupon income received by Overseas Institutional Investors in China bond market from 7 November 2018 to 6 November 2021.

Appendix I (Unaudited Additional Disclosures) – Taxation of the Company (foreign countries) (continued)

Germany

The sub-funds listed below will seek to continuously invest a minimum percentage of their net assets in equity assets as defined in sec. 2 para 8 German Investment Tax Act 2018:

% of Sub-fund's Net Assets	Sub-funds
More than 50%	All Equity Sub-Funds other than Russia Equity Managed Solutions – Asia Focused Growth
At least 25%	Russia Equity Managed Solutions – Asia Focused Income

Hong Kong

The Company may be subject to Hong Kong profits tax in relation to a particular sub-fund if it is treated as carrying on a trade or business in Hong Kong either on its own account or through the agency of the investment adviser of that sub-fund. If the Company is treated as carrying on business in Hong Kong, a liability to profits tax, the rate of which is currently 16.5%, shall only exist in respect of any profits of the relevant sub-funds which arise in or are derived from Hong Kong from that trade or business, and which are not capital in nature.

Under Hong Kong tax law and practice, funds resident outside Hong Kong ("Offshore Funds") are exempted from Hong Kong profits tax providing certain conditions are met. It is intended that affairs of the Company shall be conducted as far as possible to comply with the conditions for exemption from profits tax. However, the Company can offer no warranty that such exemption will be obtained in every instance.

India

Indian General Anti-Avoidance Rules ("GAAR") is effective from 1 April 2017. The GAAR gives considerable discretion to the tax authorities and may be used to seek to deny treaty benefits to foreign investors. Such actions could result in a significant financial cost for investors, as capital gains even if not liable to tax under a tax treaty could become taxable in India. The GAAR is a new piece of legislation and therefore there is little guidance in terms of best practice over its application.

Post amendment effective from 1 April 2018, applicable capital gains tax rate to Foreign Portfolio Investors (FPIs) are as follows:

- Listed equity shares (sale transaction through stock exchange on which securities transaction tax has been paid):
 - Long term capital gains (asset held for more than 12 months prior to sale) - 10%
 - Short term capital gains (asset held for 12 months or less prior to sale) - 15%
- Other than equity shares:
 - Long term capital gains (asset held for more than 36 months prior to sale) - 10%
 - Short term capital gains (asset held for 36 months or less prior to sale) - 30%

The above tax rates are subject to applicable surcharge and cess.

Interest income arising from Indian securities are subject to income tax at the rate of 20% on gross interest (plus applicable surcharge and education cess). Interest income earned during the period 1 July 2017 to 30 June 2023 by FPI on specified securities (government bonds and Rupee denominated bonds of an Indian company) is liable to a concessional tax rate of 5% (plus applicable surcharge and education cess). Further, the 5% (plus applicable surcharge and education cess) concessional tax rate has also been extended to interest income earned during period 1 April 2020 to 30 June 2023 on Municipal debt securities.

With effect from 1 April 2020, dividend income earned by FPIs from an Indian domestic company is liable to tax at the rate of 20% (plus applicable surcharge and education cess)

The above tax rates are under domestic tax law and are subject to beneficial rates, if any, available under a double taxation treaty.

Appendix I (Unaudited Additional Disclosures) – Taxation of the Company (foreign countries) (continued)

United Kingdom

It is the intention of the Board of Directors to conduct the affairs of the Company so that it does not become resident in the United Kingdom. On the basis that the Company is not resident in the United Kingdom for tax purposes it should not be subject to United Kingdom corporation tax on its income and capital gains.

France

Currently applies to Euroland Value, Euroland Equity Smaller Companies and Euroland Growth.

“Plan d’Epargne en Actions”.

In order for a sub-fund to claim eligibility to the French “*Plan d’Epargne en Actions*” and as long as they are registered with the *Autorité des Marchés Financiers* in France, the following additional investment restriction applies:

The total amount invested in equity or equity equivalent securities (as defined by art. L-221-31 of the French Monetary and Financial Code, § I-1°, a), b) and c)), which have their registered office in a country member of:

- the EU; or
- the European Economic Area (provided that the said country has concluded with France a bilateral tax cooperation agreement with a clause of administrative assistance aiming at fighting against tax fraud or evasion).

must not be less than 75% of the total assets of the relevant sub-fund at any point of time.

The definition given by art. L- 221-31 of the French Monetary and Financial Code, § I-1°, a), b) and c), excludes equities or equity equivalent securities issued by corporates which are not subject to corporate tax at the normal rate applying in their home country, and which in particular excludes shares of listed real estate corporates (“SIIC” - “sociétés d’investissements immobiliers cotées”).

The following sub-funds are eligible as from 1 April 2007:

	% of holdings in shares
Euroland Equity Smaller Companies	96.42
Euroland Growth	97.27
Euroland Value	95.64

Article 150-0D of the tax General Regulation.

In order for a sub-fund to claim under Article 150-0D 1ter of the Tax General Regulation, the total amount invested in equity or equity equivalent securities must not be less than 75% of the total assets of the relevant sub-fund at any point of time.

The following sub-funds are eligible as from 1 April 2007:

	% of holdings in shares
Euroland Equity Smaller Companies	96.87
Euroland Value	98.06
Europe Value	98.50

Appendix II (Unaudited Additional Disclosures) – UK SORP Disclosure

Investment Risk

Information in relation to certain investment risks are disclosed for selected sub-funds as follows:

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as market prices, foreign exchange rates and interest rates. It comprises of three major types of risks i.e. currency risk, interest rate risk and other price risk.

As invested in equities and fixed income securities, the Fund is exposed to the risk that the equity and fixed income markets decline. This risk is monitored in absolute by the equity exposure and relative to the benchmark by the calculation of the ex-ante tracking-error.

(i) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in foreign exchange rates.

The below table summarises the following sub-funds' exposure to currency risks.

Sub-fund	Currency	Net currency exposure in sub-fund currency
China A-shares Equity	CNY	23,597,253

Credit risk arising on bonds is mitigated by investing in government bonds where the credit risk is minimal, or corporate bonds which are rated at least investment grade. The sub-funds also invests in high yield and emerging market bonds which are non-investment grade. The sub-fund manages the associated credit risk by requesting the investment manager to diversify the portfolio to minimise the impact of default by any one issuer.

¹ Until 2 July 2023, the sub-fund was named Global Short Duration High Yield Bond.

Appendix II (Unaudited Additional Disclosures) – UK SORP Disclosure (continued)

Investment Risk (continued)

Market risk (continued)

(iv) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

Other price risk arises principally in relation to the sub-fund's return seeking portfolio which includes shares, depositary receipts, warrants/equity linked securities, preferred shares and collective investment scheme.

The sub-fund manages this exposure to other price risk by constructing a diverse portfolio of investments across various markets.

At the year end, the sub-fund's exposure to investments subject to other price risk was:

Fair value hierarchy

The fair value of financial instruments has been determined using the following fair value hierarchy:

Category (a) The quoted price for an identical asset in an active market.

Category (b) When quoted prices are unavailable, the price of a recent transaction for an identical asset adjusted if necessary.

Category (c) Where a quoted price is not available and recent transactions of an identical asset on their own are not a good estimate of fair value, the fair value is determined by using a valuation technique which uses:

- c(i) observable market data; or
- c(ii) non-observable data.

The sub-fund's investment assets and liabilities have been fair valued using the above hierarchy categories as follows:

Sub-fund	Currency	Category (a)	Category (b)	Category c(i)	Category c(ii)	Total
Asia ESG Bond	USD	25,754,589	74,113	-	-	25,828,702

Appendix III (Unaudited Additional Disclosures) – Dealing Days of the Fund

Dealing for Shares in the Company will take place on any Business Day (other than days during a period of suspension of dealing in Shares) and which is also for each sub-fund, a day where stock exchanges and regulated markets in countries where the sub-fund is materially invested are open for normal trading.

The Business Days which are not Dealing Days will be listed in the annual report and semi-annual reports and available at the registered office of the Company. Any amendments to such lists are also available at the registered office of the Company.

Shareholders who deal through the Company's local distributor or representative should note that there will be no dealing for the Shares of the Company in the jurisdiction in which such distributor or representative operates on a day which is not a Business Day in such jurisdiction. Shareholders in such jurisdictions can however deal via the Transfer Agent in Luxembourg.

The Company will determine the dealing/non-dealing calendar according to the latest market information obtained by the Company from time to time. Shareholders can obtain the latest dealing/non-dealing calendar of the Company from the registered office of the Company or from the Company's local distributor or representative.

HSBC Investment Funds (Hong Kong) Limited has been appointed by the Company as its Representative and Share Distributor in Hong Kong. There shall be no dealing for the shares of the Company in Hong Kong on a day which is a public or bank holiday in Hong Kong.

Appendix IV (Unaudited Additional Disclosures) – Fund Holiday Calendar for 2024

NOTE: THIS CALENDAR IS INDICATIVE AS DATES IN SOME COUNTRIES ARE SUBJECT TO CHANGE.

All HGIF sub-funds will have no NAV calculated on the following days:

- all Saturdays and Sundays

In addition, the following sub-funds will have no NAV calculated on the following dates:

² Until 2 July 2023, the sub-fund was named Global Short Duration High Yield Bond.

* Other – dates on which other individual markets, which when amalgamated represent a material portion of the fund's underlying exposure, are closed.

** The NYSE and Nasdaq are open on Columbus Day (14th October) and Veteran's Day (11th November) therefore equity sub-funds listing the US as a material market will not have a holiday on these dates. Bond markets will be closed to trading on these dates and bond sub-funds listing the US as a material market will be closed.

*** NAV is calculated weekly on Monday (or on the immediately following business day if the relevant Monday is not a business day).

**** Dealing and Net Asset Value calculation of Russia Equity sub-fund has been suspended since 25 February 2022 following the closure of Moscow stock exchange.

Appendix V (Unaudited Additional Disclosures) – Investment Advisers (continued)

Appendix VI (Additional Disclosures) – Risk Management

General

HSBC Investment Funds (Luxembourg) S.A. (the “Management Company”) uses a risk management process that monitors the risk of the portfolio positions and their share of the overall risk profile of the portfolios on the managed funds at any time. In accordance with the Law of 17 December 2010 and the applicable regulatory requirements of the Commission de Surveillance du Secteur Financier (“CSSF”), the Management Company reports to the CSSF on a regular basis on the risk management process. The Management Company assures on the basis of appropriate and reasonable methods that the overall risk associated with derivatives does not exceed the Net Asset Value of the portfolio. The Management Company uses the following methods:

Commitment Approach

The “Commitment Approach” is based on the positions of Financial Derivative Instruments (“FDI”) converted into their corresponding underlying equivalents using the delta approach. Netting and hedging might be considered for FDI and their underlying assets provided that the approach complies with the regulations. The sum of these underlying equivalents must not exceed the Net Asset Value of the Fund.

Value-at-Risk (“VaR”) is a mathematical approach used to estimate the potential loss of a portfolio over a specified holding period within a given confidence level. VaR can be calculated on either an absolute or a relative basis.

Absolute VaR approach

In the absolute VaR approach the VaR (99% confidence level, 20-day holding period) of the Fund cannot exceed 20% of the Fund net assets.

Relative VaR approach

Relative VaR is calculated in relation to a suitable benchmark or reference portfolio. Using this approach, the relative VaR cannot exceed the VaR of a reference portfolio by more than a maximum of twice (200%). The reference portfolio is a matching portfolio in comparison to the Fund's investment policy.

The UK and India GSC Risk Teams of HSBC Asset Management Limited are responsible for setting up, maintaining and running the APT risk model, and ensuring that appropriate analysis and reports are available for the local risk teams to consume. The local risk teams (AMUS, AMFR, AMHK and UK Risk Team) are responsible for reviewing and validating the results, applying Management Action Trigger levels (“MATs”), following up with fund managers, and reporting as required to the Management Company.

The calculation of the VaR is done accordingly to the following calculation standards and in line with the standards defined in ESMA guidelines 10/788 Box 15 and CSSF CR 11/512:

- a) Confidence interval: 99%
- b) Simulation horizon: 4 weeks.
- c) Model estimation window of 180 weeks (3.5 years) used to calibrate the correlation structure of the model.
- d) Daily VaR calculation with daily data sets updates

Currently the risk team use the APT Parametric VaR approach. Since 1st January 2023, the Monte-Carlo VaR model is used for the monitoring of Multi-Asset Style Factors sub-fund.

The VaR utilization (lowest, highest and average) of the sub-fund is calculated by dividing the realized (lower, highest and average during the period) daily VaR by the VaR Regulatory limit (20% for the Absolute VaR and 200% for the Relative VaR sub-funds).

Leverage

For sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company has delegated the leverage monitoring to the respective sub-funds' Investment Advisers who determine the sum of the notional values of all the relevant FDI and estimate in this regard a degree of the expected average value (leverage). This level of leverage can, depending on the respective market conditions, derive from the actual value at the reporting date. Furthermore, the published expected/ level of leverage is explicitly not understood as an investment limit.

For the sub-funds using the Value at Risk method, the leverage has been calculated using the sum of notionals for the entire period.

Sub-fund	Starting Period	Ending Period	Leverage Methodology	Expected Level of Leverage	Realised Average Level of Leverage
1) Bond Sub-funds					
Brazil Bond	01/04/2023	31/03/2024	Sum of Notionals	50.00%	4.39%

Appendix VII (Unaudited Additional Disclosures) – Securities Financing Transactions Regulation (“SFTR”)

Securities Financing Transactions Regulation (“SFTR”) introduces reporting requirements for Securities Lending and Total Return Swaps.

A Securities Financing Transactions (SFT) is defined as per Article 3 of Regulation (EU) 2015/2365(11) of the SFTR as:

- a repurchase/reverse repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transactions or sell-buy back transactions;
- a margin lending transaction.

During the period ending as at 31 March 2024, several sub-funds have engaged in Securities Lending transactions and one sub-fund has invested into Total Return Swap contract under the scope of the SFT.

Global Data

Amount of assets engaged in Securities Lending transactions.

The amount of assets engaged in Securities Lending, including their proportion to the sub-fund Total Net Assets and total lendable assets* are as follow:

Sub-funds	Currency	Type of Asset	Market Value of Securities Lent (in		
			Sub-Funds Currency)	% of Total Net Assets	% of Total Lendable Assets
Asia ex Japan Equity	USD	Securities Lending	6,462,281	2.10%	2.12%

Article 8 framework

To have qualified as an SFDR Article 8 sub-fund, each sub-fund had to promote one or more social or environmental characteristics. HSBC Asset Management’s position is that the vast majority of assets should exhibit strong and improving characteristics. In addition, as a Sustainability Indicator, all Article 8 sub-funds have actively considered all mandatory Principle Adverse Impacts (PAIs) in their investment decision making process and actively take into consideration all relevant PAIs.

Article 9 framework

To have qualified as an SFDR Article 9 sub-fund, each sub-fund had specifically sustainable goals or a reduction in carbon emissions as their objective. HSBC Asset Management’s position is that the vast majority of assets should exhibit strong and improving characteristics. In addition, an Article 9 sub-fund is required to assess the sub-fund’s portfolio against the principle of “do no significant harm” by considering the PAIs, and incorporating considerations of the minimum social safeguards specified in the Taxonomy Regulation (Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment).

Appendix IX (Unaudited Additional Disclosures) – Sustainable Finance Disclosure Regulation (“SFDR”) (continued)

Consideration of company’s ESG credentials

The sub-funds included the identification and analysis of a company’s ESG credentials (“ESG Credentials”) as an integral part of the investment decision-making process to reduce risk and enhance returns.

ESG Credentials have included, but were not limited to:

- ▶ Environmental and social factors including, but not limited to, physical risks of climate change and human capital management that may have had a material impact on a security issuer’s financial performance and valuation.
- ▶ Corporate governance practices that protected minority-investor interests and promoted long-term sustainable value creation.

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. The inclusion of a company in the sub-fund’s investment universe was at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may have been included when their credentials were still limited.

Excluded Activities

ESG Credentials are proprietary to HSBC, subject to ongoing research and may change over time as new criteria are identified. Notwithstanding the Excluded Activities as detailed below, the inclusion of an issuer in a SFDR Article 8 sub-fund investment universe is at the discretion of the Investment Adviser. Issuers with improving ESG Credentials may be included when their credentials are still limited. Similarly, when issuers have deteriorating ESG Credentials, HSBC could include them in the exclusion lists and dispose of the assets.

SFDR Article 8 sub-funds will not invest in securities issued by issuers with specified involvement in specific excluded activities (“Excluded Activities”). Excluded Activities and specified involvement are proprietary to HSBC and include, but are not limited to

- ▶ Companies involved in the production of controversial weapons or their key components. Controversial weapons include, but are not limited to, anti-personnel mines, depleted uranium weapons and white phosphorous when used for military purposes. This exclusion is in addition to HSBC Asset Management’s banned weapons policy.
- ▶ Companies involved in the production of tobacco.
- ▶ Companies with more than 10% revenue generated from thermal coal extraction and do not have a clearly defined and credible plan to reduce exposure to below 10%.
- ▶ Companies with more than 10% revenue generated from coal-fired power generation and do not have a clearly defined and credible plan to reduce exposure to below 10%.

HSBC Asset Management generally conduct enhanced due diligence on companies that were considered to be non-compliant with the UN Global Compact Principles, or were considered to be high risk as determined by the HSBC’s proprietary ESG ratings. Therefore, none of the above sub-funds intentionally invest in companies that made serious violations of the UN Global Compact Principles as determined by HSBC’s assessment of proven breaches. If determined to have made serious violations post purchase, these issuers were subsequently exited.

ESG Credentials, Excluded Activities and the need for enhanced due diligence was identified and analysed by using, but not exclusively, HSBCs proprietary ESG Materiality Framework and ratings, fundamental qualitative research and corporate engagement. The Investment Advisers also relied on expertise, research and information provided by financial and non-financial data providers.

Certain individual sub-funds had additional exclusions, which are detailed in the Prospectus, which can be found at www.assetmanagement.hsbc.com.

Appendix IX (Unaudited Additional Disclosures) – Sustainable Finance Disclosure Regulation (“SFDR”) (continued)

Taxonomy

The Taxonomy Regulation was established to provide an EU-wide classification system which provides investors and investee companies with a common language to identify whether certain economic activities could be considered environmentally sustainable.

The Taxonomy Regulation introduces additional disclosure requirements in respect of Article 8 and Article 9 SFDR sub-funds. For Article 6 SFDR sub-funds, the investments underlying these sub-funds do not take into account the EU criteria for environmentally sustainable economic activities. However, as disclosed above in the section “Integration of sustainability risks into investment decisions”, the Investment Advisers integrate sustainability risk considerations into the management of these sub-funds.

Under the Taxonomy Regulation, an economic activity was considered to be environmentally sustainable where it:

- ▶ contributed substantially to one or more defined environmental objectives;
- ▶ did not significantly harm any of the environmental objectives;
- ▶ complied with certain minimum social safeguards; and
- ▶ complied with specified performance thresholds known as technical screening criteria.

For points 1 and 2 above, the Taxonomy Regulation defines six environmental objectives:

- ▶ climate change mitigation;
- ▶ climate change adaptation;
- ▶ sustainable use and protection of water and marine resources;
- ▶ transition to a circular economy;
- ▶ pollution prevention and control; and
- ▶ protection and restoration of biodiversity and ecosystems.

Any information on the alignment of the Sub-Fund with these environmental objectives is set out in the appendix of the latest prospectus dated as at January 2024.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASIA ESG BOND

Legal Entity Identifier: 213800LS9Z4S1Z1SZ562

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.23% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark was used to measure the sub-fund's carbon intensity and ESG rating, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	6.27	5.56
E Pillar	6.24	5.68
S Pillar	5.30	5.33
G Pillar	5.41	5.31
1. GHG Emissions - Metric tons CO2 equivalents	463.36	14,880,900.00
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	13.98	38.51
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	80.20	233.09
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.42%	1.29%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	1.24%	2.02%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - J.P. Morgan ESG Asia Credit Index

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	6.27	5.56

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	1.24%	2.02%
	31 March 2023	0.00%	0.17%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction and made an improvement of the overall ESG score, relative to the benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of the investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Bangkok Bank Plc (hong Kong Branch) 9.025% 15-mar-2029	Financials	1.94%	Thailand

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

35.23% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	35.05%
Other	17.65%
Government	10.96%
Real Estate	7.46%
Industrials	5.73%
Utilities	5.70%
<i>Electric Utilities</i>	0.16%
<i>Gas</i>	0.81%
<i>Independent Power Producers & Energy Traders</i>	1.58%
Communication Services	5.54%
Consumer Discretionary	4.49%
Information Technology	3.33%
Energy	1.74%
<i>Oil & Gas Equipment & Services</i>	0.79%
<i>Oil & Gas Exploration & Production</i>	0.72%
<i>Oil & Gas Refining & Marketing</i>	0.23%
Consumer Staples	1.33%
Materials	0.79%
Cash & Derivatives	0.24%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 35.23%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

ESG analysis was embedded in the fundamental analysis of the bonds the sub-fund invested and therefore contributed to all trading decisions. Trades reflected a balanced integration of financial and non-financial criteria. The sub-fund continued to favour ESG friendly sectors including Indian renewable sector and also the financial sector in selective countries with solid fundamentals and sound ESG scores and governance practice. During the reporting period, the sub-fund continued generating an ESG score higher than the benchmark (>10%) and a lower carbon intensity compared to benchmark (more than 20% lower). The sub-fund invested in labelled bonds including green bonds, sustainable bonds etc to attain the sustainable investment objectives.

In addition, where material ESG risks or a potential breach of one or more of the 10 UN Global Compact principles was identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EURO BOND

Legal Entity Identifier: QCWW2LDBI4BRGCNZ8497

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.98% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs), indicated in the table below by their preceding number can be identified alongside the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.43	6.79
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	99.29	79.89
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.09%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.03%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	271.08	282.09

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg Euro Aggregate

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.43	6.79
	31 March 2023	7.36	6.66
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	99.29	79.89
	31 March 2023	104.49	101.71
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.09%
	31 March 2023	0.00%	0.12%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.03%
	31 March 2023	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2024	271.08	282.09
	31 March 2023	136.90	150.89

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process to reduce sustainability risks and enhance returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas intensity for sovereign issues
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Government Of Italy 2.8% 01-dec-2028	Government	5.43%	Italy
Government Of France 4.75% 25-apr-2035	Government	4.87%	France
Government Of Belgium 1.9% 22-jun-2038	Government	3.03%	Belgium
Government Of Belgium 2.6% 22-jun-2024	Government	2.79%	Belgium
Axa Home Loan Sfh 0.01% 16-oct-2029	Financials	2.32%	France
Government Of Luxembourg 0.0% 28-apr-2030	Government	2.18%	Luxembourg
Kfw 0.01% 05-may-2027	Government	2.03%	Germany
European Investment Bank 0.125% 15-apr-2025	Government	1.96%	SUPRANATIONAL
Government Of Italy 5.0% 01-sep-2040	Government	1.90%	Italy
Government Of Italy 6.0% 01-may-2031	Government	1.84%	Italy
Government Of The Netherlands 4.0% 15-jan-2037	Government	1.81%	Netherlands

Government Of Italy 1.35% 01-apr-2030	Government	1.62%	Italy
European Union 0.125% 10-jun-2035	Government	1.60%	SUPRANATIONAL

Cash and derivatives were excluded

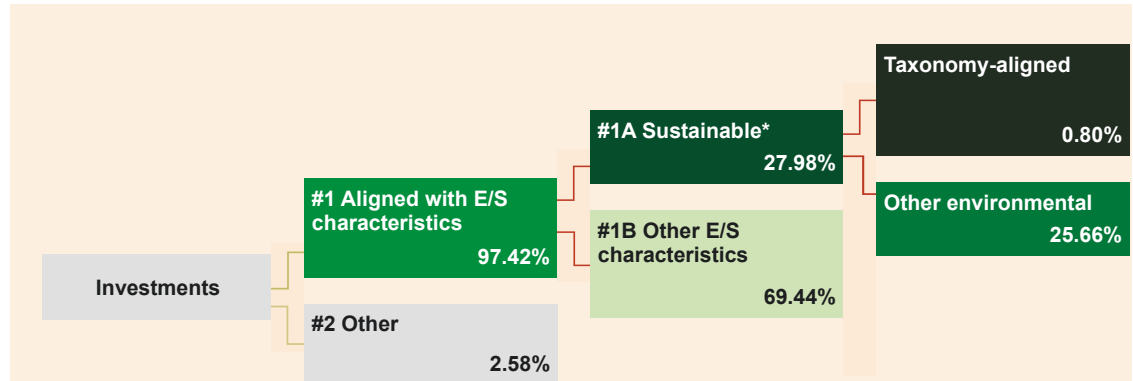

What was the proportion of sustainability-related investments?

27.98% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Government	57.14%
Financials	18.61%
Utilities	7.29%
<i>Electric Utilities</i>	4.68%
<i>Multi-Utilities</i>	2.61%
Other	5.97%
Health Care	1.88%
Communication Services	1.75%
Materials	1.50%
Real Estate	1.48%
Energy	1.22%
<i>Integrated Oil & Gas</i>	1.22%
Consumer Staples	1.01%
Consumer Discretionary	0.94%
Industrials	0.81%
Cash & Derivatives	0.40%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

 In fossil gas

 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.11% and the share of investment in enabling activities was 0.46%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.11%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.69%	0.00%
Revenue - Non Taxonomy-aligned	99.20%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.20%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.75%	0.00%
CAPEX - Non Taxonomy-aligned	98.04%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.32%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.10%	0.00%
OPEX - Non Taxonomy-aligned	98.58%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 25.66%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EURO CREDIT BOND

Legal Entity Identifier: 549300R35ZWT4M8NDL73

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32.95% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics::

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) indicated in the table below by their preceding number) can be identified alongside the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but was not designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund.

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.66	7.26
E Pillar	7.68	7.63
S Pillar	5.50	5.16
G Pillar	6.05	5.79
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	83.41	100.61
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.43%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - iBoxx € Corporates

	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Autoroutes Du Sud De La France Sa 3.25% 19-jan-2033	Industrials	1.53%	France

Cash and derivatives were excluded

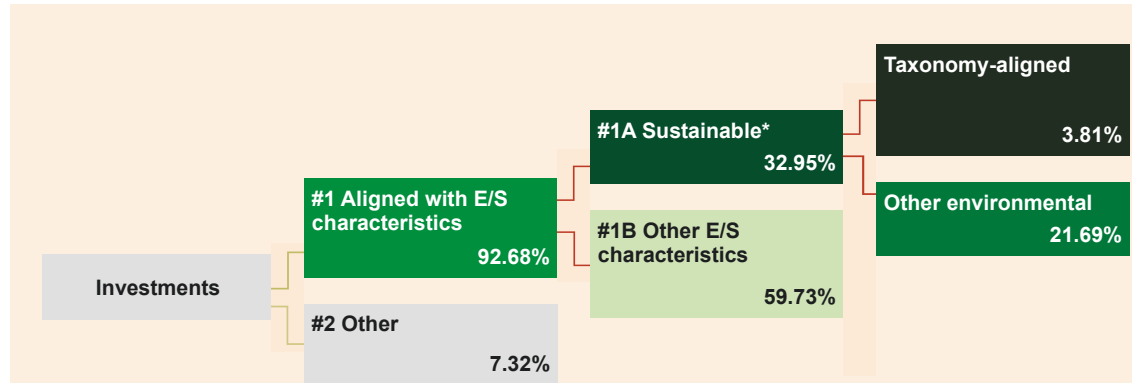

What was the proportion of sustainability-related investments?

32.95% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	33.78%
Other	18.80%
<i>Gas</i>	0.86%
Industrials	10.61%
Utilities	9.74%
<i>Electric Utilities</i>	6.13%
<i>Gas</i>	0.46%
<i>Multi-Utilities</i>	2.16%
Communication Services	6.78%
Government	5.67%
Consumer Staples	4.72%
Consumer Discretionary	3.01%
Cash & Derivatives	2.66%
Health Care	1.09%
Energy	0.92%
<i>Integrated Oil & Gas</i>	0.92%
Real Estate	0.86%
Information Technology	0.75%
Materials	0.60%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

 In fossil gas In nuclear energy

 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.31% and the share of investment in enabling activities was 2.50%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.30%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	3.52%	0.00%
Revenue - Non Taxonomy-aligned	96.19%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.56%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	4.96%	0.00%
CAPEX - Non Taxonomy-aligned	94.49%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.88%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	4.46%	0.00%
OPEX - Non Taxonomy-aligned	94.67%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 21.69%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EURO HIGH YIELD BOND

Legal Entity Identifier: T0V7HE6AJ96APO3LYL24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.97% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs), indicated in the table below by their preceding number can be identified alongside the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All the issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	7.45	6.25
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	134.43	159.88
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.55%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - ICE BofA Euro High Yield BB-B Rated Constrained Index

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.45	6.25
	31 March 2023	7.17	6.00
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	134.43	159.88
	31 March 2023	103.37	228.18
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	1.55%
	31 March 2023	0.00%	3.34%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

- 1.The reduction of greenhouse gas (GHG) emissions and carbon footprint;
- 2.The transition to or use of renewable energy.

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process to reduce sustainability risks and enhance returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The PAIs considered by the sub-fund were:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas of investee companies (Scope 1 & Scope 2)

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Tennet Holding B.v. 5.533% Perp	Utilities	3.15%	Netherlands

Cash and derivatives were excluded

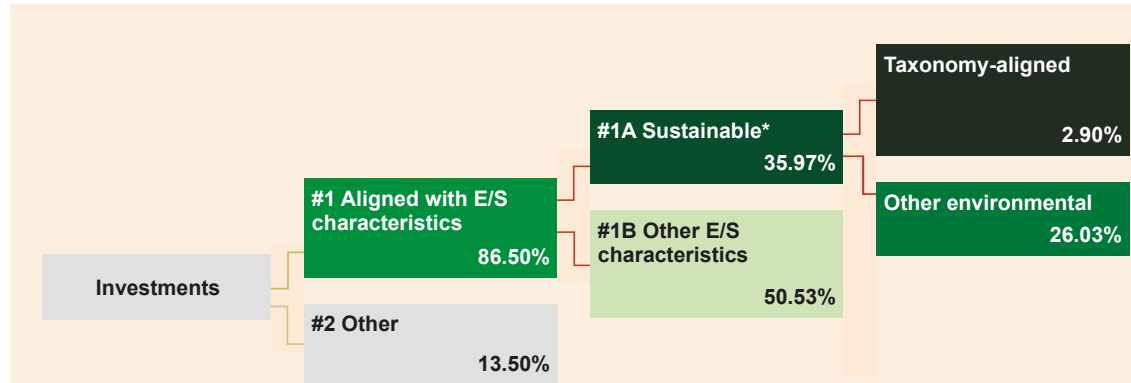

What was the proportion of sustainability-related investments?

35.97% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Other	27.36%
Financials	25.73%
Communication Services	11.47%
Utilities	7.81%
<i>Electric Utilities</i>	4.06%
<i>Multi-Utilities</i>	3.75%
Industrials	7.39%
Materials	6.09%
Consumer Discretionary	5.59%
Real Estate	3.49%
Health Care	2.16%
Government	1.05%
Consumer Staples	0.49%
Cash & Derivatives	0.34%
Information Technology	0.19%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas In nuclear energy
 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.22% and the share of investment in enabling activities was 0.64%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.15%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	2.75%	0.00%
Revenue - Non Taxonomy-aligned	97.10%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.29%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.99%	0.00%
CAPEX - Non Taxonomy-aligned	96.71%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.45%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	3.12%	0.00%
OPEX - Non Taxonomy-aligned	96.43%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 26.03%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC Global Investment Funds - ESG Short Duration Credit Bond

Legal Entity Identifier: 21380015NZ84K2X6J127

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 21.17% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials). Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	7.13	6.08
E Pillar	7.14	6.25
S Pillar	5.22	4.75
G Pillar	6.19	5.89
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	223.04	334.38
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.01%	1.01%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.03%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - 50% ICE BofA 1-5 Year BB US High Yield Index|50% ICE BofA 1-5 Year BBB US Corporate Index

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark

	31 March 2023	7.00	5.84
E Pillar	31 March 2024	7.14	6.25
	31 March 2023	7.43	6.23
S Pillar	31 March 2024	5.22	4.75
	31 March 2023	4.90	4.61
G Pillar	31 March 2024	6.19	5.89
	31 March 2023	6.08	5.78
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	223.04	334.38
	31 March 2023	147.11	358.28
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.01%	1.01%
	31 March 2023	0.00%	1.30%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.03%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts are also considered by the sub-fund are:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance was also taken into account.

As a result of such screens, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Bpce Societe Anonyme 2.045% 19-oct-2027	Financials	3.12%	France
Societe Generale Sa 4.75% 24-nov-2025	Financials	2.71%	France

Cash and derivatives were excluded

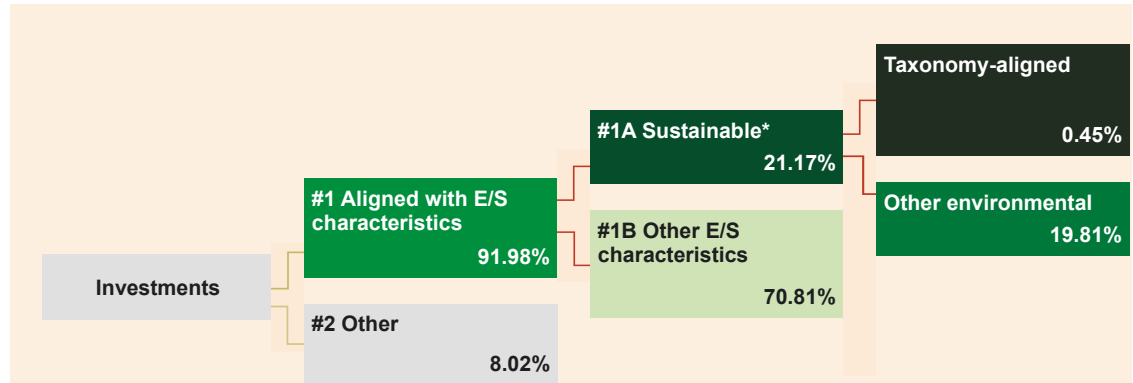

What was the proportion of sustainability-related investments?

21.17% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Other	30.92%
<i>Oil & Gas Exploration & Production</i>	<i>0.81%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.95%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>3.14%</i>
Financials	15.29%
Materials	14.35%
Health Care	6.49%
Consumer Discretionary	5.76%
Industrials	4.79%
Energy	4.69%
<i>Integrated Oil & Gas</i>	<i>0.53%</i>
<i>Oil & Gas Exploration & Production</i>	<i>0.78%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>3.37%</i>
Real Estate	4.46%
Communication Services	4.14%
Utilities	2.87%
<i>Electric Utilities</i>	<i>1.50%</i>
<i>Multi-Utilities</i>	<i>1.36%</i>
Information Technology	2.70%
Consumer Staples	1.80%
Government	1.36%
Cash & Derivatives	0.38%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.03%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.45%	0.00%
Revenue - Non Taxonomy-aligned	99.55%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.11%	0.00%
CAPEX - Non Taxonomy-aligned	99.88%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.37%	0.00%
OPEX - Non Taxonomy-aligned	99.63%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 19.81%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser started with a monthly assessment for screening out at minimum 20% of the investment universe. This universe included screening out excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles. Further, it also included issuers with adjusted MSCI ESG scores below a predefined threshold, as well as pillar E, S, and G scores above company set minimum thresholds. Altogether, at least 20% of the investment universe was excluded, and the sub-fund did not invest in any of such issuers. In addition, any other new issuers not currently in the investment universe also had to adhere to the above conditions.

A portfolio was then constructed. All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

The portfolio also had to adhere to significant improvement targets for ESG score, carbon emission and fossil fuel reserve above the investment universe.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL BOND

Legal Entity Identifier: 2138003JMNNQHPVAFG48

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.81% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified alongside than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	6.22	5.95
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	160.26	171.20
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.35%	0.12%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.01%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	355.93	349.49

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg Global Aggregate

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	6.22	5.95
	31 March 2023	6.20	6.00
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	160.26	171.20
	31 March 2023	190.21	194.75
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.35%	0.12%
	31 March 2023	0.45%	0.54%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.01%
	31 March 2023	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2024	355.93	349.49
	31 March 2023	267.70	257.11

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed for an improvement of the overall ESG score of the portfolio relative to benchmark constituents, through portfolio construction.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The PAIs considered by the sub-fund were:

- Greenhouse gas intensity for investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity for sovereign issues

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC Global Investment Funds SICAV - Global Asset-Backed Crossover Bond -ZQ1- Distribution	Other	4.78%	Luxembourg

Government Of Germany 0.25% 15-feb-2027	Government	1.34%	Germany

Cash and derivatives were excluded

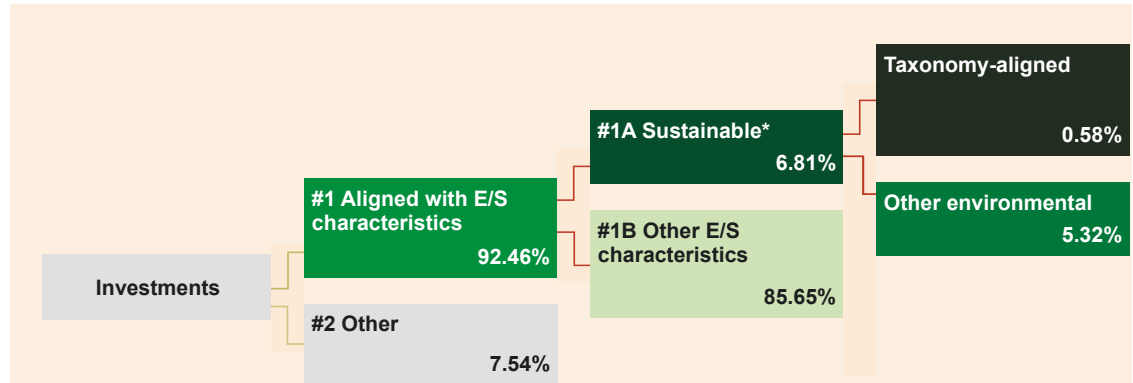

What was the proportion of sustainability-related investments?

6.81% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Government	67.39%
Other	23.88%
<i>Gas</i>	0.14%
<i>Oil & Gas Storage & Transportation</i>	0.05%
Financials	8.38%
Utilities	3.08%
<i>Electric Utilities</i>	1.55%
<i>Gas</i>	0.26%
<i>Multi-Utilities</i>	1.15%

Communication Services	1.76%
Real Estate	0.91%
Consumer Discretionary	0.78%
Materials	0.57%
Health Care	0.34%
Energy	0.33%
<i>Integrated Oil & Gas</i>	0.21%
<i>Oil & Gas Storage & Transportation</i>	0.11%
Information Technology	0.22%
Consumer Staples	0.07%
Cash & Derivatives	-9.90%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.09% and the share of investment in enabling activities was 0.22%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.09%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.48%	0.00%
Revenue - Non Taxonomy-aligned	99.42%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.17%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.77%	0.00%
CAPEX - Non Taxonomy-aligned	99.05%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.27%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.76%	0.00%
OPEX - Non Taxonomy-aligned	98.97%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 5.32%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL BOND TOTAL RETURN

Legal Entity Identifier: 213800AEAJMQQ76VRI57

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.57% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period) the sub-fund promoted the following:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams,
5. where HSBC Asset Management considered it appropriate to do so the sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was managed without reference to any market index weightings. The sub-fund aimed to have done this with a higher ESG rating, calculated as a weighted average of the ESG ratings of the issuers of the sub-fund's investments, versus the weighted average of the ESG ratings of the constituents of each of the sub-fund's asset classes. The sub-fund was actively managed and was not constrained by a benchmark, there was no reference benchmark for the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund
ESG Score	6.87
E Pillar	7.15
S Pillar	5.31
G Pillar	5.93
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	159.15
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.07%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	401.74

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

...and compared to previous periods?

Indicator	Period Ending	sub-fund
ESG Score	31 March 2024	6.87
	31 March 2023	6.84
E Pillar	31 March 2024	7.15
	31 March 2023	0.00
S Pillar	31 March 2024	5.31
	31 March 2023	0.00
G Pillar	31 March 2024	5.93
	31 March 2023	0.00
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	159.15
	31 March 2023	168.41
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.07%
	31 March 2023	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%
	31 March 2023	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2024	401.74
	31 March 2023	272.72

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violations of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity for sovereign issuers

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Government Of The United States Of America 4.25% 28-feb-2029	Government	2.80%	United States of America

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

35.57% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Other	34.94%
<i>Oil & Gas Equipment & Services</i>	<i>0.41%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>0.12%</i>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.33% and the share of investment in enabling activities was 1.04%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023

OPEX - Taxonomy-aligned (no gas and nuclear)	4.28%	0.00%
OPEX - Non Taxonomy-aligned	94.75%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 28.23%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund’s investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL CORPORATE BOND

Legal Entity Identifier: 5493000IOBSL9ETYLK03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 21.97% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) is (indicated in the table below by their preceding number compared to) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on issuer disclosures or estimated by the data vendors in the absence of issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	Fund	Reference Benchmark
ESG Score	7.25	7.19
E Pillar	7.58	7.50

	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC Global Investment Funds SICAV - Global Investment Grade Securitised Credit Bond ZC Capitalisation	Other	2.12%	Luxembourg

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

21.97% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	38.70%

<i>Oil & Gas Exploration & Production</i>	0.21%
<i>Oil & Gas Storage & Transportation</i>	1.32%
Materials	1.12%
Cash & Derivatives	-0.41%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund’s share of investment in transitional activities was 0.03% and the share of investment in enabling activities was 1.52%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.03%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.76%	0.00%
Revenue - Non Taxonomy-aligned	98.21%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.05%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	3.23%	0.00%
CAPEX - Non Taxonomy-aligned	96.72%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.08%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.83%	0.00%
OPEX - Non Taxonomy-aligned	97.08%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 18.99%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in a PAI score lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio

How did this financial product perform compared to the reference benchmark?

Not applicable.

● How does the reference benchmark differ from a broad market index?

Not applicable.

● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.56% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	4.71	4.24
E Pillar	5.39	5.08

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Government Of Uruguay 5.1% 18-jun-2050	Government	2.07%	Uruguay
Government Of Uruguay 5.75% 28-oct-2034	Government	2.04%	Uruguay
Government Of The United States Of America 4.125% 15-nov-2032	Government	1.77%	United States of America
Government Of Chile 4.34% 07-mar-2042	Government	1.42%	Chile
Government Of Brazil 10.0% 01-jan-2033	Government	1.30%	Brazil
Government Of The United States Of America 4.0% 15-nov-2052	Government	1.30%	United States of America
Government Of Costa Rica 6.125% 19-feb-2031	Government	1.29%	Costa Rica
Jsc National Company Kazmunaygas 4.75% 19-apr-2027	Energy	1.12%	Kazakhstan
Government Of Hungary 6.75% 25-sep-2052	Government	1.11%	Hungary

Government Of Romania 5.25% 25-nov-2027	Government	0.97%	Romania
Government Of The Dominican Republic 6.4% 05-jun-2049	Government	0.96%	Dominican Republic

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

17.56% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Government	79.96%
Other	8.15%
<i>Gas</i>	0.44%
<i>Oil & Gas Equipment & Services</i>	1.16%
<i>Oil & Gas Storage & Transportation</i>	0.10%
Energy	7.84%
<i>Integrated Oil & Gas</i>	2.22%
<i>Oil & Gas Equipment & Services</i>	0.50%
<i>Oil & Gas Exploration & Production</i>	0.52%
<i>Oil & Gas Refining & Marketing</i>	2.49%
<i>Oil & Gas Storage & Transportation</i>	2.10%
Financials	4.79%
Utilities	3.15%
<i>Electric Utilities</i>	1.16%
Industrials	1.87%
Materials	0.90%
Consumer Discretionary	0.88%
Consumer Staples	0.42%
Communication Services	0.12%
Cash & Derivatives	-8.09%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 17.56%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EMERGING MARKETS ESG LOCAL DEBT

Legal Entity Identifier: 54930054ELO4UKC2EY24

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.40% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials). Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	5.43	4.38
E Pillar	5.75	5.01
S Pillar	6.35	5.89
G Pillar	6.17	5.40
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	5.12	80.81
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	6.09%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	370.98	392.62

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - JP Morgan EMBI Global Diversified

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	5.43	4.38
	31 March 2023	5.47	4.00
E Pillar	31 March 2024	5.75	5.01
	31 March 2023	5.65	4.82
S Pillar	31 March 2024	6.35	5.89
	31 March 2023	6.11	5.12
G Pillar	31 March 2024	6.17	5.40
	31 March 2023	5.69	4.56
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	5.12	80.81
	31 March 2023	15.10	598.59
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	6.09%
	31 March 2023	0.00%	5.66%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2024	370.98	392.62
	31 March 2023	304.05	370.30

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal Adverse Impacts are also considered by the sub-fund are:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance was also taken into account.

As a result of such screens, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Government Of Mexico 7.5% 03-jun-2027	Government	4.29%	Mexico
Government Of Colombia 7.0% 26-mar-2031	Government	4.24%	Colombia
Government Of Thailand 1.585% 17-dec-2035	Government	3.35%	Thailand
Government Of Brazil 10.0% 01-jan-2029	Government	3.07%	Brazil
Government Of South Africa 9.0% 31-jan-2040	Government	2.70%	South Africa
Government Of Mexico 8.5% 18-nov-2038	Government	2.63%	Mexico
Government Of Romania 5.8% 26-jul-2027	Government	2.63%	Romania
Government Of Brazil 10.0% 01-jan-2033	Government	2.59%	Brazil
Government Of Poland 0.25% 25-oct-2026	Government	2.51%	Poland
Government Of Poland 1.75% 25-apr-2032	Government	2.27%	Poland
Government Of Czech Republic 1.75% 23-jun-2032	Government	2.03%	Czech Republic
Government Of Hungary 4.5% 27-may-2032	Government	2.02%	Hungary
Government Of Malaysia 4.254% 31-may-2035	Government	1.92%	Malaysia
Government Of Indonesia 7.5% 15-jun-2035	Government	1.91%	Indonesia
Kfw 0.625% 25-jul-2025	Government	1.84%	Germany

Cash and derivatives were excluded

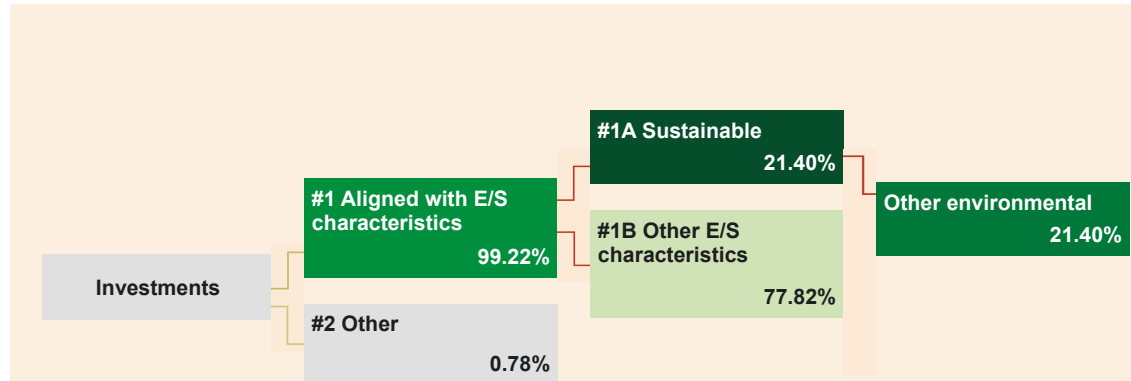

What was the proportion of sustainability-related investments?

21.40% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Government	99.49%
Cash & Derivatives	0.46%
Other	0.05%
Financials	0.00%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%

CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 21.40%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund’s investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.06% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.72	7.20
E Pillar	7.85	7.52
S Pillar	5.38	5.09
G Pillar	6.21	5.85
1. GHG Emissions - Metric tons CO2 equivalents	3,377.35	499,257.46
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	22.59	59.10
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	62.29	97.25
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.28%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg Global Aggregate Corporates Diversified

	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC OIEC CORP BOND AC 11032573	Financials	9.95%	United Kingdom of Great Britain and Northern Ireland

Cash and derivatives were excluded

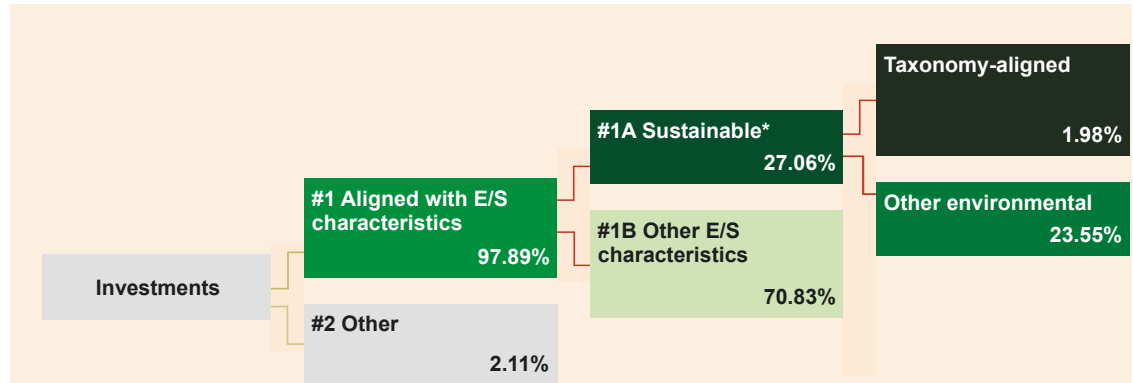

What was the proportion of sustainability-related investments?

27.06% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	40.45%
Other	16.30%
Government	7.11%
Communication Services	5.09%
Industrials	4.79%
Health Care	4.52%
Consumer Staples	4.50%
Utilities	3.86%
<i>Electric Utilities</i>	1.98%
<i>Gas</i>	0.11%
<i>Multi-Utilities</i>	1.78%
Real Estate	3.27%
Information Technology	3.18%
Consumer Discretionary	3.00%
Materials	1.92%
Energy	1.70%
<i>Integrated Oil & Gas</i>	0.87%
<i>Oil & Gas Exploration & Production</i>	0.29%
<i>Oil & Gas Storage & Transportation</i>	0.54%
Cash & Derivatives	0.29%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund’s share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 1.67%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.06%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.92%	0.00%
Revenue - Non Taxonomy-aligned	98.02%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.12%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	3.11%	0.00%
CAPEX - Non Taxonomy-aligned	96.78%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.19%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.94%	0.00%
OPEX - Non Taxonomy-aligned	96.88%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 23.55%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund aimed to provide long term total return by investing in a portfolio of corporate bonds seeking a higher environmental, social and governance (“ESG”) rating and lower carbon intensity, than its reference benchmark Bloomberg Global Aggregate Corporates Diversified Hedged USD (the “Reference Benchmark”), while promoting ESG characteristics within the meaning of Article 8 of SFDR.

The sub-fund invested in Investment Grade rated fixed income and other similar securities issued by companies meeting certain ESG rating and lower carbon intensity criteria (“ESG and Lower Carbon Criteria”). The sub-fund was invested in developed markets. Investments were primarily denominated in developed market currencies. The sub-fund may have also invested in Emerging Market bonds as well as Asset Backed Securities (“ABS”) and Mortgage Backed Securities (“MBS”).

The ESG and Lower Carbon Criteria, which was explained further below, were proprietary to HSBC, subject to ongoing research and may have changed over time as new criteria was identified.

After identifying the eligible investment universe, the Investment Adviser aimed to construct a portfolio with a higher ESG rating and lower carbon intensity, calculated as a weighted average of the ESG ratings and carbon intensities of the sub-fund’s investments, against the weighted average of the constituents of the Reference Benchmark. When assessing issuers’ ESG rating and carbon intensity, the Investment Adviser may have relied on expertise, research and information provided by well-established financial data providers.

The sub-fund was actively managed and did not track a benchmark. The Reference Benchmark was used for sub-fund market comparison purposes.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL GREEN BOND

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 95.88% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/ issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.73	7.27
E Pillar	7.67	6.77
S Pillar	6.07	6.38
G Pillar	6.15	6.53
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	3.40	58.92
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.79%	0.24%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg Global Green Bond

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.73	7.27
	31 March 2023	8.12	7.25
E Pillar	31 March 2024	7.67	6.77
	31 March 2023	7.99	6.38
S Pillar	31 March 2024	6.07	6.38
	31 March 2023	5.88	6.28
G Pillar	31 March 2024	6.15	6.53
	31 March 2023	6.16	6.45
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	3.40	58.92
	31 March 2023	0.00	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.79%	0.24%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
European Investment Bank 3.75% 14-feb-2033	Government	3.12%	SUPRANATIONAL
Government Of Italy 4.0% 30-oct-2031	Government	2.71%	Italy
Societe Du Grand Paris 1.125% 22-oct-2028	Other	2.64%	France
European Union 0.4% 04-feb-2037	Government	2.50%	SUPRANATIONAL
Government Of Germany 0.0% 15-aug-2050	Government	2.27%	Germany
Kfw 2.75% 14-feb-2033	Government	1.94%	Germany
Societe Nationale Sncf 3.375% 25-may-2033	Industrials	1.80%	France

Banco Bilbao Vizcaya Argentaria, S.a. 4.375% 14-oct-2029	Financials	1.49%	Spain

Cash and derivatives were excluded

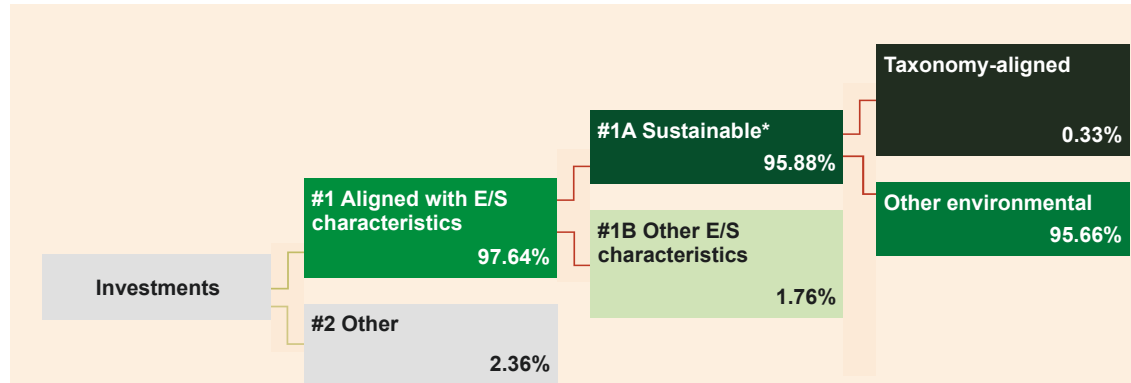

What was the proportion of sustainability-related investments?

95.88% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	29.70%
Government	23.79%
Other	23.36%
Utilities	9.11%
<i>Electric Utilities</i>	4.85%
<i>Gas</i>	0.54%
<i>Multi-Utilities</i>	3.71%
Communication Services	3.96%
Real Estate	3.00%
Cash & Derivatives	2.36%
Industrials	1.63%
Information Technology	1.53%
Consumer Discretionary	0.83%
Consumer Staples	0.73%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.12% and the share of investment in enabling activities was 0.10%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.12%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.21%	0.00%
Revenue - Non Taxonomy-aligned	99.92%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.22%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.35%	0.00%
CAPEX - Non Taxonomy-aligned	99.86%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.35%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.27%	0.00%
OPEX - Non Taxonomy-aligned	99.84%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 95.66%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score in line with the benchmark throughout the reporting period.

The Investment Adviser assessed companies board gender diversity resulting in a slightly lower PAI score than the benchmark.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL HIGH INCOME BOND

Legal Entity Identifier: 4Z04JLSNEZGELBE69R05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.78% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
E Pillar	6.66	6.23

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

17.78% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

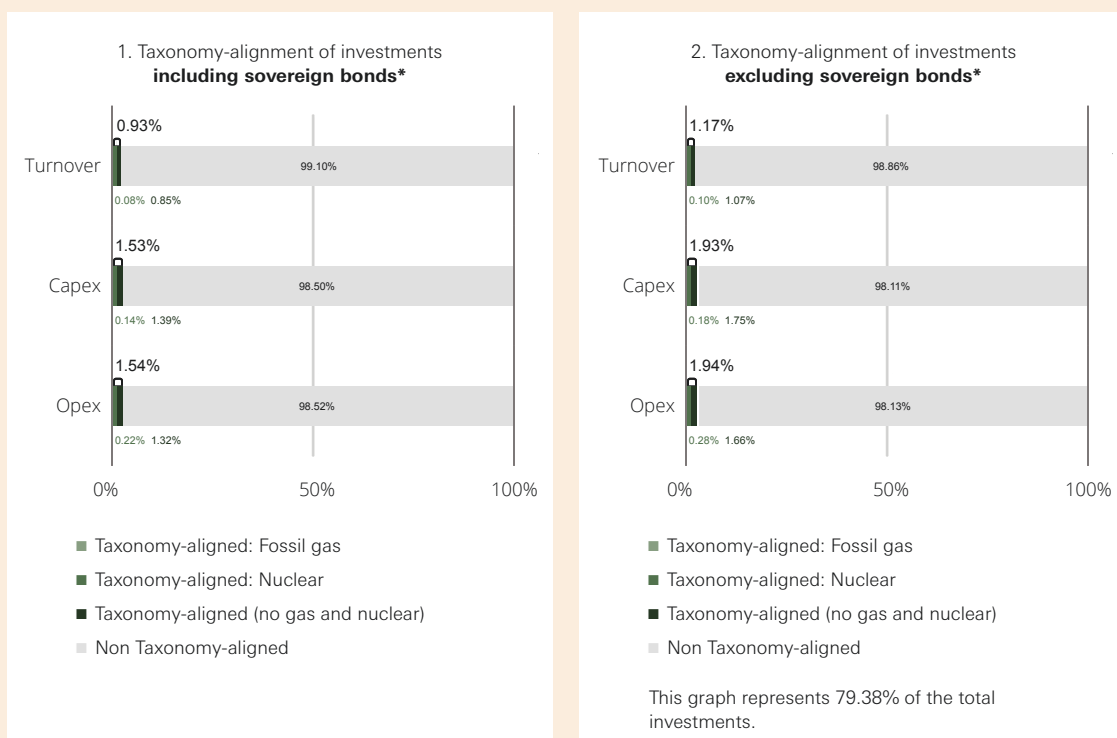

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.06% and the share of investment in enabling activities was 0.48%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.08%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.85%	0.00%
Revenue - Non Taxonomy-aligned	99.10%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.14%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.39%	0.00%
CAPEX - Non Taxonomy-aligned	98.50%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.22%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.32%	0.00%
OPEX - Non Taxonomy-aligned	98.52%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 15.83%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL HIGH YIELD ESG BOND

Legal Entity Identifier: 21380045AQUJTDKLNG49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.87% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	6.76	5.64
E Pillar	6.82	5.88

	31 March 2023	184.14	378.77
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.01%	2.27%
	31 March 2023	0.00%	3.40%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC Global Investment Funds SICAV - Global Asset-Backed High Yield Bond Capitalisation -ZC-	Other	2.31%	Luxembourg

Cash and derivatives were excluded

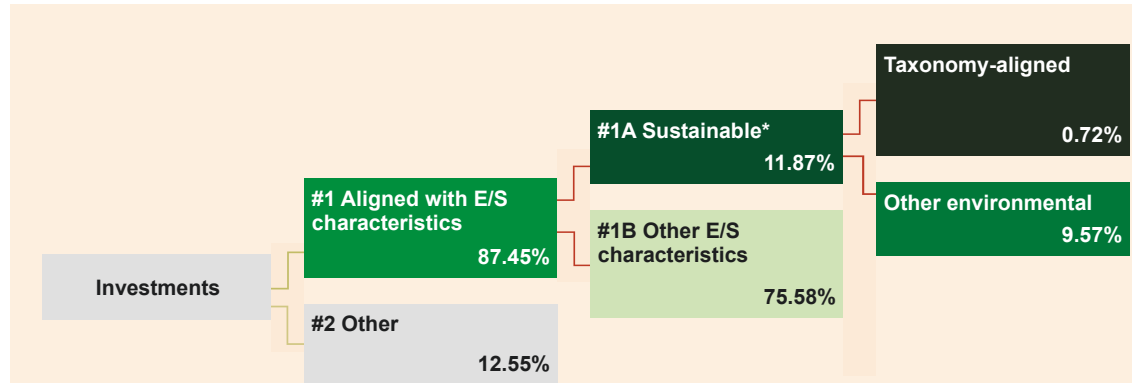

What was the proportion of sustainability-related investments?

11.87% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.11% and the share of investment in enabling activities was 0.18%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023

OPEX - Non Taxonomy-aligned	98.84%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 9.57%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.03% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund
ESG Score	5.28
E Pillar	6.95
S Pillar	4.61
G Pillar	4.70
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

● **...and compared to previous periods?**

Indicator	Period Ending	sub-fund
ESG Score	31 March 2024	5.28
	31 March 2023	7.10
E Pillar	31 March 2024	6.95
	31 March 2023	6.48
S Pillar	31 March 2024	4.61
	31 March 2023	5.01
G Pillar	31 March 2024	4.70
	31 March 2023	5.55
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%
	31 March 2023	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%
	31 March 2023	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC GLF-USD ESG LIQ-Y 11315951	Other	2.74%	Ireland

Cash and derivatives were excluded

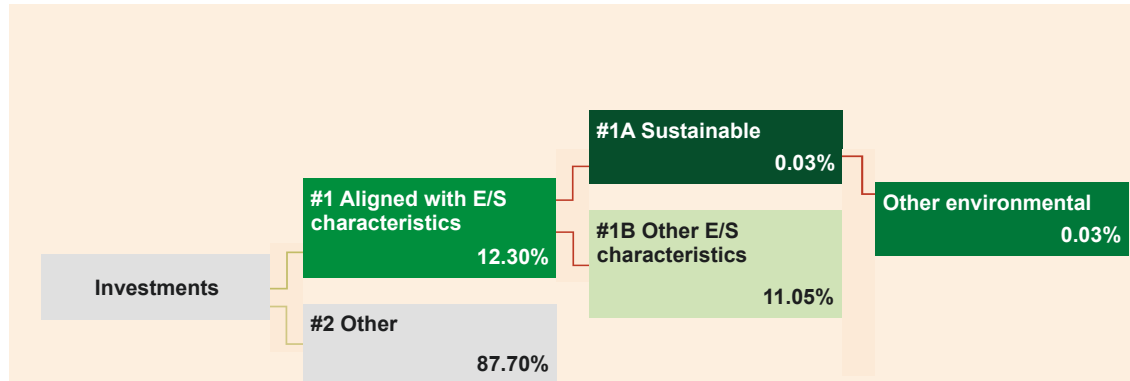

What was the proportion of sustainability-related investments?

0.03% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Other	83.24%
Financials	12.57%
Cash & Derivatives	1.92%
Consumer Staples	1.51%
Real Estate	0.67%
Government	0.08%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 0.03%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL INFLATION LINKED BOND

Legal Entity Identifier: 549300GR296YJ5DZ9M61

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 1.69% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	6.48	6.17
E Pillar	6.05	5.96
S Pillar	7.36	7.27
G Pillar	7.27	6.99
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	4.27	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.01%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	310.70	307.87

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - ICE BofA Global Governments - Inflation-Linked

	31 March 2023	218.08	230.97

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Government Of Germany 0.1% 15-apr-2026	Government	6.66%	Germany
Government Of The United States Of America 1.125% 15-jan-2033	Government	5.67%	United States of America
Government Of The United States Of America 0.5% 15-jan-2028	Government	4.60%	United States of America
Government Of The United States Of America 0.375% 15-jan-2027	Government	4.17%	United States of America
Government Of United Kingdom 0.25% 22-mar-2052	Government	3.72%	United Kingdom of Great Britain and Northern Ireland
Government Of United Kingdom 0.75% 22-mar-2034	Government	3.25%	United Kingdom of Great Britain and Northern Ireland
Government Of The United States Of America 0.125% 15-jan-2032	Government	3.17%	United States of America
Government Of The United States Of America 2.5% 15-jan-2029	Government	3.05%	United States of America
Government Of Germany 0.5% 15-apr-2030	Government	3.03%	Germany

Government Of United Kingdom 0.625% 22-mar-2040	Government	2.63%	United Kingdom of Great Britain and Northern Ireland
Government Of New Zealand 3.5% 14-apr-2033	Government	2.34%	New Zealand

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

1.69% of the portfolio was invested in sustainable assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Government	99.99%
Other	0.44%
Financials	0.02%
Cash & Derivatives	-0.46%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 1.69%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL INVESTMENT GRADE SECURITISED CREDIT BOND

Legal Entity Identifier: 213800J3KJMJOBMGO530

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.02% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund
ESG Score	6.25
E Pillar	7.65
S Pillar	5.08
G Pillar	5.65
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

...and compared to previous periods?

Indicator	Period Ending	sub-fund
ESG Score	31 March 2024	6.25
	31 March 2023	7.81
E Pillar	31 March 2024	7.65
	31 March 2023	8.01
S Pillar	31 March 2024	5.08
	31 March 2023	5.48
G Pillar	31 March 2024	5.65
	31 March 2023	6.42
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%
	31 March 2023	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%
	31 March 2023	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country

Cash and derivatives were excluded

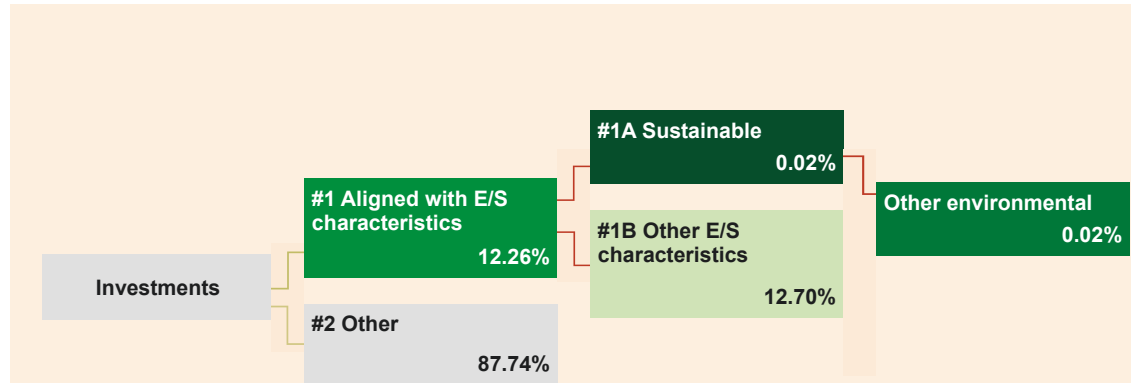

What was the proportion of sustainability-related investments?

0.02% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Other	74.61%
Financials	25.03%
Real Estate	0.69%
Communication Services	0.56%
Government	0.08%
Cash & Derivatives	-0.96%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 0.02%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL LOWER CARBON BOND

Legal Entity Identifier: 213800QEYRD0IIO7S350

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> %	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 28.28% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. Active consideration of low carbon intensity investments compared to the Reference Benchmark.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. Minimum environmental standards through exclusion of business activities that deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Identification and analysis of a company's environmental characteristics included, but not limited to, physical risk of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. Analysis of the share of investment involved in controversial weapons.

The Bloomberg Global aggregate Corporate Diversified Hedged USD was used to measure the sub-fund's carbon intensity, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) is (indicated in the table below by their preceding number compared to). The data used in the calculation of PAI values are sourced from data vendors. They can be based on issuer disclosures or estimated by the data vendors in the absence of issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.33	7.20
E Pillar	7.71	7.52
S Pillar	5.25	5.09
G Pillar	6.07	5.85
1. GHG Emissions - Metric tons CO2 equivalents	2,135.15	501,925.58
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	13.61	59.18
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	55.21	97.31
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.12%	0.29%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg Global Aggregate Corporates Diversified

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark

	31 March 2023	57.85	185.66
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	1.12%	0.29%
	31 March 2023	1.83%	1.86%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Issuers in which the sub-fund invests would be expected to comply with the UNGC and related standards. Issuers having clearly violated one, of the ten principles of the UNGC were systematically excluded. The sub-fund conducts enhanced ESG due diligence on issuers that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance would also be taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Paccar Financial Corp. 4.6% 31-jan-2029	Financials	1.62%	United States of America

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

26.78% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	39.85%
Other	16.28%
<i>Oil & Gas Storage & Transportation</i>	<i>0.88%</i>
Cash & Derivatives	3.76%
Government	6.57%
Communication Services	6.07%
Industrials	5.41%
Consumer Staples	4.06%
Real Estate	3.92%
Health Care	3.70%
Utilities	3.37%
<i>Electric Utilities</i>	<i>1.95%</i>
<i>Multi-Utilities</i>	<i>1.26%</i>
Information Technology	3.17%
Consumer Discretionary	2.99%
Materials	0.86%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 0.42%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.04%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.72%	0.00%
Revenue - Non Taxonomy-aligned	99.24%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.07%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.77%	0.00%
CAPEX - Non Taxonomy-aligned	98.16%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.11%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.45%	0.00%
OPEX - Non Taxonomy-aligned	98.43%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 25.68%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL SECURITISED CREDIT BOND

Legal Entity Identifier: 213800ETFO3K123TXM05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.04% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund
ESG Score	5.05
E Pillar	5.89
S Pillar	4.84
G Pillar	5.03
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

...and compared to previous periods?

Indicator	Period Ending	sub-fund
ESG Score	31 March 2024	5.05
	31 March 2023	7.36
E Pillar	31 March 2024	5.89
	31 March 2023	8.08
S Pillar	31 March 2024	4.84
	31 March 2023	4.70
G Pillar	31 March 2024	5.03
	31 March 2023	5.72
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%
	31 March 2023	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%
	31 March 2023	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

What was the proportion of sustainability-related investments?

0.04% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Other	71.67%
Financials	25.50%
Real Estate	1.73%
Communication Services	1.47%
Government	0.10%
Cash & Derivatives	-0.47%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 0.04%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL GOVERNMENT BOND

Legal Entity Identifier: 213800U23ATP2ADUS371

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 2.71% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset management considered it appropriate to do so.
5. The sub-fund excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark for the sub-fund was used to measure the sub-fund's ESG rating, calculated as a weighted average of the ESG ratings given to the issuers of the sub-fund's investments relative to the weighted average of the constituents of the Reference Benchmark, but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	6.30	6.19
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	150.90	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	333.64	325.72

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - JP Morgan GBI Global (Traded)

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	6.30	6.19
	31 March 2023	6.12	6.57
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	150.90	0.00
	31 March 2023	160.87	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2024	333.64	325.72
	31 March 2023	246.14	273.37

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund identified and analysed a company's ESG credentials as an integral part of the investment decision made process to reducing risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity for sovereign issues

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC GLB-GLB BD TL RT-ZC USD 10841441	Financials	3.91%	United Kingdom of Great Britain and Northern Ireland

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

2.71% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Government	94.93%

Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.02%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.06%	0.00%
Revenue - Non Taxonomy-aligned	99.93%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.01%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.10%	0.00%
CAPEX - Non Taxonomy-aligned	99.89%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.02%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.09%	0.00%
OPEX - Non Taxonomy-aligned	99.90%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 2.56%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.92% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	6.66	5.87
E Pillar	6.88	5.42
S Pillar	5.77	6.39
G Pillar	6.27	6.43
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	92.54	154.29
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.11%	0.15%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.03%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	370.15	361.31

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg Global Aggregate (1-3 Y)

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	6.66	5.87
	31 March 2023	6.61	5.99
E Pillar	31 March 2024	6.88	5.42
	31 March 2023	5.94	5.22
S Pillar	31 March 2024	5.77	6.39
	31 March 2023	6.49	6.59
G Pillar	31 March 2024	6.27	6.43
	31 March 2023	6.28	6.02
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	92.54	154.29
	31 March 2023	102.44	148.82
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.11%	0.15%
	31 March 2023	0.00%	0.46%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.03%
	31 March 2023	0.00%	0.01%
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 March 2024	370.15	361.31
	31 March 2023	247.58	272.13

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed for an improvement of the overall ESG score of the portfolio relative to benchmark constituents, through portfolio construction.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons
- Greenhouse gas intensity for sovereign issues

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Government Of Germany 0.0% 09-oct-2026	Government	2.86%	Germany
Government Of China 3.01% 13-may-2028	Government	1.65%	China
Government Of The United States Of America 1.25% 30-nov-2026	Government	1.63%	United States of America
HSBC GLF-USD ESG LIQ-Y 11315951	Other	1.62%	Ireland
Government Of Germany 0.25% 15-feb-2027	Government	1.45%	Germany
Government Of New Zealand 4.5% 15-apr-2027	Government	1.41%	New Zealand
Government Of The United States Of America 1.5% 31-jan-2027	Government	1.34%	United States of America
Natwest Group Plc 3.622% 14-aug-2030	Financials	1.24%	United Kingdom of Great Britain and Northern Ireland
Government Of The United States Of America 3.125% 15-aug-2025	Government	1.23%	United States of America

Export-import Bank Of China 4.89% 26-mar-2028	Government	1.07%	China
National Grid North America, Inc. 4.151% 12-sep-2027	Utilities	1.00%	United States of America
Government Of Mexico 7.5% 03-jun-2027	Government	0.97%	Mexico

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

6.92% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Government	33.08%
Financials	25.78%
Other	25.52%
<i>Gas</i>	0.02%
<i>Oil & Gas Storage & Transportation</i>	0.08%
Utilities	3.16%
<i>Electric Utilities</i>	1.45%
<i>Gas</i>	0.84%
<i>Multi-Utilities</i>	0.56%
Consumer Discretionary	2.98%
Real Estate	2.21%
Communication Services	2.05%
Industrials	1.94%
Energy	1.36%
<i>Integrated Oil & Gas</i>	0.79%
<i>Oil & Gas Exploration & Production</i>	0.45%
<i>Oil & Gas Storage & Transportation</i>	0.12%
Health Care	1.10%
Materials	0.44%
Cash & Derivatives	0.31%
Information Technology	0.07%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

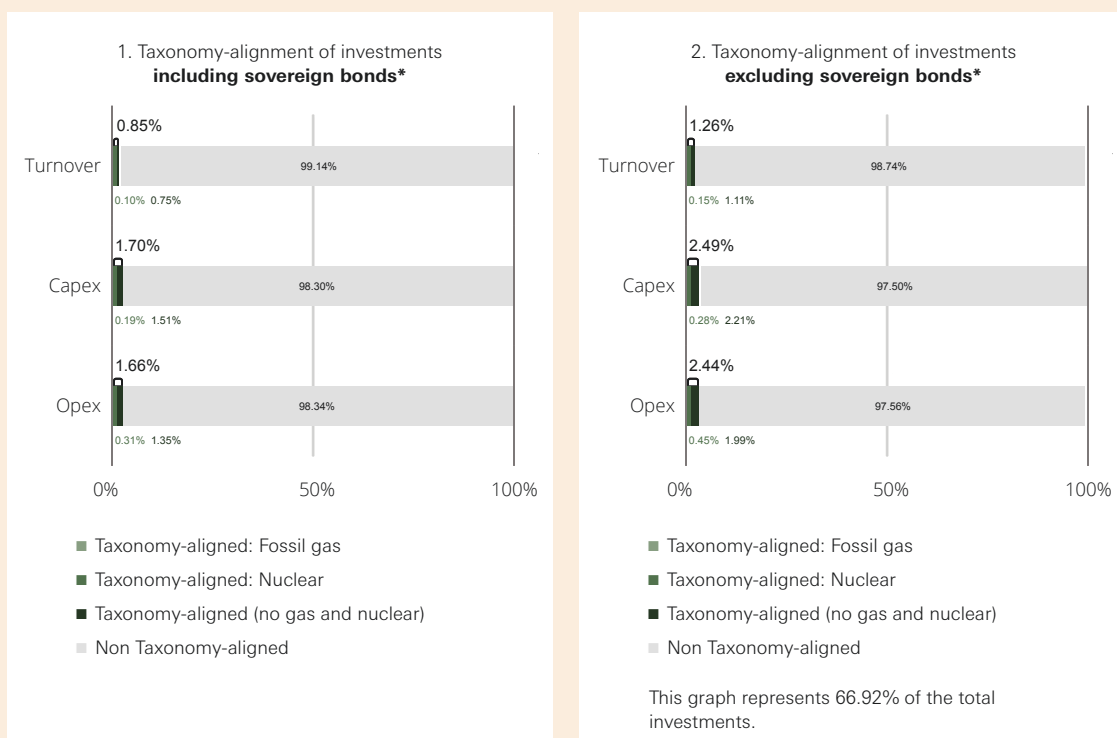

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.10% and the share of investment in enabling activities was 0.33%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.10%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.75%	0.00%
Revenue - Non Taxonomy-aligned	99.14%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.19%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.51%	0.00%
CAPEX - Non Taxonomy-aligned	98.30%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.31%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.35%	0.00%
OPEX - Non Taxonomy-aligned	98.34%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 5.21%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ULTRA SHORT DURATION BOND

Legal Entity Identifier: 213800K751A281K04P97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.12% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. We use ESG scores from third party providers (e.g. MSCI ESG Scores) and have also developed proprietary scores to reflect our own view of ESG risks and opportunities. We have developed a bespoke sector segmentation (derived from MSCI Global Industry Classification Standard) where we re-assess the materiality of key E, S and G factors from MSCI on a sector-by-sector basis and generate a sector-specific HSBC ESG weighting.

Consideration of individual Principal Adverse Impacts (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuer disclosures or estimated by the data vendors in the absence of company/issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.03	6.81
E Pillar	7.31	7.82
S Pillar	4.89	4.83
G Pillar	5.97	5.83
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	77.00	71.52
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	1.12%	0.17%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg US Corporate (1-3 Y) (Inception 11/28/2003)

...and compared to previous periods?

	31 March 2023	1.82%	3.02%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to identify and analyse a company's ESG credentials as an integral part of the investment decision making process through portfolio construction with the aim of reducing sustainability risk and enhancing returns. By considering the ESG Credentials of potential investments the Investment Adviser aimed to meet the objective of having an improved ESG score compared to the Reference Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

9.12% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	41.69%
Other	30.62%
<i>Oil & Gas Storage & Transportation</i>	<i>1.10%</i>
Government	4.73%

Cash & Derivatives	-0.72%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

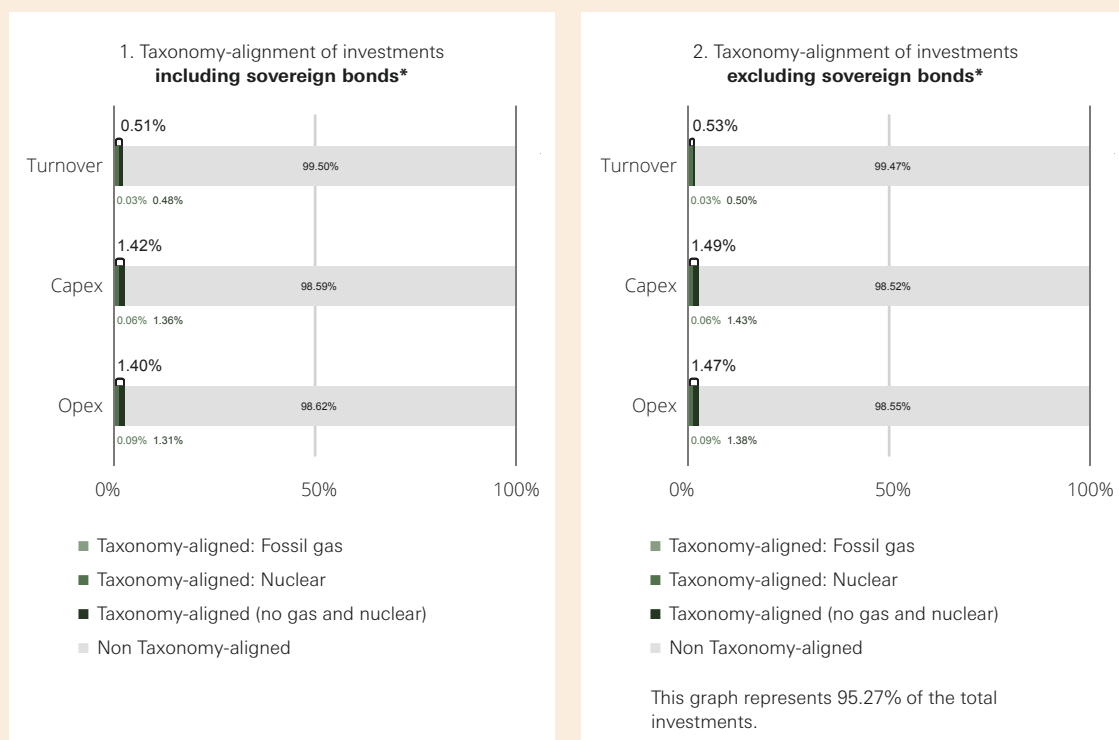

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.05% and the share of investment in enabling activities was 0.31%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.03%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.48%	0.00%
Revenue - Non Taxonomy-aligned	99.50%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.06%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.37%	0.00%
CAPEX - Non Taxonomy-aligned	98.59%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.09%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.31%	0.00%
OPEX - Non Taxonomy-aligned	98.62%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 8.11%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund’s investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - US DOLLAR BOND

Legal Entity Identifier: 21380009RWE9DATIW963

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 3.71% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund invested in securities that supported climate related or environmental projects.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) is (indicated in the table below by their preceding number compared to). The data used in the calculation of PAI values are sourced from data vendors. They can be based on issuer disclosures or estimated by the data vendors in the absence of issuer reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used for market comparison purposes and had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	6.29	5.88
E Pillar	6.54	6.04
S Pillar	6.42	6.96
G Pillar	6.41	6.57
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	82.07	62.89
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.45%	0.01%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - Bloomberg US Aggregate

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark

	31 March 2023	6.17	6.33
G Pillar	31 March 2024	6.41	6.57
	31 March 2023	5.61	5.70
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	82.07	62.89
	31 March 2023	68.67	260.15
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.45%	0.01%
	31 March 2023	0.77%	0.88%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of an issuer's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Government Of The United States Of America 0.0% 14-dec-2023	Government	4.16%	United States of America

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

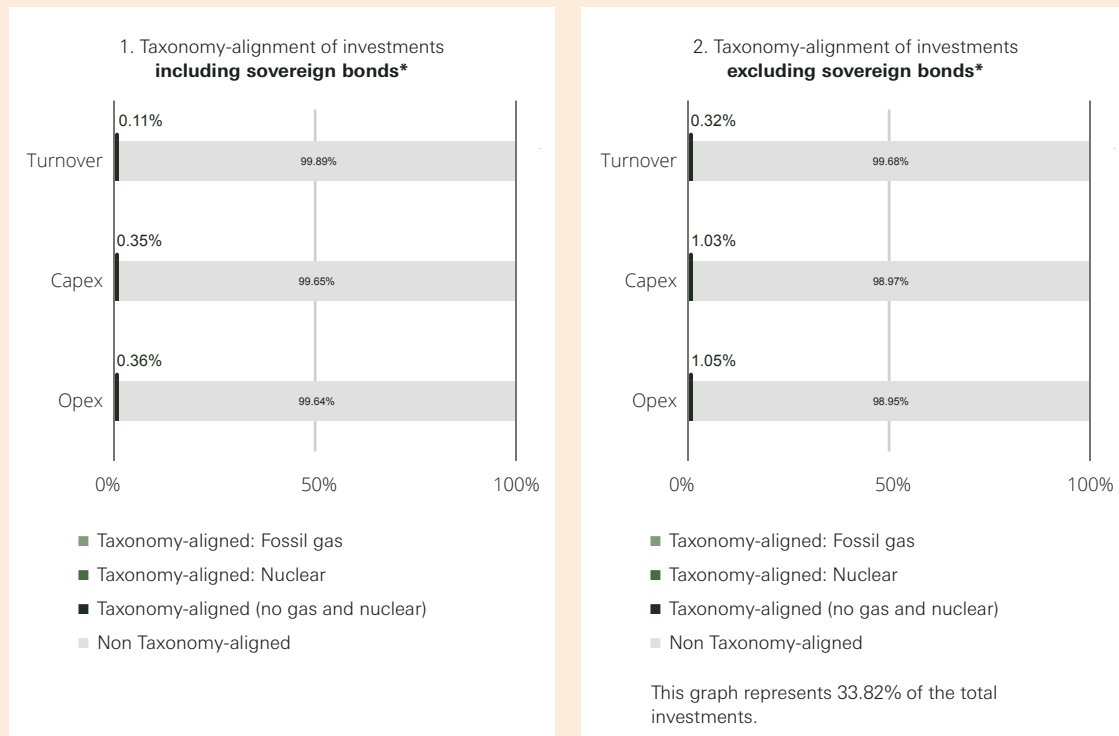

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.09%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.11%	0.00%
Revenue - Non Taxonomy-aligned	99.89%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.35%	0.00%
CAPEX - Non Taxonomy-aligned	99.65%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.36%	0.00%
OPEX - Non Taxonomy-aligned	99.64%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 3.39%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - CORPORATE EURO BOND FIXED TERM 2027

Legal Entity Identifier: 213800HGGJD2679RWB20

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** %

No

It **promoted Environmental/Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 22.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year end 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The Investment Adviser aimed to construct a portfolio with a higher ESG score, calculated as a weighted average of the ESG scores of the sub-fund's investments against the weighted average of the constituents of its reference benchmark.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Minimum environmental standards through exclusion of business activities that deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.23	6.84
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.23%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - 50% ICE BofA - 5 year Euro Developed + 50% ICE BofA - 5 year Euro Corporate

● ***...and compared to previous periods?***

This is only the first SFDR Periodic report and as such there is no comparison required.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Fund did not commit to make sustainable investments as defined under SFDR. However, as a result of the investment process, the Fund invested in sustainable investments, which were aligned to the environmental and social characteristics promoted by the Fund.

The Investment Manager promoted among other characteristics, environmental and social characteristics and invested in issuers following good governance practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This question is not applicable for this particular Fund, however the do no significant harm analysis was completed as part of HSBC'S standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable, however the Investment Manager followed HSBC's Responsible Investment Policy which set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these can adversely impact the securities the sub-funds invested in. HSBC used third party data providers, such as Sustainalytics, ISS, MSCI and Trucost to identify issuers and governments with a poor track record in managing ESG risks and, where potential material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts identified by screening were a key consideration in the investment decision making process. The approach taken, as set out above, meant that among other things the following points were scrutinised:

- issuers' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aiming, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which include the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

This question is not applicable as the Fund did not commit to make sustainable investments as defined under SFDR. However, HSBC was committed to the application and promotion of global standards, focusing on HSBC's Responsible Investment Policy which includes the ten principles of the UNGC. These principles include non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Issuers in which the Fund invested were expected to comply with the UNGC and related standards. Issuers having clearly violated one of the ten principles of the UNGC were systematically excluded, unless they had gone through an ESG due diligence assessment to determine their suitability for inclusion in the Fund's portfolio.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Cellnex Finance Co. Sa 1.0% 15-sep-2027	Communication Services	2.37%	Spain

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

22.00% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Other	32.34%
Financials	28.83%
Consumer Discretionary	11.03%
Real Estate	6.87%
Materials	4.13%
Industrials	4.08%
Communication Services	3.72%
Cash & Derivatives	3.05%
Utilities	1.72%
<i>Electric Utilities</i>	<i>0.40%</i>
<i>Gas</i>	<i>1.05%</i>
<i>Multi-Utilities</i>	<i>0.05%</i>
Information Technology	1.63%
Consumer Staples	1.30%
Energy	1.00%
<i>Integrated Oil & Gas</i>	<i>0.07%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>0.93%</i>
Health Care	0.30%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

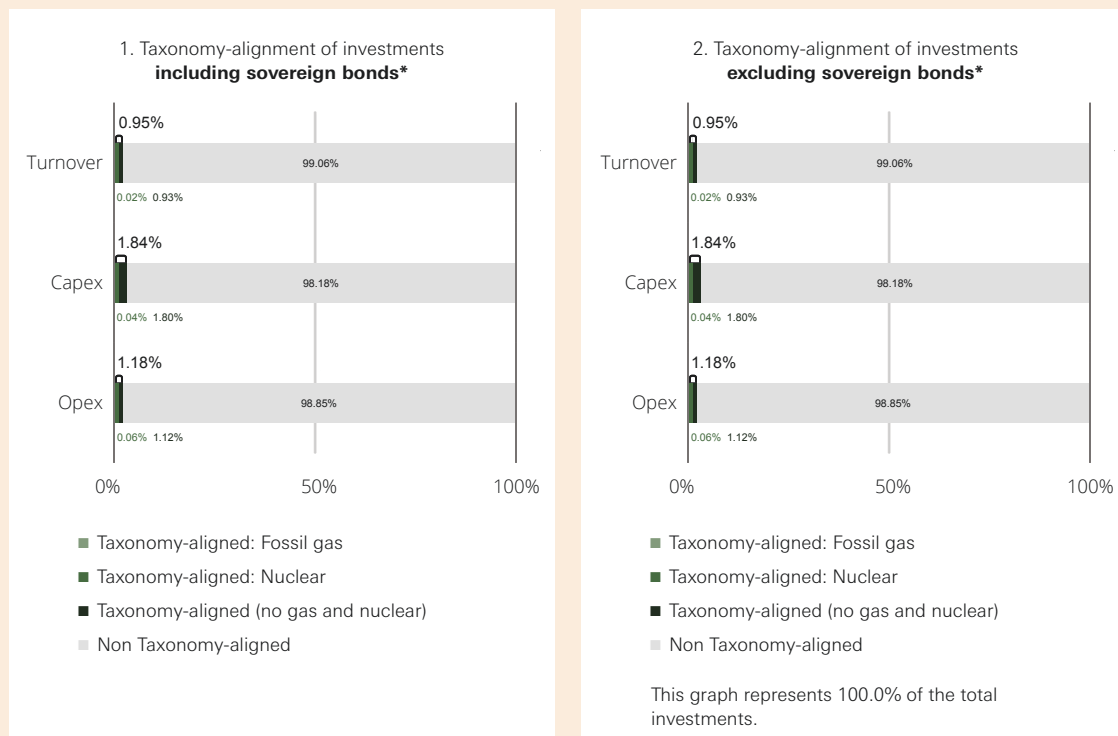

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.15%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	N/A
Revenue - Taxonomy-aligned: Nuclear	0.02%	N/A
Revenue - Taxonomy-aligned (no gas and nuclear)	0.93%	N/A
Revenue - Non Taxonomy-aligned	99.06%	N/A
CAPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
CAPEX - Taxonomy-aligned: Nuclear	0.04%	N/A
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.80%	N/A
CAPEX - Non Taxonomy-aligned	98.18%	N/A
OPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
OPEX - Taxonomy-aligned: Nuclear	0.06%	N/A
OPEX - Taxonomy-aligned (no gas and nuclear)	1.12%	N/A
OPEX - Non Taxonomy-aligned	98.85%	N/A

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 21.10%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles. The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading In which economic sectors were the investments made?) for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the investment adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles. The sub-fund includes the identification and analysis of a company's ESG credentials as an integral part of the investment decision-making process. ESG Credentials are derived from a range of HSBC proprietary and third party sources, are subject to ongoing research and may change over time as new credentials are identified. They include, but are not limited to: Environmental and Social factors, including but not limited to physical risks of climate change and human capital management, that may have a material impact on a security issuer's financial performance and valuation. The investment decision-making process integrates ESG Credentials in a number of ways:

- o Excluding companies with a low ESG score and companies that are considered to be non-compliant with the UNGC Principles. This exclusion is at the discretion of the Investment Adviser. Companies with an improving but still low ESG score and companies with a discernible direction of travel towards UNGC Principles compliance may still be invested in.
- o Engagement with companies around energy transition and ESG regulation

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASEAN EQUITY

Legal Entity Identifier: 213800GX2NCDIS6WSV60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 14.15% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- The sub fund actively considered low carbon intensity investments compared to the reference benchmark
- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation).

In addition, the Investment Adviser:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

1. Considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
2. Excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
3. Actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
4. Analysed and excluded investments involved in controversial weapons.

Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below .

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	6.47	6.41
1. GHG Emissions - Metric tons CO2 equivalents	420.31	86,293,746.11
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	13.92	145.99
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	79.58	341.34
4. Exposure to companies active in the fossil fuel sector	0.00%	8.54%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.01%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI ASEAN

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	6.47	6.41
	31 March 2023	0.00	0.00
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024	420.31	86,293,746.11
	31 March 2023	0.00	0.00
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024	13.92	145.99
	31 March 2023	0.00	0.00
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	79.58	341.34

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
DBS Group Holdings Ltd	Financials	9.80%	Singapore
Oversea-Chinese Banking Corporation Limited	Financials	8.04%	Singapore
PT Bank Rakyat Indonesia (Persero) Tbk Class B	Financials	6.89%	Indonesia
PT Bank Mandiri (Persero) Tbk	Financials	5.13%	Indonesia
PT Telkom Indonesia (Persero) Tbk Class B	Communication Services	4.48%	Indonesia
Sea Limited Sponsored ADR Class A	Communication Services	4.29%	Singapore
CIMB Group Holdings Bhd	Financials	4.25%	Malaysia
United Overseas Bank Limited	Financials	3.78%	Singapore
BDO Unibank, Inc.	Financials	3.66%	Philippines

Cash and derivatives were excluded

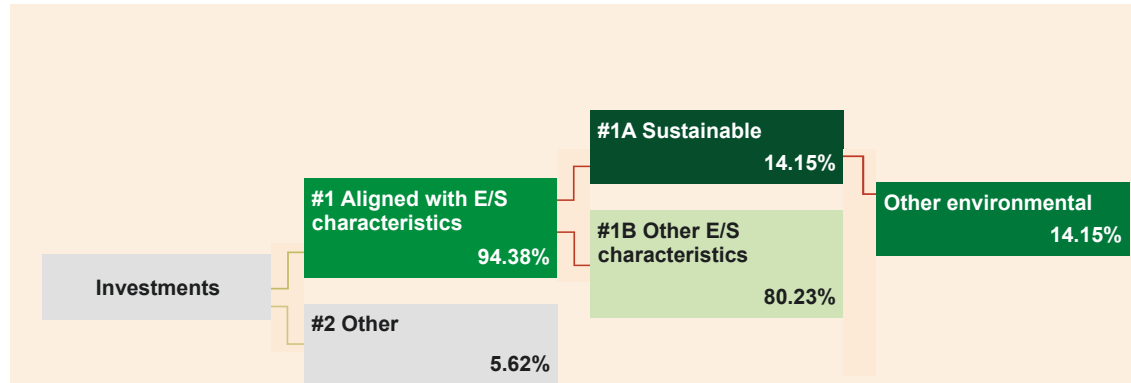

What was the proportion of sustainability-related investments?

14.15% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Financials	44.28%
Communication Services	15.54%
Industrials	9.54%
Real Estate	7.97%
Consumer Discretionary	6.46%
Health Care	5.52%
Cash & Derivatives	2.99%
Consumer Staples	2.48%
Information Technology	2.20%
Other	1.56%
Materials	1.43%
Government	0.03%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	N/A
Revenue - Taxonomy-aligned: Nuclear	N/A	N/A
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	N/A
Revenue - Non Taxonomy-aligned	100.00%	N/A
CAPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
CAPEX - Taxonomy-aligned: Nuclear	N/A	N/A
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	N/A
CAPEX - Non Taxonomy-aligned	100.00%	N/A
OPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
OPEX - Taxonomy-aligned: Nuclear	N/A	N/A
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	N/A
OPEX - Non Taxonomy-aligned	100.00%	N/A

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 14.15%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASIA EX JAPAN EQUITY

Legal Entity Identifier: 21380086TMCIPDOJI191

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.21% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
4. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	11,788.56	871,936,834.19
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	34.97	159.15
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	112.10	327.20
4. Exposure to companies active in the fossil fuel sector	4.85%	5.46%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	7.55%	7.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI All Country Asia Ex-Japan

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024	11,788.56	871,936,834.19
	31 March 2023	14,123.85	997,922,443.60
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024	34.97	159.15
	31 March 2023	34.77	176.76
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	112.10	327.20
	31 March 2023	146.76	338.51
4. Exposure to companies active in the fossil fuel sector	31 March 2024	4.85%	5.46%
	31 March 2023	4.97%	5.16%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	7.55%	7.00%
	31 March 2023	9.50%	7.76%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.02%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	9.49%	Taiwan
Samsung Electronics Co., Ltd.	Information Technology	6.83%	Korea
Tencent Holdings Ltd.	Communication Services	6.04%	China
Reliance Industries Limited	Energy	3.75%	India
Alibaba Group Holding Limited	Consumer Discretionary	3.48%	China
SK hynix Inc.	Information Technology	3.33%	Korea
AIA Group Limited	Financials	3.25%	Hong Kong
PT Bank Rakyat Indonesia (Persero) Tbk Class B	Financials	3.20%	Indonesia
Shriram Finance Limited	Financials	2.70%	India
DLF Limited	Real Estate	2.50%	India
Bharti Airtel Limited	Communication Services	2.45%	India
MediaTek Inc	Information Technology	2.45%	Taiwan
ICICI Bank Limited	Financials	2.41%	India

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

37.21% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Information Technology	31.86%
Financials	20.67%
Consumer Discretionary	13.65%
Communication Services	10.99%
Industrials	4.26%
Energy	4.15%
<i>Oil & Gas Exploration & Production</i>	<i>0.47%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>3.68%</i>
Health Care	3.25%
Consumer Staples	2.94%
Utilities	2.61%
<i>Electric Utilities</i>	<i>0.43%</i>
<i>Gas</i>	<i>1.49%</i>
Real Estate	2.50%
Cash & Derivatives	1.91%
Other	0.82%
Materials	0.40%
Government	0.01%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 37.21%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made

How did this financial product perform compared to the reference benchmark?

Not applicable.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.55% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund actively considered low carbon intensity investments compared to the reference benchmark.
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.

4. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

6. The sub-fund analysed and excluded investments involved in controversial weapons.

Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	127,656.80	191,191,247.10
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	300.66	212.86
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	238.22	425.29
4. Exposure to companies active in the fossil fuel sector	1.85%	3.18%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.17%	0.54%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.32%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI AC Asia ex JP Small Cap

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024 31 March 2023	127,656.80 38,996.65	191,191,247.10 172,281,034.56
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024 31 March 2023	300.66 86.46	212.86 184.15
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024 31 March 2023	238.22 224.88	425.29 461.77
4. Exposure to companies active in the fossil fuel sector	31 March 2024 31 March 2023	1.85% 3.39%	3.18% 3.53%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024 31 March 2023	0.17% 0.00%	0.54% 0.36%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024 31 March 2023	0.00% 0.00%	0.32% 0.14%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC US Dollar Liquidity Y 10116567	Other	3.01%	Ireland
Alchip Technologies Ltd.	Information Technology	2.48%	Taiwan
Lendlease Global Commercial REIT	Real Estate	2.10%	Singapore
KEI Industries Limited	Industrials	1.97%	India
PT Pakuwon Jati Tbk	Real Estate	1.87%	Indonesia

Nien Made Enterprise Co., Ltd.	Consumer Discretionary	1.54%	Taiwan
POYA International Co., Ltd.	Consumer Discretionary	1.45%	Taiwan
Unimicron Technology Corp.	Information Technology	1.42%	Taiwan
Gokaldas Exports Limited	Consumer Discretionary	1.36%	India

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

10.55% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Information Technology	23.82%
Consumer Discretionary	18.02%
Industrials	14.49%
Health Care	10.62%
Financials	8.37%
Real Estate	8.22%
Materials	4.96%
Other	3.62%
Cash & Derivatives	2.01%
Consumer Staples	1.91%
Energy	1.74%
<i>Oil & Gas Equipment & Services</i>	<i>1.20%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>0.55%</i>
Communication Services	1.37%
Utilities	0.77%
<i>Gas</i>	<i>0.77%</i>
Government	0.08%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 10.55%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the 10 UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - ASIA PACIFIC EX JAPAN EQUITY HIGH DIVIDEND

Legal Entity Identifier: 213800MMWNTNUVALJY871

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.72% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
4. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	40,814.21	955,245,595.07
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	129.29	145.01
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	225.64	297.61
4. Exposure to companies active in the fossil fuel sector	3.71%	5.81%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	4.42%	5.82%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI All Country Asia Pacific Ex-Japan

...and compared to previous periods?

	31 March 2023	0.00%	0.02%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns. The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund also considered the Principal Adverse Impacts listed below:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	8.93%	Taiwan
Baidu, Inc. Class A	Communication Services	4.57%	China

Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 25.72%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the 10 UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - CHINA A-SHARES EQUITY

Legal Entity Identifier: 213800ZAVP5VLFDBBN34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.47% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. Active consideration of low carbon intensity investments compared to the Reference Benchmark.
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
4. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark was used to measure the sub-fund's carbon intensity but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	3,023.25	578,317,891.26
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	141.19	212.82
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	184.41	313.94
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.67%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.09%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI China A Onshore

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024	3,023.25	578,317,891.26
	31 March 2023	9,261.79	675,133,162.68
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024	141.19	212.82
	31 March 2023	480.16	192.54
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	184.41	313.94
	31 March 2023	371.54	380.26
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	1.67%
	31 March 2023	0.00%	1.64%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.09%
	31 March 2023	1.32%	1.07%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns. The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carried out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Kweichow Moutai Co., Ltd. Class A	Consumer Staples	5.10%	China
Luxshare Precision Industry Co. Ltd. Class A	Information Technology	4.21%	China
Contemporary Amperex Technology Co., Ltd. Class A	Industrials	3.99%	China
Agricultural Bank of China Limited Class A	Financials	3.25%	China
Yantai Jereh Oilfield Services Group Co., Ltd. Class A	Energy	3.02%	China
Bank of Jiangsu Co., Ltd. Class A	Financials	3.00%	China
Ningbo Orient Wires & Cables Co Ltd Class A	Industrials	2.61%	China
Postal Savings Bank of China Co., Ltd. Class A	Financials	2.42%	China
CNOOC Limited Class A	Energy	2.38%	China
Guotai Junan Securities Co., Ltd. Class A	Financials	2.38%	China
Weichai Power Co., Ltd. Class A	Industrials	2.34%	China
TCL Technology Group Corporation Class A	Consumer Discretionary	2.23%	China
Midea Group Co. Ltd. Class A	Consumer Discretionary	2.20%	China
Ping An Insurance (Group) Company of China, Ltd. Class A	Financials	2.17%	China
Shandong Nanshan Aluminium Co., Ltd. Class A	Materials	1.92%	China

Cash and derivatives were excluded

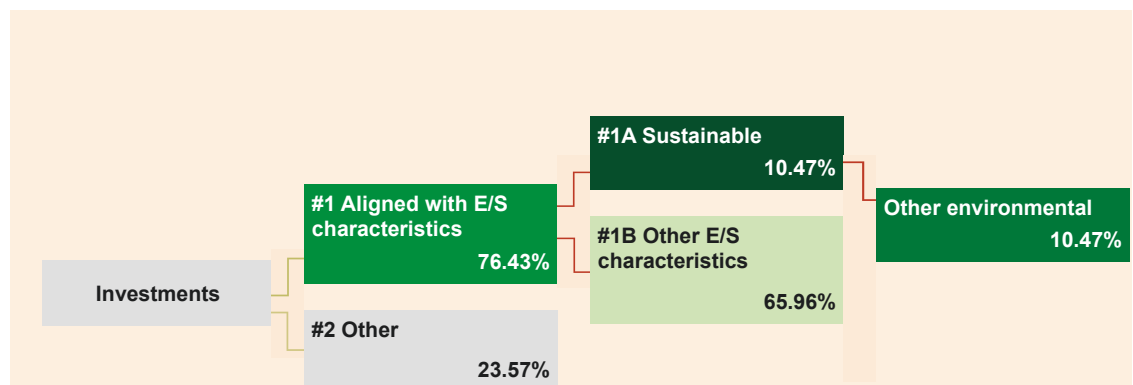

What was the proportion of sustainability-related investments?

10.47% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Industrials	19.35%
Financials	18.87%
Information Technology	16.71%
Consumer Discretionary	9.44%
Materials	9.30%
Energy	8.18%
<i>Oil & Gas Drilling</i>	0.25%
<i>Oil & Gas Equipment & Services</i>	4.30%
<i>Oil & Gas Exploration & Production</i>	2.03%
<i>Oil & Gas Refining & Marketing</i>	0.92%
<i>Oil & Gas Storage & Transportation</i>	0.69%
Consumer Staples	7.24%
Health Care	5.06%
Communication Services	3.01%
Utilities	2.31%
<i>Independent Power Producers & Energy Traders</i>	1.80%
Cash & Derivatives	0.52%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 10.47%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - CHINESE EQUITY

Legal Entity Identifier: 21380041N4NYFPYHPQ91

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 13.11% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG and sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies/issuers demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	33,766.55	377,996,142.42
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	58.33	157.26
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	81.15	234.06
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	11.69%	15.33%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI China 10-40

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024	33,766.55	377,996,142.42
	31 March 2023	57,062.04	438,638,540.00
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024	58.33	157.26
	31 March 2023	81.27	155.24
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	81.15	234.06
	31 March 2023	160.12	271.01
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	11.69%	15.33%
	31 March 2023	13.33%	15.04%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.08%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns ESG Credentials may have included, but were not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have a material impact on a company's financial performance and valuation.
- corporate governance practices that protected minority investor interests and promoted long term sustainable value creation.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Tencent Holdings Ltd.	Communication Services	9.53%	China
Alibaba Group Holding Limited	Consumer Discretionary	8.18%	China
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	5.85%	Taiwan
Netease Inc	Communication Services	4.99%	China
China Construction Bank Corporation Class H	Financials	4.89%	China
PDD Holdings Inc. Sponsored ADR Class A	Consumer Discretionary	4.80%	China
Kweichow Moutai Co., Ltd. Class A	Consumer Staples	4.37%	China
CNOOC Limited	Energy	3.44%	China
New Oriental Education & Technology Group, Inc.	Consumer Discretionary	3.32%	China
China Telecom Corp. Ltd. Class H	Communication Services	2.67%	China

Cash and derivatives were excluded

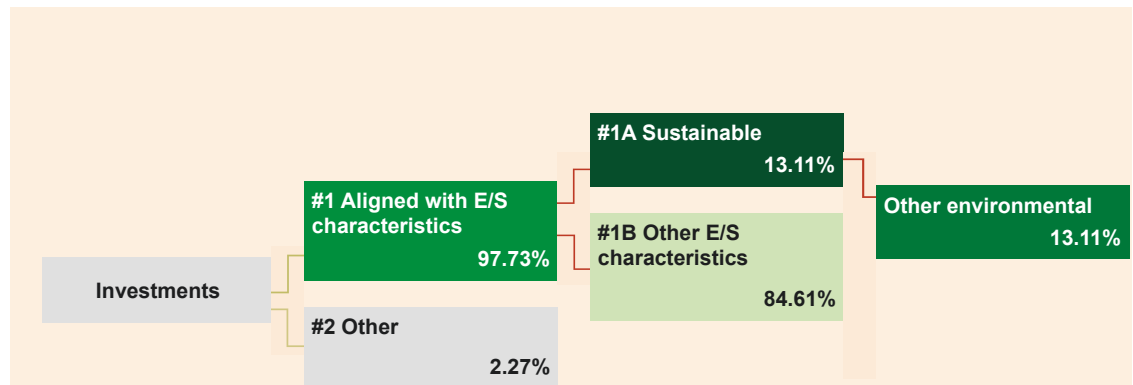

What was the proportion of sustainability-related investments?

13.11% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Consumer Discretionary	24.20%
Communication Services	22.15%
Financials	15.14%
Information Technology	11.91%
Industrials	6.86%
Consumer Staples	5.49%
Health Care	3.80%
Energy	3.38%
<i>Oil & Gas Exploration & Production</i>	<i>3.38%</i>
Materials	2.18%
Real Estate	1.88%
Government	1.80%
Cash & Derivatives	0.56%
Utilities	0.46%
<i>Gas</i>	<i>0.12%</i>
Other	0.19%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 13.11%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROLAND EQUITY SMALLER COMPANIES

Legal Entity Identifier: 213800K2ESNFXN2ENI09

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** _%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** _%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.74% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors. The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.48	7.28
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	62.52	154.21
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
13. Board gender diversity	39.93%	39.54%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI EMU Small Mid

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.48	7.28
	31 March 2023	7.46	7.27
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	62.52	154.21
	31 March 2023	85.08	185.89
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
13. Board gender diversity	31 March 2024	39.93%	39.54%
	31 March 2023	39.60%	39.31%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Board gender diversity
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
ASM International N.V.	Information Technology	3.95%	Netherlands
Symrise AG	Materials	3.68%	Germany
Euronext NV	Financials	3.39%	Netherlands
Brenntag SE	Industrials	3.31%	Germany
Eurofins Scientific SE	Health Care	3.17%	Luxembourg
Kingspan Group Plc	Industrials	3.10%	Ireland
FincoBank SpA	Financials	2.96%	Italy
Tenaris S.A.	Energy	2.82%	United States of America
Metso Corporation	Industrials	2.54%	Finland
Sodexo SA	Consumer Discretionary	2.47%	France
Publicis Groupe SA	Communication Services	2.45%	France
SPIE SA	Industrials	2.38%	France
Kesko Oyj Class B	Consumer Staples	2.29%	Finland
ageas SA/NV	Financials	2.17%	Belgium
Wienerberger AG	Materials	2.13%	Austria

Cash and derivatives were excluded

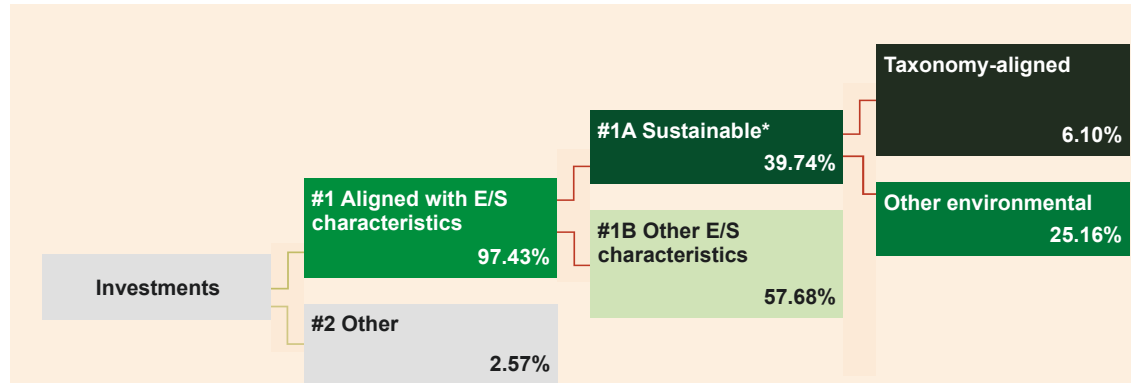

What was the proportion of sustainability-related investments?

39.74% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	24.97%
Financials	17.69%
Materials	10.85%
Communication Services	7.86%
Consumer Discretionary	7.10%
Information Technology	6.85%
Health Care	5.59%
Energy	5.57%
<i>Oil & Gas Equipment & Services</i>	<i>4.01%</i>
<i>Oil & Gas Storage & Transportation</i>	<i>1.56%</i>
Utilities	4.55%
<i>Independent Power Producers & Energy Traders</i>	<i>0.49%</i>
Consumer Staples	3.79%
Real Estate	2.77%
Cash & Derivatives	2.41%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

 In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.30% and the share of investment in enabling activities was 1.47%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.05%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	6.06%	0.00%
Revenue - Non Taxonomy-aligned	93.90%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	6.72%	0.00%
CAPEX - Non Taxonomy-aligned	93.28%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	5.19%	0.00%
OPEX - Non Taxonomy-aligned	94.81%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 25.16%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

ESG analysis was embedded in the fundamental analysis of the stocks the Investment Adviser invested and therefore contributed to all trading decisions. Trades reflected a balanced integration of financial and non-financial criteria. The most significant changes were reducing the exposure to GTT, Laboratorios Farmaceuticos Rovi, Rai way, whose activities are by nature carbon intensive. On the contrary, holdings were reinforced in Publicis, Puma, UPM, whose scores were higher.

As detailed above, the sub-fund assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. The Investment Adviser assessed companies board gender diversity resulting in a lower PAI score than the benchmark.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROLAND GROWTH

Legal Entity Identifier: 213800UUVN3ZTID5O892

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.13% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	8.44	7.81
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	85.95	109.50
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
13. Board gender diversity	44.27%	41.63%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI EMU

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	8.44	7.81
	31 March 2023	8.61	7.84
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	85.95	109.50
	31 March 2023	73.97	124.50
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
13. Board gender diversity	31 March 2024	44.27%	41.63%
	31 March 2023	43.65%	41.34%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at:
www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Board gender diversity
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
ASML Holding NV	Information Technology	9.02%	Netherlands
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	6.80%	France
SAP SE	Information Technology	5.89%	Germany
Air Liquide SA	Materials	4.94%	France
Schneider Electric SE	Industrials	4.59%	United States of America
Hermes International SCA	Consumer Discretionary	4.53%	France
L'Oreal S.A.	Consumer Staples	4.51%	France
Allianz SE	Financials	4.42%	Germany
Wolters Kluwer N.V.	Industrials	3.26%	Netherlands
Deutsche Telekom AG	Communication Services	3.25%	Germany

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

56.13% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	27.18%
Consumer Discretionary	16.49%
Industrials	16.23%
Financials	13.13%
Consumer Staples	9.64%
Materials	5.71%
Health Care	3.80%
Communication Services	3.12%
Energy	2.99%
.....
<i>Integrated Oil & Gas</i>	0.58%
.....
<i>Oil & Gas Refining & Marketing</i>	2.42%
Cash & Derivatives	1.71%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 56.13%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity, resulting in PAI scores in line with the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score in line with the benchmark throughout the reporting period.

The Investment Adviser assessed companies board gender diversity resulting in a slightly lower PAI score than the benchmark.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference

benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROLAND VALUE

Legal Entity Identifier: 2138005UESNT8JGWI979

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41.82% of sustainable investments <ul style="list-style-type: none"> <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
- The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
- The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

5. The sub-fund excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.91	7.81
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	130.31	109.50
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
13. Board gender diversity	42.33%	41.63%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI EMU

● ***...and compared to previous periods?***

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.91	7.81
	31 March 2023	7.90	7.84
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	130.31	109.50
	31 March 2023	178.69	124.50
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
13. Board gender diversity	31 March 2024	42.33%	41.63%
	31 March 2023	41.35%	41.34%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

- 1.The reduction of greenhouse gas (GHG) emissions
- 2.The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of
 - rigorous anti-corruption and bribery policies as well as audit trails; and
 - governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included non-financial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies - Scope 1 & Scope 2
- Violation of UNGC and OECD principles
- Board gender diversity
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector NEW	% Assets	Country
Allianz SE	Financials	4.46%	Germany
TotalEnergies SE	Energy	3.97%	France
Iberdrola SA	Utilities	3.57%	Spain
AXA SA	Financials	3.35%	France
ING Groep NV	Financials	2.87%	Netherlands
CRH public limited company	Materials	2.78%	United States of America
Cie Generale des Etablissements Michelin SA	Consumer Discretionary	2.75%	France
Siemens Aktiengesellschaft	Industrials	2.65%	Germany
Sanofi	Health Care	2.63%	United States of America
ACS, Actividades de Construcción y Servicios SA	Industrials	2.62%	Spain
Koninklijke Ahold Delhaize N.V.	Consumer Staples	2.57%	Netherlands
Merck KGaA	Health Care	2.56%	Germany
Royal KPN NV	Communication Services	2.56%	Netherlands
Metso Corporation	Industrials	2.46%	Finland
ENGIE SA.	Utilities	2.45%	France

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

41.82% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Financials	22.62%
Industrials	20.17%
Energy	8.99%
<i>Integrated Oil & Gas</i>	8.99%
Health Care	7.90%
Consumer Staples	7.40%
Utilities	7.26%
<i>Electric Utilities</i>	3.56%
<i>Multi-Utilities</i>	3.70%
Communication Services	7.10%
Materials	6.54%
Consumer Discretionary	6.40%
Information Technology	2.08%
Cash & Derivatives	2.05%
Real Estate	1.49%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:

 In fossil gas In nuclear energy

 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.35% and the share of investment in enabling activities was 2.49%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	4.12%	0.00%
Revenue - Non Taxonomy-aligned	95.87%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.03%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	9.85%	0.00%
CAPEX - Non Taxonomy-aligned	90.12%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.03%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	6.38%	0.00%
OPEX - Non Taxonomy-aligned	93.59%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 22.03%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

ESG analysis was embedded in the fundamental analysis of the stocks the Investment Adviser invested and therefore contributed to all trading decisions. Trades reflected a balanced integration of financial and non-financial criteria. The most significant changes were reducing the exposure to ArcelorMittal, Arkema, Solvay, whose ESG scores were relatively low. Holdings were increased for KPN, OMV, Iberdrola and Galp, whose scores were higher. Holdings were reduced for CRH, ArcelorMittal, Engie, and Veolia, whose activities are by nature carbon intensive. On the contrary, holdings were reinforced for Siemens, Merck, Poste Italiane, Erste Group and KPN, whose carbon emissions were considered low. On a day-to-day basis, the Investment Adviser applied our stewardship policy and dialog with the companies, and also applied HSBC's voting policy.

As detailed above, the sub-fund assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period. The Investment Adviser assessed companies board gender diversity resulting in a lower PAI score than the benchmark.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

● *How did this financial product perform compared with the broad market index?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROPE VALUE

Legal Entity Identifier: 213800NDHT1X7UMKBO83

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.44% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by this sub-fund were:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.97	7.82
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	135.27	98.22
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
13. Board gender diversity	41.03%	41.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.40%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI Europe

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.97	7.82
	31 March 2023	0.00	0.00
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	135.27	98.22
	31 March 2023	0.00	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
13. Board gender diversity	31 March 2024	41.03%	41.00%
	31 March 2023	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.40%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others.

1.The reduction of greenhouse gas (GHG) emissions and carbon footprint;

2.The transition to or use of renewable energy;

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process. The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and - governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance. The specific PAIs for this sub-fund were as set out above.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Board gender diversity
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance was also taken into account. As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
AstraZeneca PLC	Health Care	3.53%	United Kingdom of Great Britain and Northern Ireland
KBC Group N.V.	Financials	3.42%	Belgium
ING Groep NV	Financials	3.28%	Netherlands
Reckitt Benckiser Group plc	Consumer Staples	3.16%	United Kingdom of Great Britain and Northern Ireland
Commerzbank AG	Financials	3.03%	Germany
Novo Nordisk A/S Class B	Health Care	2.93%	Denmark
BP p.l.c.	Energy	2.72%	United Kingdom of Great Britain and Northern Ireland
Heineken NV	Consumer Staples	2.68%	Netherlands
Royal KPN NV	Communication Services	2.62%	Netherlands
Allianz SE	Financials	2.54%	Germany
Siemens Aktiengesellschaft	Industrials	2.54%	Germany
Anheuser-Busch InBev SA/NV	Consumer Staples	2.52%	Belgium
OMV AG	Energy	2.45%	Austria
UBS Group AG	Financials	2.45%	Switzerland
Novartis AG	Health Care	2.42%	Switzerland

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

36.44% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	23.00%
Industrials	17.16%
Materials	11.74%
Health Care	10.09%
Consumer Staples	8.99%
Energy	7.04%
<i>Integrated Oil & Gas</i>	<i>7.04%</i>
Communication Services	6.23%
Consumer Discretionary	5.96%
Utilities	4.06%
<i>Electric Utilities</i>	<i>2.57%</i>
<i>Multi-Utilities</i>	<i>1.49%</i>
Information Technology	3.77%
Cash & Derivatives	1.25%
Real Estate	0.70%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

 In fossil gas

 In nuclear energy

 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	N/A
Revenue - Taxonomy-aligned: Nuclear	N/A	N/A
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	N/A
Revenue - Non Taxonomy-aligned	100.00%	N/A
CAPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
CAPEX - Taxonomy-aligned: Nuclear	N/A	N/A
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	N/A
CAPEX - Non Taxonomy-aligned	100.00%	N/A
OPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
OPEX - Taxonomy-aligned: Nuclear	N/A	N/A
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	N/A
OPEX - Non Taxonomy-aligned	100.00%	N/A

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 36.44%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles. The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading In which economic sectors were the investments made?) for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the investment adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

The sub-fund assessed ESG scores resulting in an ESG score similar to the benchmark throughout the reporting period. The investment adviser assessed companies board gender diversity resulting in a slightly lower PAI score than the benchmark.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EMERGING MARKETS EQUITY

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.02% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
- The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Principles for businesses.
- The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
5. The sub-fund excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	6.53	5.91
E Pillar	6.70	5.83
S Pillar	5.48	5.20
G Pillar	4.97	4.69
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	165.60	384.37
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	6.07%	7.40%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI Emerging Markets

● **...and compared to previous periods?**

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	6.53	5.91
	31 March 2023	6.02	5.85
E Pillar	31 March 2024	6.70	5.83
	31 March 2023	6.91	5.64
S Pillar	31 March 2024	5.48	5.20
	31 March 2023	5.56	5.30
G Pillar	31 March 2024	4.97	4.69
	31 March 2023	4.54	4.62
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	165.60	384.37
	31 March 2023	197.67	415.57
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	6.07%	7.40%
	31 March 2023	11.13%	4.19%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments’ commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	8.76%	Taiwan
Samsung Electronics Co., Ltd.	Information Technology	7.13%	Korea
Reliance Industries Limited	Energy	4.84%	India
Alibaba Group Holding Limited	Consumer Discretionary	4.31%	China
Tencent Holdings Ltd.	Communication Services	4.09%	China
Shriram Finance Limited	Financials	3.42%	India
PT Bank Rakyat Indonesia (Persero) Tbk Class B	Financials	3.23%	Indonesia
Genera SAB de CV	Financials	3.12%	Mexico
Hon Hai Precision Industry Co., Ltd.	Information Technology	2.85%	Taiwan
Hyundai Motor Company	Consumer Discretionary	2.73%	Korea
MediaTek Inc	Information Technology	2.71%	Taiwan
SK hynix Inc.	Information Technology	2.62%	Korea
Meituan Class B	Consumer Discretionary	2.48%	China

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

35.02% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	31.05%
Financials	21.14%
Communication Services	13.08%
Consumer Discretionary	11.44%
Industrials	7.31%
Energy	4.75%
<i>Oil & Gas Refining & Marketing</i>	<i>4.75%</i>
Utilities	2.90%
<i>Electric Utilities</i>	<i>1.13%</i>
Materials	2.43%
Consumer Staples	2.21%
Cash & Derivatives	1.73%
Health Care	1.61%
Other	0.34%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 35.02%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the 10 UNGC Principles were identified, ESG enhanced due diligence was carried out by the portfolio manager/analyst and investment committee approval was obtained before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY CLIMATE CHANGE

Legal Entity Identifier: 213800BN2PIFBP7BXW47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 79.11% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund invested in companies that supported the transition to a low carbon economy.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, companies were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual PAIs (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental or social characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	8.10	6.78
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	62.14	137.11
4. Exposure to companies active in the fossil fuel sector	3.03%	7.20%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.39%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.22%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI All Country World

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	8.10	6.78
	31 March 2023	8.32	6.82
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	62.14	137.11
	31 March 2023	83.75	167.71
4. Exposure to companies active in the fossil fuel sector	31 March 2024	3.03%	7.20%
	31 March 2023	3.64%	7.62%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	1.39%
	31 March 2023	0.00%	1.65%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.22%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed for a lower carbon intensity and a higher environmental, social and governance rating, calculated respectively as a weighted average of the carbon intensities and ESG ratings given to the issuers of the sub-fund's investments, than the weighted average of the constituents of the Benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in fossil fuel sector
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Trane Technologies plc	Industrials	4.96%	United States of America
Schneider Electric SE	Industrials	4.84%	United States of America
Prysmian S.p.A.	Industrials	4.72%	Italy
Microsoft Corporation	Information Technology	4.66%	United States of America
Ecolab Inc.	Materials	4.57%	United States of America
Accenture Plc Class A	Information Technology	4.40%	United States of America
Autodesk, Inc.	Information Technology	4.32%	United States of America
Verisk Analytics Inc	Industrials	4.23%	United States of America
Infineon Technologies AG	Information Technology	3.81%	Germany
Watts Water Technologies, Inc. Class A	Industrials	3.78%	United States of America
Hubbell Incorporated	Industrials	3.12%	United States of America
Capgemini SE	Information Technology	3.05%	France

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

79.11% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Industrials	43.67%
Information Technology	28.65%
Materials	11.16%
Utilities	6.11%
<i>Electric Utilities</i>	2.96%
<i>Multi-Utilities</i>	0.26%
Health Care	3.94%
Real Estate	2.61%
Energy	1.54%
<i>Oil & Gas Refining & Marketing</i>	1.54%
Consumer Discretionary	1.40%
Cash & Derivatives	0.92%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas In nuclear energy
 No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 3.88%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.02%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	7.89%	0.00%
Revenue - Non Taxonomy-aligned	92.10%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	10.33%	0.00%
CAPEX - Non Taxonomy-aligned	89.67%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	9.14%	0.00%
OPEX - Non Taxonomy-aligned	90.86%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 63.12%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The sub-fund is an SFDR Article 8 with a thematic strategy. It delivered on its sustainable investment objective by investing in a concentrated portfolio of companies that provided solutions to the climate change problem.

The sub-fund had a minimum of 80% of its net assets invested in equities and equity equivalent securities of companies with exposure to climate change solution areas, or eco-sectors, which are domiciled in, based in, carry out business activities in, or are listed on a Regulated Market in any country including both developed markets and Emerging Markets.

The Investment Adviser used both internal green revenue research and third-party green revenue data to assess the alignment of companies to the climate change theme, with a minimum threshold of 20% green revenues to qualify as a thematically aligned investment. In addition, the portfolio aimed to achieve a 20% higher ESG score compared to the MSCI ACWI and 50% lower carbon intensity than the MSCI ACWI.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL REAL ESTATE EQUITY

Legal Entity Identifier: 213800C7RPFQKFW88Y39

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 28.10% of sustainable investments</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- The sub fund actively considered low carbon intensity investments compared to the reference benchmark
- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation)

In addition, the Investment Adviser:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

1. Considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
2. Excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
3. Actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
4. Analysed and excluded investments involved in controversial weapons.

Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below .

How did the sustainability indicators perform?

Indicator	sub-fund	Reference Benchmark
ESG Score	6.21	6.54
1. GHG Emissions - Metric tons CO2 equivalents	3,521.35	3,787,332.99
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	6.16	7.08
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	79.88	77.31
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%
18. Exposure to energy-inefficient real estate assets	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - FTSE EPRA Nareit Developed x US

	31 March 2023	0.00%	0.00%
18. Exposure to energy-inefficient real estate assets	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at:
www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Prologis, Inc.	Real Estate	7.05%	United States of America
Invitation Homes, Inc.	Real Estate	3.26%	United States of America
Welltower Inc.	Real Estate	3.17%	United States of America
Realty Income Corporation	Real Estate	3.09%	United States of America
SEGRO plc	Real Estate	2.90%	United Kingdom of Great Britain and Northern Ireland
Warehouses De Pauw SA	Real Estate	2.81%	Belgium
Public Storage	Real Estate	2.78%	United States of America
CapitaLand Integrated Commercial Trust	Real Estate	2.76%	Singapore
Equinix, Inc.	Real Estate	2.63%	United States of America
Simon Property Group, Inc.	Real Estate	2.60%	United States of America
Ventas, Inc.	Real Estate	2.58%	United States of America
Regency Centers Corporation	Real Estate	2.55%	United States of America
Kimco Realty Corporation	Real Estate	2.52%	United States of America
Federal Realty Investment Trust	Real Estate	2.44%	United States of America
Rexford Industrial Realty, Inc.	Real Estate	2.35%	United States of America

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

28.10% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● *In which economic sectors were the investments made?*

Sector / Sub-Sector	% Assets
Real Estate	98.72%
Cash & Derivatives	1.28%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	N/A
Revenue - Taxonomy-aligned: Nuclear	N/A	N/A
Revenue - Taxonomy-aligned (no gas and nuclear)	0.34%	N/A
Revenue - Non Taxonomy-aligned	99.66%	N/A
CAPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
CAPEX - Taxonomy-aligned: Nuclear	N/A	N/A
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.61%	N/A
CAPEX - Non Taxonomy-aligned	99.39%	N/A
OPEX - Taxonomy-aligned: Fossil gas	N/A	N/A
OPEX - Taxonomy-aligned: Nuclear	N/A	N/A
OPEX - Taxonomy-aligned (no gas and nuclear)	0.33%	N/A
OPEX - Non Taxonomy-aligned	99.67%	N/A

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 28.10%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

After identifying the eligible investment universe, the Investment Adviser constructed a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. This resulted in a PAI scores lower than the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score higher than the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL SUSTAINABLE EQUITY INCOME

Legal Entity Identifier: 213800P8MQVXCNL9A447

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.64% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund actively considered low carbon intensity investments and the ESG score was managed to have a higher score compared to the index.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund excluded the share of investment involved in controversial weapons.

The ESG score is taken from third party ESG data provider. MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used to measure the sub-fund's carbon intensity and ESG scores but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	8.33	6.87
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	58.37	109.67
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.69%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.24%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI World

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	8.33	6.87
	31 March 2023	8.43	6.94
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	58.37	109.67
	31 March 2023	80.46	144.58
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.69%
	31 March 2023	0.00%	0.80%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.24%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then. From November 2023, PAI 2 - Carbon Footprint was added as a sustainability indicator to this sub-fund in error and subsequently removed in January 2024. Therefore, we have not reported on this PAI. PAI 1 - Greenhouse gas emissions was added in November 2023. It will be reported in full in the next SFDR Periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns. The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision made process with the aim of reducing sustainability risks and enhancing returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2) (added in November 2023, please see the footnote under the performance table above)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carried out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	5.54%	United States of America
Apple Inc.	Information Technology	4.12%	United States of America
NVIDIA Corporation	Information Technology	3.14%	United States of America
Amazon.com, Inc.	Consumer Discretionary	1.48%	United States of America
Home Depot, Inc.	Consumer Discretionary	1.48%	United States of America
Novo Nordisk A/S Class B	Health Care	1.47%	Denmark
ASML Holding NV	Information Technology	1.34%	Netherlands
Merck & Co., Inc.	Health Care	1.27%	United States of America
Adobe Inc.	Information Technology	1.26%	United States of America
Alphabet Inc. Class C	Communication Services	1.21%	United States of America
Cisco Systems, Inc.	Information Technology	1.21%	United States of America
Coca-Cola Company	Consumer Staples	1.20%	United States of America
Applied Materials, Inc.	Information Technology	1.13%	United States of America
PepsiCo, Inc.	Consumer Staples	1.12%	United States of America
Texas Instruments Incorporated	Information Technology	1.12%	United States of America

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

38.64% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	24.87%
Financials	14.23%
Industrials	13.33%
Health Care	11.40%
Consumer Discretionary	10.61%
Consumer Staples	7.86%
Communication Services	4.87%
Real Estate	4.08%
Energy	3.04%
<i>Integrated Oil & Gas</i>	1.28%
<i>Oil & Gas Equipment & Services</i>	0.27%
<i>Oil & Gas Exploration & Production</i>	1.07%
<i>Oil & Gas Storage & Transportation</i>	0.42%
Materials	2.44%
Utilities	2.41%
<i>Electric Utilities</i>	0.72%
<i>Gas</i>	0.15%
<i>Multi-Utilities</i>	1.55%
Cash & Derivatives	0.85%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.10% and the share of investment in enabling activities was 0.63%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.73%	0.00%
Revenue - Non Taxonomy-aligned	99.27%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.17%	0.00%
CAPEX - Non Taxonomy-aligned	98.83%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.82%	0.00%
OPEX - Non Taxonomy-aligned	99.18%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 36.98%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY SUSTAINABLE HEALTHCARE

Legal Entity Identifier: 213800J1JR4OJROIMV56

---	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

1. The sub-fund invested in a concentrated portfolio of equities of companies that benefitted from increasingly constrained healthcare budgets world-wide.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
4. The sub-fund identified and analysed company's social characteristics, including but not limited to patient access to care.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

The sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual PAIs (indicated in the table below by their preceding number). The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the social characteristics that it promoted can be seen in the table below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
Sustainable Healthcare Score - Cost Savings	0.29	N/A
Sustainable Healthcare Score - Clinical Outcomes	0.74	N/A
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI World Health Care

● ***...and compared to previous periods?***

Indicator	Period Ending	sub-fund	Reference Benchmark
Sustainable Healthcare Score - Cost Savings	31 March 2024	0.29	N/A
	31 March 2023	0.31	N/A
Sustainable Healthcare Score - Clinical Outcomes	31 March 2024	0.74	N/A
	31 March 2023	0.84	N/A
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the sub-fund contributed to the social objectives.

The sub-fund aimed to provide long term total return by investing in a concentrated portfolio of equities of companies that may benefit from increasingly constrained healthcare budgets world-wide, while promoting ESG characteristics within the meaning of Article 8 of the European Union's SFDR.

The sub-fund aimed to identify and analyse companies' key products or services which might help reduce overall healthcare spend as an integral part of the investment decision made process to reducing the negative social impact of reduced access to health care and enhancing returns.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Eli Lilly and Company	Health Care	6.38%	United States of America
Novo Nordisk A/S Class B	Health Care	4.99%	Denmark
UnitedHealth Group Incorporated	Health Care	4.84%	United States of America
McKesson Corporation	Health Care	4.08%	United States of America
Vertex Pharmaceuticals Incorporated	Health Care	3.97%	United States of America
Tenet Healthcare Corporation	Health Care	3.54%	United States of America
Boston Scientific Corporation	Health Care	3.43%	United States of America
Neurocrine Biosciences, Inc.	Health Care	3.41%	United States of America
DexCom, Inc.	Health Care	3.14%	United States of America
Elevance Health, Inc.	Health Care	2.99%	United States of America
Regeneron Pharmaceuticals, Inc.	Health Care	2.91%	United States of America

AstraZeneca PLC	Health Care	2.63%	United Kingdom of Great Britain and Northern Ireland
United Therapeutics Corporation	Health Care	2.58%	United States of America

Cash and derivatives were excluded

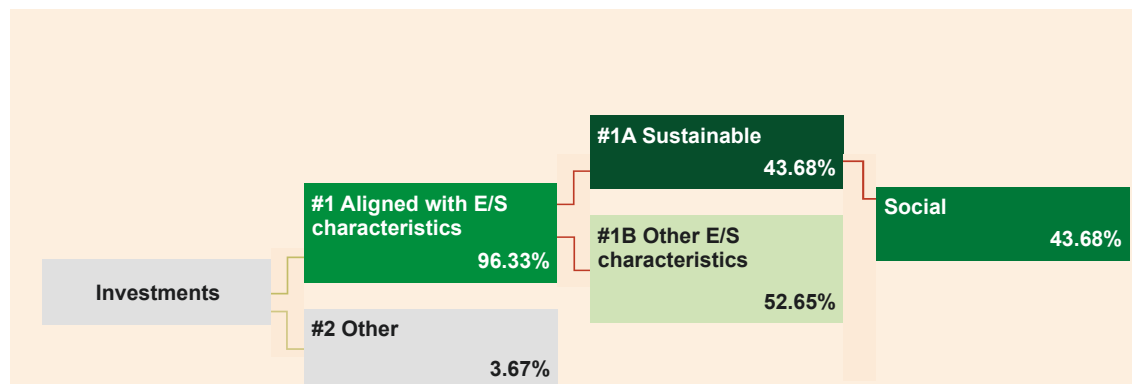

What was the proportion of sustainability-related investments?

43.68% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector / Sub-Sector	% Assets
Health Care	95.79%
Cash & Derivatives	2.97%
Consumer Staples	1.24%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

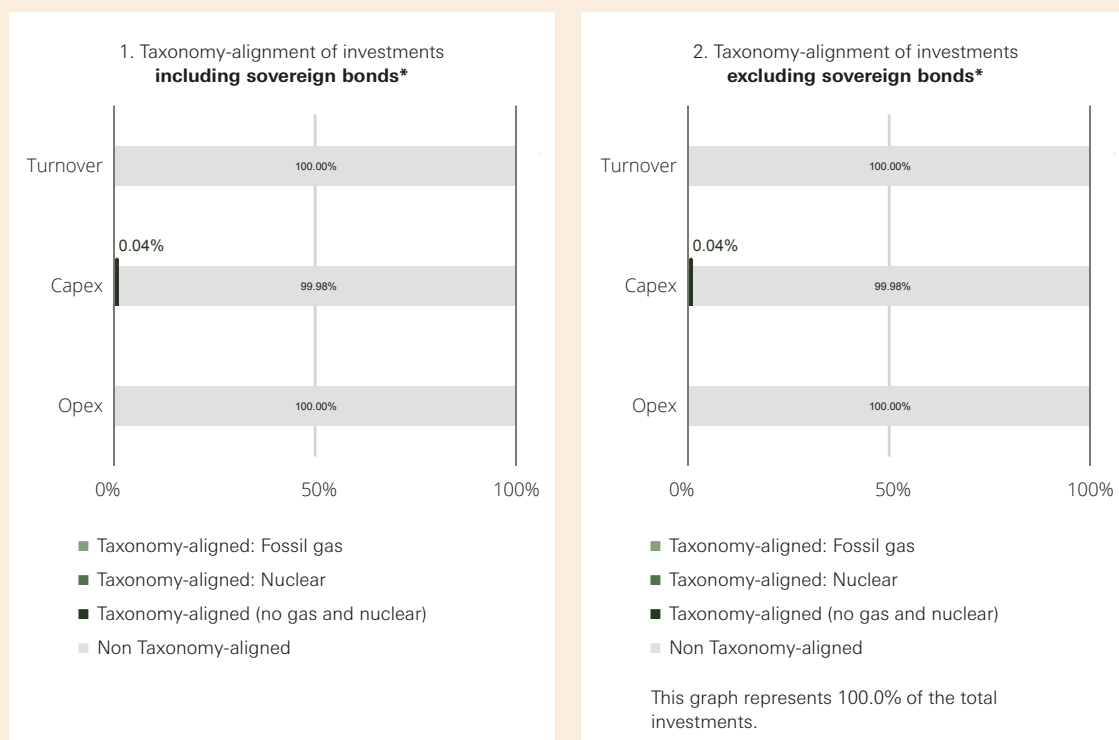

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%

CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.04%	0.00%
CAPEX - Non Taxonomy-aligned	99.98%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 0% as the sub-fund has a social objective.

What was the share of socially sustainable investments?

The sub-fund made 43.68% of socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The core of our process aimed to identify companies offering products/services which helped reduce the total cost of care while delivering improved clinical outcomes for patients. Through this process we addressed affordability of care, which represented the biggest challenge jeopardising suitability of healthcare. Lack of affordability of healthcare negatively impacts patients and also impacts company revenues when fewer or no products are sold. The main element of our process consisted of our proprietary sustainability index to assess affordability. The process was completed by a more traditional assessment of a company through a financial, regulatory, clinical, product and completion lenses.

The first factor was the sustainability index which assessed the ability of companies to address the change in customer needs; it related to the combined need for improved clinical outcomes and affordability/cost-savings. To assess clinical differentiation i.e. how much better or worse a product or service is compared to what is current used or used alternatively, we separate clinical differentiation into different six attributes - Clinical outcomes, Onset, Durability, Safety, Convenience and Patient-reported outcomes.

The relevance and importance of each attribute varied between diseases, indication or setting in which a product or service was used. Weightings were assigned based on the relevance of each attribute in a specific setting by the Investment Adviser using their expertise. Subsequently each relevant attribute was rated using a scale ranging from -3 to +3, with zero being considered equal to current practice, +1/-1 slightly better/inferior, +2/-2 better/inferior, +3/-3 significantly better/inferior. Published clinical and scientific literature was used as a basis for the ratings and the Investment Adviser used their expertise when determining ratings. The overall score for a product /service clinical differentiation score was computed by using a weighted average of the attribute scores. When several products were used to assess a company, each product/service clinical differentiation score was weighted by its net present revenue contribution.

The second factor was cost-savings: i.e. how much a product or service was saving or adding in terms of costs compared to that currently used, or used alternatively. We allocated cost-savings into four different attributes - Cost-effectiveness, Cost-offset, Price and Volume. Published health economics data and additional information from communications with the company were used as the basis for the ratings. Each attribute was rated by using a scale ranging from -3 to +3 with zero being considered equal to what current treatment/service cost, +1/-1 slightly better/inferior, +2/-2 better/inferior, +3/-3 significantly better/inferior.

The overall score for a product/service cost savings score was computed by using a weighted average of each attribute score, weighted by the relevance of each attribute. When several products were used to assess a company, each product/service cost-savings score was weighted by its net present revenue contribution.

A company was deemed sustainable - according to our sustainability index - if the company scores on both clinical differentiation and cost-saving were neutral to positive i.e. 0 to +3. In other words, these companies have a value proposition which is clinically and economically equivalent, or better than alternatives, and therefore have a good chance of positive triple impact on the patients the bill payers and the healthcare provider.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL INFRASTRUCTURE EQUITY

Legal Entity Identifier: 213800K1VMUUC6XW4441

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 21.50% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).
2. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses.
4. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data providers. Consideration of individual Principal Adverse Impacts (PAIs) indicated in the table below by their preceding number can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The Reference Benchmark for the sub-fund market comparison purposes was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund. The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	7.73	7.02
1. GHG Emissions - Metric tons CO2 equivalents	68,755.01	1,031,256,894.87
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	101.61	239.70
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	396.72	897.70
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.15%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - HGIF Global Infrastructure Equity Investment Universe

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	7.73	7.02
	31 March 2023	7.07	6.93
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024	68,755.01	1,031,256,894.87
	31 March 2023	58,962.73	382.13
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024	101.61	239.70
	31 March 2023	97.94	186.54
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	396.72	897.70
	31 March 2023	459.20	681.35
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.15%
	31 March 2023	0.00%	0.30%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund does not have a sustainable investment objective and did not commit to make sustainable investments as defined under SFDR. The sub-fund does promote environmental characteristics and as a result of the investment process, the sub-fund invested in a proportion of sustainable investments, which were aligned to the environmental characteristics promoted by the sub-fund.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at:
www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The PAIs considered by the sub-fund were:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon Footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
American Tower Corporation	Real Estate	6.13%	United States of America
Williams Companies, Inc.	Energy	5.25%	United States of America
Cellnex Telecom S.A.	Communication Services	4.45%	Spain
National Grid plc	Utilities	4.43%	United Kingdom of Great Britain and Northern Ireland
Crown Castle Inc.	Real Estate	4.35%	United States of America
Sempra	Utilities	4.34%	United States of America
Pembina Pipeline Corporation	Energy	4.30%	Canada
Cheniere Energy, Inc.	Energy	4.25%	United States of America
Edison International	Utilities	3.80%	United States of America
Eiffage SA	Industrials	3.41%	France
Royal Vopak NV	Energy	3.30%	Netherlands
Eversource Energy	Utilities	3.23%	United States of America

Cash and derivatives were excluded

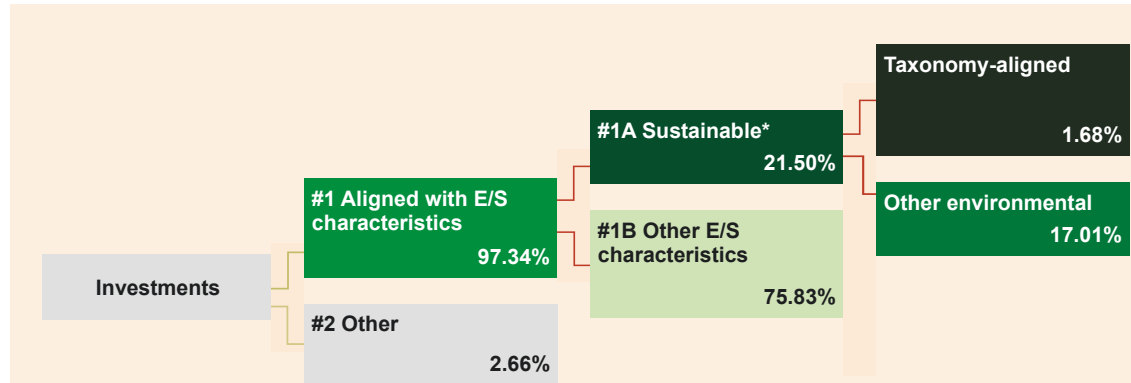

What was the proportion of sustainability-related investments?

21.50% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Utilities	34.19%
<i>Electric Utilities</i>	10.26%
<i>Gas</i>	7.90%
<i>Multi-Utilities</i>	14.76%
Energy	29.61%
<i>Oil & Gas Storage & Transportation</i>	29.61%
Industrials	16.26%
Real Estate	10.30%
Communication Services	9.22%
Cash & Derivatives	0.40%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

 In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.99%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.03%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.65%	0.00%
Revenue - Non Taxonomy-aligned	98.32%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.79%	0.00%
CAPEX - Non Taxonomy-aligned	98.21%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.48%	0.00%
OPEX - Non Taxonomy-aligned	98.52%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 17.01%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

The sub-fund includes the identification and analysis of a company's ESG credentials as an integral part of the investment decision-making process. ESG Credentials are derived from a range of HSBC proprietary and third party sources, are subject to ongoing research and may change over time as new credentials are identified. They include, but are not limited to:

- Environmental and Social factors, including but not limited to physical risks of climate change and human capital management, that may have a material impact on a security issuer's financial performance and valuation
- The investment decision-making process integrates ESG Credentials in a number of ways:
 - Apportioning a minimum 25% of an infrastructure related security's quality score to ESG Credentials
 - Excluding companies with a low ESG score and companies that are considered to be non-compliant with the UNGC Principles. This exclusion is at the discretion of the Investment Adviser. Companies with an improving but still low ESG score and companies with a discernible direction of travel towards UNGC Principles compliance may still be invested in
 - Engagement with companies around energy transition and ESG regulation

The most significant actions during the reference period were increasing the exposure to two companies that both have relatively high ESG Scores, which can be seen in the sub-funds ESG Score above. Additionally holdings within two carbon intensive companies were reduced within the period, which can be seen in the reduction of the Sub-funds PAI 3 score as detailed above.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable.
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable.
- ***How did this financial product perform compared with the broad market index?***
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL LOWER CARBON EQUITY

Legal Entity Identifier: 213800ENBN1SRILVHQ60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.38% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund actively considered low carbon intensity investments and the ESG score was managed to have a higher score compared to the index.
2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. The sub-fund identified and analysed all companies for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider. MSCI. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The Reference Benchmark was used to measure the sub-fund's carbon intensity and ESG scores but had not been designated for the purpose of attaining the environmental or social characteristics of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	8.25	6.87
Weighted E Pillar Score	1.25	1.22
Weighted S Pillar Score	2.49	2.11
Weighted G Pillar Score	2.35	2.19
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	54.03	109.67
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.69%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.24%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI World

...and compared to previous periods?

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	54.03	109.67
	31 March 2023	66.00	144.58
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.69%
	31 March 2023	0.00%	0.80%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.24%
	31 March 2023	0.00%	0.00%

From November 2023, PAI 1 - Greenhouse gas emissions and PAI 2 - Carbon footprint were added as a sustainability indicators to this sub-fund in error and subsequently removed in January 2024. Therefore, we have not reported on these PAIs.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others the reduction of greenhouse gas (GHG) emissions and carbon footprint.

The sub-fund aimed for lower exposure to carbon intensive businesses through portfolio construction and to make an improvement of the overall ESG score when compared to the benchmark.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The PAIs considered by the sub-fund were:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	5.10%	United States of America
Apple Inc.	Information Technology	3.86%	United States of America
NVIDIA Corporation	Information Technology	1.83%	United States of America
UnitedHealth Group Incorporated	Health Care	1.65%	United States of America
Amazon.com, Inc.	Consumer Discretionary	1.49%	United States of America
Home Depot, Inc.	Consumer Discretionary	1.43%	United States of America
Alphabet Inc. Class A	Communication Services	1.37%	United States of America
Adobe Inc.	Information Technology	1.20%	United States of America
Cisco Systems, Inc.	Information Technology	1.17%	United States of America
Texas Instruments Incorporated	Information Technology	1.14%	United States of America
International Business Machines Corporation	Information Technology	1.11%	United States of America
Applied Materials, Inc.	Information Technology	1.10%	United States of America
Coca-Cola Company	Consumer Staples	1.10%	United States of America
Lam Research Corporation	Information Technology	1.09%	United States of America
American Express Company	Financials	1.08%	United States of America

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

37.38% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	25.25%
Financials	17.21%
Industrials	13.90%
Health Care	11.30%
Consumer Discretionary	10.30%
Energy	6.52%
<i>Integrated Oil & Gas</i>	1.14%
<i>Oil & Gas Exploration & Production</i>	3.76%
<i>Oil & Gas Refining & Marketing</i>	0.83%
<i>Oil & Gas Storage & Transportation</i>	0.78%
Communication Services	4.54%
Consumer Staples	4.16%
Materials	3.04%
Real Estate	2.33%
Cash & Derivatives	1.08%
Utilities	0.34%
<i>Electric Utilities</i>	0.09%
<i>Gas</i>	0.07%
<i>Multi-Utilities</i>	0.18%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.16%.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.20%	0.00%
Revenue - Non Taxonomy-aligned	99.80%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.54%	0.00%
CAPEX - Non Taxonomy-aligned	99.46%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.44%	0.00%
OPEX - Non Taxonomy-aligned	99.56%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 35.78%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

In order to lower the carbon intensity of the portfolio and raise its ESG score, all holdings in the portfolio were assessed for their individual carbon intensity and ESG scores at each monthly rebalance.

Through an HSBC proprietary systematic investment process, a portfolio was created to maximise the exposure to the desired factors to deliver its financial objectives, but which also aimed for a lower carbon intensity and a higher ESG score than the MSCI World which is the Reference Benchmark. As a result, the sub-fund had a higher ESG score and a lower carbon intensity than the benchmark throughout the reporting period.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL SUSTAINABLE LONG TERM DIVIDEND

Legal Entity Identifier: 213800Q412OUFUB41202

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 87.35% of sustainable investments <input checked="" type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following characteristics:

1. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
2. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.

4. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

5. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG score is taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Impacts (PAIs) indicated in the table below by their preceding number can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures, or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of sustainability indicators can be seen in the table below.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	8.42	7.15
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	74.16	186.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.77%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	1.10%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI World High Dividend Yield

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	8.42	7.15
	31 March 2023	8.43	7.04
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	74.16	186.00
	31 March 2023	74.96	219.29
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	0.77%
	31 March 2023	0.00%	1.52%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	1.10%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental and social objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund aimed to provide income from dividends and long term capital growth by investing in companies that may have benefited over the long term from the transition to a more sustainable global economy (“Sustainable Companies”), thereby promoting ESG characteristics within the meaning of Article 8 of SFDR.

After excluding those companies carrying out Excluded Activities, proprietary research was used to assess and grade certain sustainability criteria according to a 3-point scale, or similar grading scale. Sustainability criteria were subject to ongoing research and may have changed over time but may have included sustainability of practices and culture, sustainability of business model, sustainability of products. The Investment Adviser then considered a company’s sustainability criteria grades and its alignment with UN Sustainable Development Goals to come to an initial conclusion as to whether a company was considered a Sustainable Company.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
Details:*

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The PAIs considered by the sub-fund were:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies’ commitment to lower-carbon transition, adoption of sound human rights principles and employees’ fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders’ rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
ASML Holding NV	Information Technology	8.11%	Netherlands
Microsoft Corporation	Information Technology	6.16%	United States of America
Intuit Inc.	Information Technology	5.98%	United States of America
Coloplast A/S Class B	Health Care	5.80%	Denmark
Automatic Data Processing, Inc.	Industrials	5.62%	United States of America
Visa Inc. Class A	Financials	4.85%	United States of America
Kone Oyj Class B	Industrials	4.73%	Finland
Recordati Industria Chimica e Farmaceutica S.p.A.	Health Care	4.72%	Italy
Nintendo Co., Ltd.	Communication Services	4.40%	Japan

Cash and derivatives were excluded

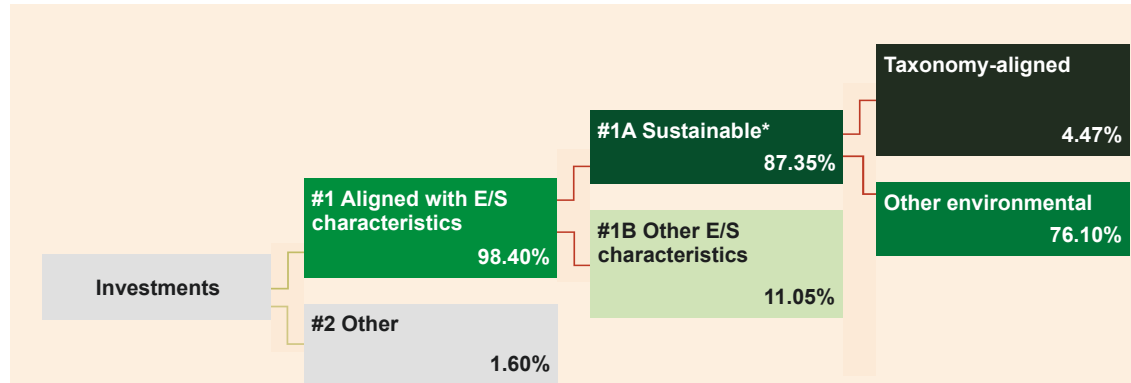

What was the proportion of sustainability-related investments?

87.35% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	19.09%
Health Care	18.98%
Consumer Staples	16.84%
Industrials	15.35%
Materials	7.80%
Consumer Discretionary	6.64%
Financials	4.86%
Utilities	4.55%
<i>Electric Utilities</i>	<i>4.55%</i>
Communication Services	4.29%
Cash & Derivatives	1.60%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 4.46%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	4.47%	0.00%
Revenue - Non Taxonomy-aligned	95.53%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	4.46%	0.00%
CAPEX - Non Taxonomy-aligned	95.54%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	4.26%	0.00%
OPEX - Non Taxonomy-aligned	95.74%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 76.10%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual greenhouse gas intensity. The sub-fund also assessed ESG scores resulting in an ESG score comparable with the benchmark throughout the reporting period.

In addition, all holdings were assessed for violations of UNGC and OECD principles ensuring good governance practices within the portfolio.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - HONG KONG EQUITY

Legal Entity Identifier: 213800ZW305YHRYHI687

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u> % <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 14.22% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: <u> </u> %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year ended 31 March 2024 (the Reference Period), the sub-fund promoted the following:

- Active consideration of low carbon intensity investments compared to the Reference Benchmark.
- The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the environmental and/or social characteristics promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

3. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises principles for businesses. Where instances of potential violations of UNGC principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
4. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The sustainability indicator scores are calculated as per HSBC Asset Management's proprietary methodology and third party ESG data providers. Consideration of individual Principal Adverse Impacts (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The sub-fund was actively managed and did not track a benchmark. The sub-fund had an internal or external target to outperform the Reference Benchmark however, this was not designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	4,041.59	260,060,990.07
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	34.13	144.84
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	77.82	251.52
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	11.34%	12.48%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - FTSE MPF Hong Kong

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024	4,041.59	260,060,990.07
	31 March 2023	6,752.00	298,728,712.66
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 March 2024	34.13	144.84
	31 March 2023	53.11	136.43
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	77.82	251.52
	31 March 2023	139.78	262.14
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	11.34%	12.48%
	31 March 2023	13.32%	13.14%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.00%
	31 March 2023	0.00%	0.06%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the sub-fund contributed to environmental objectives which included, amongst others:

1. The reduction of greenhouse gas (GHG) emissions and carbon footprint;
2. The transition to or use of renewable energy.

The sub-fund included the identification and analysis of a company's ESG credentials as an integral part of the investment decision making process, which helped to assess risks and potential returns.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Violation of UNGC and OECD principles; and
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account. Investment in companies carrying out business activities that were deemed harmful to the environment were also excluded.

As a result of such screening, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
HSBC Holdings Plc	Financials	9.55%	United Kingdom of Great Britain and Northern Ireland
Tencent Holdings Ltd.	Communication Services	9.54%	China
Alibaba Group Holding Limited	Consumer Discretionary	8.33%	China
China Construction Bank Corporation Class H	Financials	6.39%	China
AIA Group Limited	Financials	4.57%	Hong Kong
Netease Inc	Communication Services	4.46%	China
China Mobile Limited	Communication Services	4.24%	China
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	4.13%	Taiwan

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

14.22% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Financials	28.43%
Communication Services	21.72%
Consumer Discretionary	18.03%
Real Estate	6.35%
Information Technology	6.27%
Utilities	4.44%
<i>Electric Utilities</i>	3.42%
<i>Gas</i>	1.02%
Energy	3.33%
<i>Oil & Gas Exploration & Production</i>	3.33%
Industrials	2.72%
Health Care	2.21%
Cash & Derivatives	2.08%
Government	1.67%
Consumer Staples	1.51%
Materials	1.21%
Other	0.04%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 0%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	N/A	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 14.22%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund did not invest in socially sustainable investments.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

All holdings in the portfolio were assessed for their individual carbon intensity, resulting in portfolio carbon intensity level better the benchmark. The sub-fund also assessed ESG scores resulting in an ESG score above the benchmark throughout the reporting period.

In addition, where material ESG risks or a potential breach of one or more of the ten UNGC Principles were identified, enhanced ESG due diligence was carried out by the portfolio manager/analyst and investment committee approval was required before investments could be made.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EMERGING MARKETS CORPORATE SUSTAINABLE BOND

Legal Entity Identifier: 2138001DWNLVT5HF8T24

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: 98.56%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: _%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

During the financial year ended 31 March 2024 (the Reference Period) the sub-fund promoted the following:

- The sub-fund invested into a portfolio of fixed income securities issued by companies/issuers that actively contribute to the United Nations Sustainable Development Goals (UNSDGs). Particularly those in relation to Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities.
- United Nations Global Compact (UNGC) and OECD Guidelines for Multinational Enterprises (OECD) principles. Where instances of potential violations of United Nations Global Compact (UNGC) principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, were excluded.
- The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and thermal coal-fired power generation.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

4. The sub-fund identified and analysed all companies/issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, where HSBC Asset Management considered it appropriate to do so.

6. The sub-fund analysed and excluded investments involved in controversial weapons.

Consideration of individual Principal Adverse Indicators (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company/issuers disclosures or estimated by the data vendors in the absence of company/issuers reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark for sub-fund market comparison purposes was not designated for the purpose of attaining the sustainable investment objective promoted by the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the sustainable investment objective that it promoted can be seen in the table below.

All issuers demonstrated good governance practices, which can be identified by the PAI 10 score below

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	13,837.33	73,735,494.55
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	132.82	159.28
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	194.11	522.00
4. Exposure to companies active in the fossil fuel sector	0.00%	0.00%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	0.00	0.00
8. Emissions to water - Thousands of Metric tons per million of Euros invested	0.00	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	3.39%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.00%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - JP Morgan CEMBI Broad Diversified

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
1. GHG Emissions - Metric tons CO2 equivalents	31 March 2024 31 March 2023	13,837.33 0.00	73,735,494.55 0.00

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and

- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The Principal Adverse Impacts considered by the sub-fund were:

- Greenhouse gas emissions (Scope 1 & Scope 2)
- Carbon footprint (Scope 1 & Scope 2)
- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in the fossil fuel sector
- Energy consumption intensity per high impact climate sector - NACE code D: Electricity, gas, steam and air conditioning supply
- Energy consumption intensity per high impact climate sector - NACE code E: Water supply; sewerage, waste management and remediation activities
- Water Emissions
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider Principal Adverse Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Ct Trust 5.125% 03-feb-2032	Communication Services	3.36%	Guatemala
Star Energy Geothermal (wayang Windu) Ltd. 6.75% 24-apr-2033	Utilities	3.34%	Indonesia
Maf Global Securities Ltd. 7.875% Perp	Real Estate	3.05%	United Arab Emirates
Renew Wind Energy (ap 2) Pvt Ltd. 4.5% 14-jul-2028	Utilities	2.87%	India

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

98.56% of the portfolio was invested in sustainable assets.

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Utilities	20.51%
<i>Electric Utilities</i>	0.58%
<i>Gas</i>	1.57%
<i>Independent Power Producers & Energy Traders</i>	6.64%
<i>Multi-Utilities</i>	0.95%
Other	18.47%
Communication Services	14.69%
Materials	12.49%
Financials	11.50%
Industrials	6.69%
Real Estate	5.93%
Consumer Discretionary	4.56%
Health Care	2.08%
Consumer Staples	1.33%
Cash & Derivatives	1.75%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

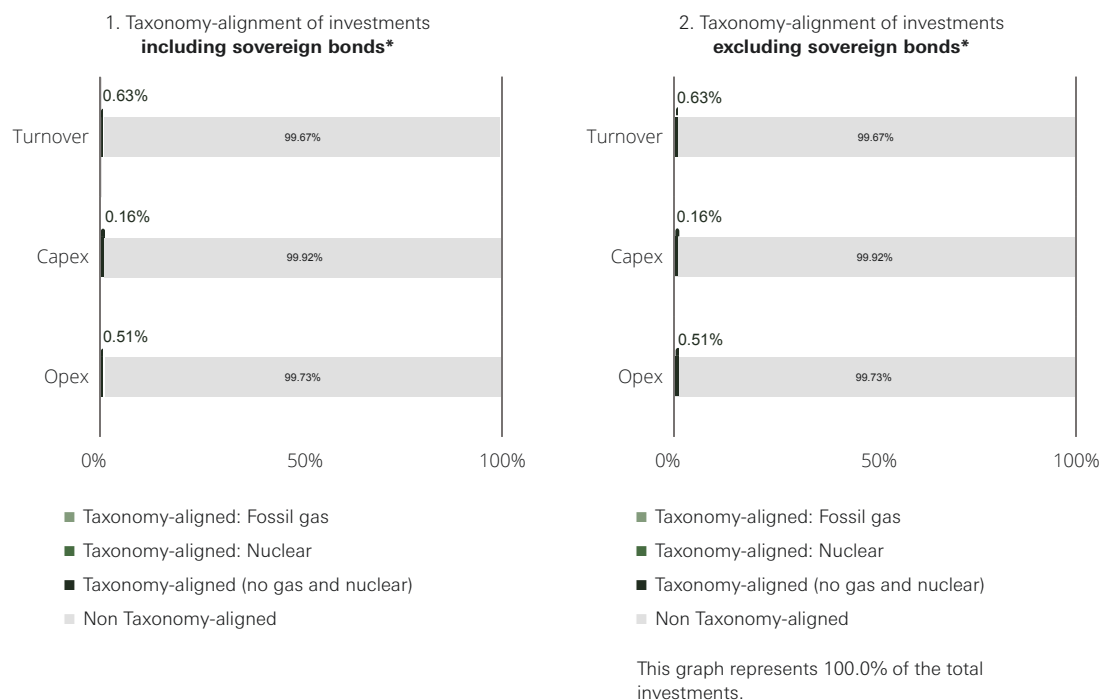

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.04%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.63%	0.00%
Revenue - Non Taxonomy-aligned	99.69%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Non Taxonomy-aligned	99.92%	100.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.16%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.51%	0.00%
OPEX - Non Taxonomy-aligned	99.74%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 94.62%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The sub-fund delivered positive environmental impact through integrated sustainability analysis and continuous engagement with emerging market issuers. This credit-intensive strategy focused on rigorous credit research and engagement, leveraging HSBC’s robust emerging market debt investment platform and top tier credit and responsible investment (RI) analyst teams. The sub-fund is an SFDR Article 9 sub-fund with a specific sustainability objective: it aimed to help positive change and measurable impact in emerging markets, comprised of countries that represented some of the largest carbon emitters in the world.

The sustainability assessment was at the core of the strategy's investment process. The bottom-up investment process selected corporate issuers based on rigorous fundamental analysis and a forward-looking, integrated Sustainability Assessment which aimed to:

1. evaluate an issuer's current sustainability plans and challenges
2. track the issuer's ongoing sustainability progress based on ESG data and engagement
3. measure the issuer's positive change and impact achievements

The Sustainability Assessment was completed by credit research and RI team members, with issuers names presented to the Fixed Income ESG Committee for approval. A dedicated credit analyst was assigned to each issuer name where they sought sufficient issuer transparency, ESG data & willingness to engage. On the basis of our issuer engagement, sustainability analysis and screening, we focused on issuers that had clear sustainability objectives and that are showed progress in achieving them. This selection process eliminated approximately 90% of the overall emerging markets corporate universe (≈ 810 issuers).

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

● ***How did the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL EQUITY CIRCULAR ECONOMY

Legal Entity Identifier: 213800KB6BO3Z43JHW60

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 98.01%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: _%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

During the financial year ended 31 March 2024 (the Reference Period) the sub-fund achieved the following in relation to the sustainable investment objective:

- The sub-fund invested into a concentrated portfolio of companies that actively contribute to the transition to a more circular global economy and was based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems. The sub-fund made a positive environmental, social and governance ("ESG") impact by investing in a concentrated portfolio of companies that actively contributed to the transition of a more circular global economy, based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems, while also aiming to provide long term total return.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

2. The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and OECD Guidelines for Multinational Enterprises (OECD) principles. Where instances of potential violations of United Nations Global Compact (UNGC) principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the Fund's portfolio and, if deemed unsuitable, were excluded.
3. The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.
4. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).
5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.
6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Indicators (PAIs) is indicated in the table below by their preceding number compared to the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The reference benchmark had not been designated for the purpose of attaining the sustainable investment objective of the sub-fund.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the sustainable investment objective that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund.

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	8.18	6.78
E Pillar	6.46	6.66
S Pillar	5.93	5.11
G Pillar	6.54	5.65
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	128.57	126.54
4. Exposure to companies active in the fossil fuel sector	0.00%	7.20%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.39%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.22%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI All Country World

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	8.18	6.78
	31 March 2023	8.23	6.82
E Pillar	31 March 2024	6.46	6.66
	31 March 2023	6.70	6.60
S Pillar	31 March 2024	5.93	5.11
	31 March 2023	5.85	5.16
G Pillar	31 March 2024	6.54	5.65
	31 March 2023	6.62	5.66
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	128.57	126.54
	31 March 2023	150.78	154.34
4. Exposure to companies active in the fossil fuel sector	31 March 2024	0.00%	7.20%
	31 March 2023	0.00%	7.62%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	1.39%
	31 March 2023	0.00%	1.65%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.22%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

We can confirm that the do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources

(including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included nonfinancial risks such as human rights, labour, environment, and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identifying and managing sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as sustainability indicators:

- Greenhouse gas intensity of investee companies (Scope 1 & Scope 2)
- Exposure to companies active in fossil fuel sector
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screens, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
United Rentals, Inc.	Industrials	3.77%	United States of America
ASML Holding NV	Information Technology	3.34%	Netherlands
Autodesk, Inc.	Information Technology	3.32%	United States of America
Home Depot, Inc.	Consumer Discretionary	3.24%	United States of America
L'Oreal S.A.	Consumer Staples	3.21%	France
Ecolab Inc.	Materials	3.18%	United States of America
Intesa Sanpaolo S.p.A.	Financials	3.07%	Italy
Waste Management, Inc.	Industrials	2.97%	United States of America
Cisco Systems, Inc.	Information Technology	2.80%	United States of America

Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹ ?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.49% and the share of investment in enabling activities was 1.66%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	3.34%	0.00%
Revenue - Non Taxonomy-aligned	96.66%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Non Taxonomy-aligned	96.61%	100.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	3.39%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	3.37%	0.00%
OPEX - Non Taxonomy-aligned	96.63%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 86.15%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC’s full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The sub-fund has delivered a positive environmental, social and governance (“ESG”) impact by investing in a concentrated portfolio of companies that actively contributed to the transition to a more circular global economy, based on the principles of designing out waste and pollution, keeping products and materials in use and regenerating natural systems.

The sub-fund had a minimum of 90% of its net assets in equities and equity equivalent securities of companies with exposure to circular economy themes (“Circular Economy Themes”) which are domiciled in, based in, carry out business activities in, or are listed on a Regulated Market in any country including both developed markets and Emerging Markets.

At any time, 100% of the portfolio assets are whitelisted in accordance with our Sustainable Investment Framework which incorporates the application of Excluded Activities in accordance with HSBC Asset Management’s Responsible Investment Policies and our proprietary company assessment of thematic alignment, by leveraging our internal circular economy research. The latter consists of identifying two types of companies:

1. “Enablers” with at least 20% revenue alignment to our proprietary Circular Economy Taxonomy
2. “Trailblazers” that integrate circular economy principles in their own operation to generate higher financial and sustainability efficiency, with a minimum score of 30 as measured by our circularity assessment tool.

The portfolio ESG score is higher than the weighted average of the constituents of the MSCI AC World (the “Reference Benchmark”) after eliminating 20% of the lowest ESG scored issuers from the Reference Benchmark.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable.

Not applicable.

Reference

benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - GLOBAL SUSTAINABLE LONG TERM EQUITY

Legal Entity Identifier: 213800T5TN9TXJMB1G69

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective: 98.22%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: _%**

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

During the financial year ended 31 March 2024 (the Reference Period) the sub-fund achieved the following:

- The sub-fund invested into a concentrated portfolio of companies that actively contribute to United Nations Sustainable Development Goals, including, but not limited to, Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities.
- The sub-fund considered responsible business practices in accordance with United Nations Global Compact (UNGC) and OECD Guidelines for Multinational Enterprises (OECD) principles. Where instances of potential violations of United Nations Global Compact (UNGC) principles were identified, issuers were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the Fund's portfolio and, if deemed unsuitable, were excluded.
- The sub-fund excluded business activities that were deemed harmful to the environment, such as thermal coal extraction and coal-fired power generation.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

4. The sub-fund identified and analysed all companies or issuers for environmental characteristics including, but not limited to, physical risks of climate change and human capital management. Screening has been conducted for the underlying E, S (which reflect the individual items of the sustainable investment objective promoted by the sub-fund) and G pillars (corporate governance practices that protect minority investor interests and promote long term sustainable value creation, compared to the reference benchmark selected by the sub-fund).

5. The sub-fund actively considered environmental and social issues by engagement completed by our Engagement and Stewardship teams, which included proxy voting.

6. The sub-fund analysed and excluded investments involved in controversial weapons.

The ESG scores are taken from third party ESG data provider MSCI. Consideration of individual Principal Adverse Indicators (PAIs) (indicated in the table below by their preceding number) can be identified from the sub-fund having a lower score than the Reference Benchmark. The data used in the calculation of PAI values are sourced from data vendors. They can be based on company disclosures or estimated by the data vendors in the absence of company reports. Please note that it is not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

The performance of the sustainability indicators the sub-fund used to measure the attainment of the sustainable investment objective that it promoted can be seen in the table below. The sub-fund's ESG score has been managed to be greater than the reference benchmark selected by the sub-fund (with a higher score than the benchmark representing stronger ESG credentials).

All companies demonstrated good governance practices, which can be identified by the PAI 10 score below.

● ***How did the sustainability indicators perform?***

Indicator	sub-fund	Reference Benchmark
ESG Score	8.58	6.78
E Pillar	6.90	6.66
S Pillar	6.19	5.11
G Pillar	6.34	5.65
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	34.46	126.54
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.39%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00%	0.22%

The data in this SFDR Periodic Report are as at 31 March 2024, Based on the four-quarter average holdings of the financial year ending on 31 March 2024.

Reference Benchmark - MSCI All Country World

...and compared to previous periods?

Indicator	Period Ending	sub-fund	Reference Benchmark
ESG Score	31 March 2024	8.58	6.78
	31 March 2023	8.51	6.82
E Pillar	31 March 2024	6.90	6.66
	31 March 2023	6.45	6.60
S Pillar	31 March 2024	6.19	5.11
	31 March 2023	6.22	5.16
G Pillar	31 March 2024	6.34	5.65
	31 March 2023	6.38	5.66
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 March 2024	34.46	126.54
	31 March 2023	52.42	154.34
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 March 2024	0.00%	1.39%
	31 March 2023	0.00%	1.65%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 March 2024	0.00%	0.22%
	31 March 2023	0.00%	0.00%

This is only the second SFDR Periodic report and as such there is no comparison required prior to then.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

We can confirm that do no significant harm analysis was completed as part of HSBC Asset Management's (HSBC) standard investment process for sustainable assets, which included the consideration of Principal Adverse Impacts.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser reviewed all SFDR mandatory Principal Adverse Impacts (PAIs) to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy set out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considered ESG sustainability risks as these could adversely impact the securities the sub-funds invested in. HSBC used third party screening providers, such as Sustainalytics, ISS, MSCI and Trucost to identify companies and governments with a poor track record in managing ESG risks and, where any such material risks were identified, HSBC also carried out further ESG due diligence. Sustainability impacts, including the relevant PAIs, identified by screening were a key consideration in the investment decision making process.

The approach taken, as set out above, meant that among other things the following points were scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aimed, among other things, at alleviating child and forced labour. HSBC also paid great attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources

(including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The specific PAIs for this sub-fund were as set out below.

HSBC's Responsible Investment Policy is available on the website at: www.assetmanagement/hsbc/about-us/responsible-investing/policies.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

HSBC was committed to the application and promotion of global standards. Key areas of focus for HSBC's Responsible Investment Policy were the ten principles of the UNGC. These principles included non-financial risks such as human rights, labour, environment and anti-corruption. HSBC was also a signatory of the UN Principles of Responsible Investment. This provided the framework used in HSBC's approach to investment by identified and managed sustainability risks. Companies in which the sub-fund invested would be expected to comply with the UNGC and related standards. Companies having clearly violated one of the ten principles of the UNGC were systematically excluded. The sub-fund conducted enhanced due diligence on companies that were considered to be non-compliant with the UNGC Principles or were considered to be high risk as determined by HSBC's proprietary ESG ratings. Companies were also evaluated in accordance with international standards like the OECD Guidelines.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund considered the following PAIs by monitoring them as a sustainability indicators:

- Greenhouse gas intensity of investee companies
- Violation of UNGC and OECD principles
- Share of investment involved in controversial weapons

The approach taken to consider PAIs Impacts meant that, among other things, HSBC scrutinised companies' commitment to lower-carbon transition, adoption of sound human rights principles and employees' fair treatment, and implementation of rigorous supply chain management practices such as those aiming to alleviate child and forced labour. HSBC also paid attention to the robustness of corporate governance and political structures which included the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies, as well as audit trails. Governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance were also taken into account.

As a result of such screens, HSBC did not invest in certain companies and issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2024

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	8.92%	United States of America
ASML Holding NV	Information Technology	8.58%	Netherlands
Intuit Inc.	Information Technology	6.23%	United States of America
Adobe Inc.	Information Technology	6.12%	United States of America
MSCI Inc. Class A	Financials	5.20%	United States of America
Novo Nordisk A/S Class B	Health Care	4.51%	Denmark
Visa Inc. Class A	Financials	4.47%	United States of America
Zoetis, Inc. Class A	Health Care	4.44%	United States of America
Waters Corporation	Health Care	4.29%	United States of America

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

98.22% of the portfolio was invested in sustainable assets.

What was the asset allocation?

Asset allocation

describes the share of investments in specific assets.

*A Company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / Sub-Sector	% Assets
Information Technology	31.34%
Health Care	23.91%
Consumer Staples	10.06%
Financials	9.34%
Materials	8.35%
Industrials	7.36%

Consumer Discretionary	6.49%
Cash & Derivatives	1.78%
Communication Services	1.36%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy can be seen in the Asset Allocation boxes above.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

● **What was the share of investments made in transitional and enabling activities?**

For the reference period fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.37%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Indicator	2023-2024	2022-2023
Revenue - Taxonomy-aligned: Fossil gas	N/A	0.00%
Revenue - Taxonomy-aligned: Nuclear	N/A	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.38%	0.00%
Revenue - Non Taxonomy-aligned	99.62%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
CAPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
CAPEX - Non Taxonomy-aligned	99.59%	100.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.41%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	N/A	0.00%
OPEX - Taxonomy-aligned: Nuclear	N/A	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.03%	0.00%
OPEX - Non Taxonomy-aligned	99.97%	100.00%

As this was only the second reporting period for the sub-fund, no comparison is required prior to that.

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 94.23%. The sub-fund did not commit to making any EU Taxonomy aligned investments.

 **What was the share of socially sustainable investments?**

The sub-fund invested into a portfolio of fixed income securities issued by companies that actively contributed to the UNSDGs and therefore considered social elements of investments, namely Good Health and Well-Being, Gender Equality, Decent Work and Economic Growth and Reduced Inequalities. However, these social UNSDGs were considered in conjunction with environmental UNSDGs and so it is not possible to provide a separate proportion of socially sustainable investments.

 **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes those financial instruments which are not aligned with the environmental or social characteristics of the sub-fund and do not qualify as sustainable investments. In some instances, this is due to non-availability of data and corporate actions. These holdings were still subject to HSBC's full set of exclusions screening and were considered for responsible business practises in accordance with UNGC and OECD principles.

The sub-fund held cash/cash equivalents (the percentage of cash held can be seen in the above sector/sub-sector table under the heading 'In which economic sectors were the investments made?') for the purposes of liquidity management as well as financial derivative instruments for the purposes of efficient portfolio management. Cash/cash equivalents and financial derivatives instruments do not have minimum environmental or social safeguards applied due to the nature of these instruments.

 **What actions have been taken to attain the sustainable investment objective during the reference period?**

During the reference period, the strategy delivered on its sustainable investment objective by rigorously assessing the sustainability of the business model, product, and practices of all holdings in the portfolio. Additionally, through our fundamental analysis, the Investment Adviser ensured that every company included in the portfolio materially aligned to at least one United Nations Sustainable Development Goal.

The Investment Adviser scored the companies using a proprietary scorecard addressing three dimensions of sustainability, practices and culture, business model and product.

UN SDG mapping was carried out by the Investment Adviser, and not driven by how the company itself determines alignment. The investment team specified an alignment metric for SDG mapping, a baseline year for the datapoint, and tracked the metric over time. The team engaged with several companies specifically on the basis of that metric to ensure that over time it meets our expectations.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

● ***How did the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference

benchmarks are indexes to measure whether the financial product attains the sustainable objective.

HSBC Global Asset Management, the initiator of HSBC Global Investment Funds, is the asset management specialist of the HSBC Group and operates through HSBC Bank PLC and its subsidiaries.

HSBC Asset Management is the trading name of HSBC Global Asset Management Limited. HSBC Global Asset Management is established at 8 Canada Square, London E14 5HQ which is its registered office.
